Metal Supply is a commercial industry network where suppliers, subcontractors and purchasing companies in the metal and machine industry can easily get in touch with each other. They can find information about each other, buy / sell new and used products and machines for each other, insert job postings and much more. In Norway, we focus specifically on subcontractors and suppliers to the offshore and maritime industry, as well as to fish and aquaculture.

Beyond this, Metal Supply provides a unique opportunity to stay up to date with the industry via our daily news-letter.

Metal supply has been used to be the focal point of the metal and machine industry when it is possible to use effective contact and information sharing.
