WORLD-CLASS CONTRACT MANUFACTURING

TURNING

ROTEX USES AUTOMATIC LATHES AND CNC TURNING MACHINES TO PRODUCE MECHANICAL COMPONENTS FOR SWEDISH AND EXPORT INDUSTRIES. OUR EXTENSIVE EXPERIENCE AND UNIQUE MACHINERY OPTIMISES PROFITABILITY FOR OUR CUSTOMERS. WE ARE NEVER MORE THAN A PHONE CALL AWAY!

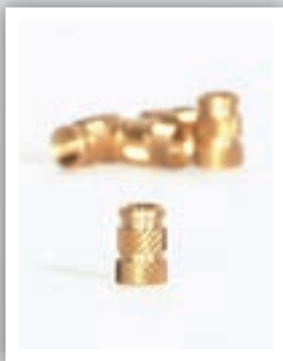

OUR PRODUCTS

EXPERTS ON TURNED PARTS IN TINY DIMENSIONS!

ROTEX manufactures small parts to customers within many different areas such as electronics, telecom, fasteners, locks, venetian blinds and many others.

INSERTS

We are experienced in production of inserts.

Inserts are usually manufactured in brass, but can be made out of steel or aluminium at your request.

The application area is limitless for this kind of turned part, as inserts are frequently used in a wide range of business sectors.

RIVETS

ROTEX manufactures and supplies rivets to a wide variety of companies in many different business sectors. The rivets can be made out of round, hexagonal or square rods - according to the customer's specific requirements.

Rivets are usually made of brass, but can also be produced out of free machining steel or aluminium if necessary.

SHAFTS

ROTEX manufactures shafts according to customer requirements, for example with turned tracks. We also offer hardening and centerless grinding, which is primarily suited for high volumes and tight tolerances.

The most common material is brass, but we can also produce in free machining steel, aluminium or stainless steel according to your wishes and requirements.

PINS AND SPACERS

We manufacture pins and spacers based on round, hexagonal or square rods - all according to your request.

The most common material is brass, but they can also be made out of steel or aluminium.

Made in Sweden

We are very proud of conducting our production in Sweden. Quality has always been and always will be the basis of Rotex success. Our goal is to always exceed your expectations, quality assurance and excellent service is how we do it!

Responsibility for the environment plays a central role in our business. When we develop new products, we strive to take all environmental aspects into account. Materials, the way we produce and not least the personal influence of all employees help us conduct our business in a sustainable way.

AT YOUR SERVICE!

DIMENSIONS & MATERIALS

We work within these dimension areas: round rods 2–16 mm, hexagonal rods 3–8 mm and square rods 4–6 mm. Internal threads span the interval M1.4 – M14. Our ROTEX lathes have a maximum product diameter of 10 mm and our Citizen CNC turning machines have a maximum product diameter of 16 mm.

Suitable production quantities stretch from 10 000 units and upwards.

The materials we work with frequently include brass, aluminium, free machining steel and stainless steel. We also offer surface treatments such as hardening.

We can satisfy product requirements based on specific customer needs, because of our unique machine designs.

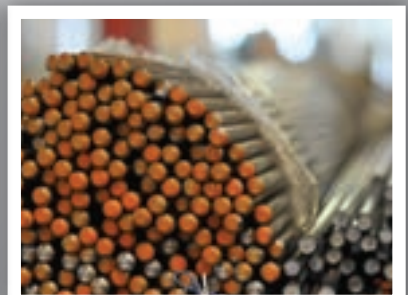

MANUFACTURING ACCORDING TO YOUR NEEDS

In our tool shop we are using modern technology to develop both products and machinery.

We design and manufacture the automatic lathes we use. The lathes combine steering by both mechanical means and electronic control.

Our machinery consists of 43 automatic ROTEX lathes and six Citizen CNC turning machines.

R

ROTEX AB

Since 1947, ROTEX has been manufacturing auto turned parts in tiny dimensions. With us, you will find unique knowledge to meet special needs. The production capacity exceeds tens of millions parts per year.

Our machine park consists of 62 lathes. 43 are automatic single-spindle lathes of our own design, 6 Citizen lathes with 3 meter bar feeders and a large number of tool holders, 1st STAR SB-20 with high pressure cooling, 3 meter bar feeder and driven tools both for main spindle and sub spindle, 5 Tornos MS-7 with 7-8 tool holders of which 5 are machine driven and finally 7 six-spindle Tornos SAS 16.6.

ROTEX customers are working in many different business areas such as electronics, telecom, fasteners, locks, venetian blinds and many others.

Our market is primarily Sweden, but we also have a significant export to Norway, Finland, Denmark, Latvia, Poland, the Netherlands, Germany, Czech Republic.
