

**Clip-Lok one-way packaging solution for energy storage units and batteries used in modern homes**

Clip-Lok Expendable box is tailor-made for energy storage units and batteries used in modern houses. The pallet bottom has markings on it to make it easier for the operators and saves time in production while packing the product. The ergonomic design ensures product protection at all times during transport. With the Clip-Lok QIK Plastic Clips<sup>™</sup>, no tools and nails are required to close and open the box.

Clip-Lok Expendable boxes:

- are tailor made to suit needs of the customer.
- are designed for the operator to build around the product.
- with Clip-Lok QIK Plastic Clips<sup>™</sup> are tool and nail free.
- can be stacked; thereby saving transport costs during delivery.
- can be flat-packed and easily stored in case the batteries or energy storage units require repair.
- are suitable for transport by road, rail, sea or air.
