Features

Patented Mono-Body Housing

This feature is a TorcUP exclusive. The TU Series housing is machined from a single block of 7075 AQ Aluminum, which reduces torsion and flex on the body of the tool under pressure.

Dual Independent Swivels

The unique swivel design allows for 360 degree by 360 degree independent movement of the hoses to avoid any and all reaction points.

Push-Through Drive

The push-through square drive allows the user to switch easily from loosen to tighten without having to remove the drive.

Steel Reaction Boot

This feature protects the main reaction point of the arm and is field replaceable.

Laser Engraved Torque Chart

The dual sided shroud is laser engraved with the torque chart for the TU Series, preventing lost charts during use.

Reaction Arm Release Button

The release button for the reaction arm is set within the arm as a safety feature, protecting the arm from accidental disengagement.

No Drip Quick Connect Couplers

These 3:1 rated safety couplers are designed for simple engagement. The coupler collar ensures safe operation.

Accessories

TU Direct Hex Drive Adaptor

Replace the square drive of your TU tool with this hex drive adaptor to drive socket head cap screws

TU Extended Reaction Tube

Attach this reaction tube in place of the standard reaction arm when your reaction point is located further from the nut.

TU Housing Reaction Pad

The housing reaction pad provides a flat surface when reacting directly off the body of the tool

TU Reaction Arm Extension Boot

These boots, available for most models in 1", 2" or 3", provide additional reaction length at the base of the standard reaction arm.

TU Solid Long Extension Arm

Available for the TU-2, TU-3, TU-7 and TU-11 models, this solid reaction arm is 6" longer than the standard reaction arm of each tool, allowing for a further reaction point.

TU Tool Handle

This ergonomically designed handle for TorcUP hydraulic tooling can be attached to the tool for safe operation and positioning of the tool, while keeping hands clear of any reaction points.
