

**Industrial Radio
Operated Control**

The new standard IROC TX12CS transmitter is a transmitter built for rough conditions with a robust and a ergonomic design.

A powerful rechargeable battery guarantees a reliable and trouble free operation. Just store TX12CS in the charger and it will always be ready to use.

Together with IROC standard receiver RX17 the transmitter can be used for most of the industrial and mobile applications where you need a robust safety radio remote control. 12 push buttons with single and double speed activation makes IROC perfect for many solutions.

Specifikation

Frequency	433.075 – 434.775 MHz	Operating temp.	- 25 C to + 55 °C
Channel Separation	25 KHz, 69 channels	Storage temp.	- 40 C to + 85 °C
Modulation	GFSK	Size	175 x 75 x 28 mm
Power output	10 mW	Operating time	15 hour
Range	Up to 1000 m	Charge time	3 hour

Manufacturer: : IROC AB, Bärtas väg 15, 442 98 Kod, Sweden , Phone : +46 (0) 313138180
