TECHNOFLEX Aluminum Housings

Today, there are thousands of TECHNOFLEX aluminum housings in service throughout the world. Together with our original. TECHNOFLEX flywheel coupling and our torsionally stiff DENTEX FL flywheel couplings, our aluminum housings tackle tough gas and diesel engine applications.

The housings take up very little space, while supporting a significant amount of weight. They are available With a wide variety of mounts and sensor options.

Design Characteristics:

Sturdy Aluminum Castings

Heat treated aluminum housings

Thick walls for extra support and thread engagement

Mounts

Foot mounts

Side mounts

Face Mounts

Top Mounts

Special pump mount options are always available

Features and Advantages:

- Sturdy .High-Strength . aluminum construction
- Custom fit to engine starter plates
