Unconditional steel protection

Jotamastic

Unconditional steel protection

Since the launch in 1984, the reliability of Jotamastic has set a **new standard for all epoxy primers**. With proven performance in both unpredictable application conditions and the most **challenging of surface conditions**, this expert product range is **trusted by professionals** worldwide to battle corrosion.

No matter the conditions – Jotamastic has got you covered.

Demanding surfaces

Hydro jetting is frequently used but flash rust easily develops on the treated surface. This requires an epoxy primer that minimizes the risk of coating failures due to challenging surface preparation. Jotamastic can be applied on most clean and sound surfaces, even on early flash rusting and surfaces prepared by hydro jetting.

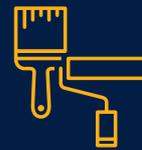

Harsh weather

Jotamastic is the ultimate choice of maintenance primer for enduring harsh weather conditions, due to its exceptional durability and protective qualities. Its unique technology provides a robust barrier against extreme temperatures and corrosive elements.

Challenging environments

Jotamastic is the optimal choice of maintenance primer for a variety of climates. The advanced technology provides a robust shield against the challenges posed by extreme weather conditions. Its ability to accommodate fluctuating temperatures and varying humidity levels sets it apart from other primers, ensuring long-lasting steel protection regardless of the climate.

Complex maintenance

Jotamastic secures flexible and efficient application solutions for small high-performance touch-ups, as well as bigger maintenance jobs. Robust and dependable, even with a wide range of application methods and in unpredictable conditions, it offers short overcoating intervals and fast curing time.

Engineered for the most challenging conditions

Challenging real-world conditions means that the maintenance primer must be easy and efficient to use, for both small high-performance touch-ups, as well as bigger maintenance jobs. Jotun has been waging an ongoing battle against the elements for almost a century. To ensure that our products are always up to the task, we constantly test them under the harshest conditions imaginable. Using a combination of field testing and the technology available at our modern R&D facilities, we always strive to document and prove the performance of our expert coating solutions.

<p>Jotamastic 85</p> <p>A multi-purpose, robust and efficient, surface tolerant primer that can be used on multiple application areas in different temperatures with short overcoating intervals.</p> <p>PSPC-WBT</p>	<p>Durability made easy through a two-component epoxy mastic coating, building on more than 35 years of anti-corrosion protection experience.</p> <ul style="list-style-type: none"> • Proving surface tolerance • Delivering robustness • Easy and efficient to use • Increased durability
<p>Jotamastic 90</p> <p>A tintable surface-tolerant abrasion resistant epoxy mastic primer for maintenance and repair, contributing to LEED and BREEAM credits.</p> <p>PSPC- COT NORSOK</p>	<p>A modern and versatile repair and maintenance primer for high corrosion classes.</p> <ul style="list-style-type: none"> • Surface-tolerant abrasion resistant primer • Optimized flow levelling for better wetting and penetration properties • Tintable in a wide range of colors • Provides long-lasting protection
<p>Jotamastic SMART PACK HB</p> <p>A high-build surface-tolerant epoxy mastic primer designed for brush and roller, providing longer durability and higher efficiency.</p> <p>NORSOK</p>	<p>Designed for application with brush and roller. The product is well suited to touch-up and repair work, ensuring more efficient application for smaller maintenance jobs.</p> <ul style="list-style-type: none"> • For areas where optimal surface preparation is not possible or required • Specially designed for application with brush and roller • 1:1 mixing ratio for easy use and reduced wastage • Securing long lasting protection in environments with high corrosivity

The Jotamastic range contains advanced technical properties that creates a **robust barrier against corrosion and shields the steel** from the detrimental effects of moisture, chemicals and abrasion – regardless of the climate. With Jotamastic, you can expect unconditional steel protection.
