

**“How can I offer my customers
a complete self-service wash
in a small amount of space?”**

WashMaster – the tailored solution
for profitable use of “empty space”.

“Who offers the solutions my customers expect from me?”

WashTec provides the answers for your business.

The car wash business has high demands, and no one knows this as well as WashTec. We revolutionised the car wash market – and have since led the way for more than 50 years, providing highly efficient washing technology, optimised chemicals and comprehensive services for your business.

Our approach is simple:

In everything we do, we not only focus on achieving the perfect result, we make the people we serve our top priority. Everyone expects to be able to get optimal cleaning and care for their car from every self-service system. Results are important, but so is how we get there:

We understand your needs.

We listen carefully to what your customers say they want – and to your requirements as a business.

We meet – and exceed – expectations.

Our solutions are consistently geared towards your wishes and expectations, and they more than meet these.

We support your business.

We provide a car wash experience and finish that impresses your customers and earns their loyalty, giving you repeat business.

We improve your cost-efficiency.

We offer robust, low-maintenance, durable technology and extremely efficient washing chemicals – for maximum profit at minimal cost.

WashMaster: Benefits for you and your customers.

- Profitable business in the smallest of spaces
- Compact, powerful washing technology for installation outdoors or in the service room
- Ideal for generating additional turnover in 'empty space' at petrol stations, car dealerships, workshops and supermarkets
- Easy operation and flexible equipment for satisfied customers

WashMaster – perfect 1-bay solution using compact washing technology.

Profitable business in the smallest of spaces.

The WashMaster is the best solution for 'empty space' at petrol stations, car dealerships, workshops and supermarkets, or as a self-service add-on to a gantry car wash. The stainless steel housing of the WashMaster contains all components for the operation of up to six different wash programmes (intensive pre-wash, shampoo, wax, fresh water and osmosis water through the high-pressure nozzle, foam through the brush).

For existing service rooms.

The WashMaster rack offers powerful technology for connection in existing service rooms on site.

Spot-free drying thanks to osmosis with activated carbon filter.

The activated carbon filter removes final dirt particles and any free chlorine found in the water, protecting the osmosis membrane effectively from potential damage and increasing its service life. Thanks to osmosis, the WashMaster is also a valuable JetWash system.

Unlimited winter operation thanks to integrated antifreeze protection.

Cold weather is nothing to worry about. The antifreeze protection system is activated automatically when outside temperatures drop. This keeps the water moving in circulation through the system via the nozzles and brushes and ensures continuous operation even in winter.

Flexible: the right technology for every site and all requirements.

- Even the choice of heating is flexible – you can use gas or electric heating.
- With low installation costs, you can offer your customers a fully equipped car wash station with integrated nozzle compartment, antifreeze container and extension arm.

Easy control and operation.

Clear view of available credit (1)

The plain text display provides customers with a constant look at their remaining credit, so they always know how much washing time they have left and when they need to top up.

Always informed: Illuminated programme display (2)

The bright LEDs light up during the washing process to indicate the selected programme. An acoustic signal confirms the selection.

Always ready to use:

Flexible payment options (3)

The operating terminal allows for payment with coins, tokens, contact-free transponder cards (which can be topped up and reused on any of the washing systems available at the site) or prepaid wash codes.

Maintenance-free panel for cost-efficient operation (4)

The terminal is operated by an electronic pulse that is generated when the panel is touched. With no mechanical workings, the terminal is certainly low maintenance. The closed panel protects the components behind it from splashing water.

Car wash means WashTec all over the world.

More than **35,000** installed machines.

WashTec is used in car washes around the world – **and washes 2.75 million vehicles** a day!
