## Smoke Detector Test Spray

### Secure testing of smoke detectors

WEICON Smoke Detector Test Spray is ideal for secure testing of optical or photoelectrical smoke detectors.

The use of smoke detectors in both private households and industry is getting more and more important.

Especially recommended is the installation in bedrooms since the sense of smell is deactivated while sleeping. Emergency exits and areas with a high risk of a fire, such as living rooms, should also be secured with a smoke detector.

The functioning of the smoke detector has to be tested on a regular basis. We recommend two inspections per year!

With WEICON Smoke Detector Test Spray, optical and photoelectrical smoke detectors can be tested in a quick and safe way, without the need of additional testing instruments.

### Smoke detectors save lives!

Characteristics and advantages of WEICON Smoke Detector Test Spray

- Safe and easy to use
- Gentle on electronic instruments
- Evaporation without residues
- Can content lasts for up to 150 applications
- Free of silicone

WEICON Smoke Detector Test Spray is suitable for professional and secure testing of smoke detectors!

## Smoke Detector Test Spray

### Secure testing of smoke detectors

To push the testing button is not enough. This often just connects the buzzer with the battery. Therefore only battery, buzzer and indicator light are tested. Furthermore testing should be performed with the aid of a candle, cigarette smoke or burning paper. The smoke detector could get dirty or even damaged.

#### Application areas

- Industrial plants
- Public facilities
- Private households

#### Instructions

Shake can before use and spray WEICON Smoke Detector Test Spray for about 5 seconds and with a distance of approx. 30 cm towards the smoke detector.

If there is no reaction, testing should be repeated. If there is still no reaction after several tests, the smoke detector is defective and must be replaced.

WEICON Smoke Detector Test Spray is NOT smoke in a can - it is an aerosol/atomised spray.

#### Packaging:

250 ml spray can  
Art.No.: 11640250-5

For up to  
**150**  
applications
