

Danish development and manufacturing of high quality weighing solutions.

Offshore Solutions

Electronic Weighing and Overload Sensor
NEW 2013 - STAINLESS STEEL

Stainless steel for offshore use.

Hydraulic hose that protects the cables.

Receive more information

Developed for offshore cranes and corrosive environments

- Weighing accuracy $\pm 1\%$ FS. Can be affected by the wire type.
- Combined weighing and overload system.
- Clamp-on. Easy to install. No change in the crane's mechanical construction.
- Reduced height. 140mm x 80mm.
- Available ex. Stock (DK).

Options:

- Hydraulic hose.
- Intensifier OL3000-230 w/relays.
- Remote control or display.

Also available in aluminium for non corrosive environments.

Vetec - Dynamometer with Handheld Display

Provides the highest possible accuracy.

Made of aluminium. The surface is treated with eloxed aluminum that makes it suitable for the harsh offshore environments.

Cabled and wireless version.

Waterproofed to IP66. IP67 as option.
