WELCOME TO BUILDING GREEN COPENHAGEN

Building Green is where building owners, architects and city planners meet with other changemakers to make the building industry more sustainable. The event is not only an exhibition with sustainable solutions but also a platform for knowledge-sharing with international keynotes, relevant debates, idea pitching and much more.

WHY COPENHAGEN?

After 7 years of Building Green events in Copenhagen, the interest of sustainable buildings and architecture continue to increase. The City of Copenhagen has high ambitions for becoming climate neutral and well-known for high liveability.

HISTORY

Building Green was established in 2011 and is a growing event in Scandinavia. Our goal is to illuminate the importance of sustainable buildings and architecture. The concept rests on high credibility and collaboration with leading organizations and media partners.

EXHIBIT

CONNECT WITH YOUR FUTURE CUSTOMERS

Join the exhibition with space for more than 160 exhibitors who are ready to present their sustainable solutions for the building industry. Here you can meet your new buyers and connect with decision makers who want to change business as usual.

SPECIAL SELECTED VENUE

Forum Copenhagen is a popular exhibition venue in central Copenhagen. Forum is known as the host for the Danish trade industry in general and a good match for Building Green. The venue is placed right by "Forum" Metro Station.

SUSTAINABLE SOLUTIONS

Building Green exists because of its trustworthiness and it is considered the merging platform within sustainable and energy efficient buildings. This is why visitors can expect to see only sustainable products and solutions in the exhibition.

TRUSTWORTHY PLATFORM

STATEMENTS FROM PREVIOUS EXHIBITORS

"Our sustainable house concept was met with a lot of positivity, enthusiasm and praise. All the preparations and efforts to make an impressive exhibition stand were certainly worth the hassle. We return with a larger network and much more knowledge about current solutions within sustainability", says

**Founder/Owner Maria Venø
Jakobsen from Jakobsen
Huse ApS**

"HauCon has exhibited at Building Green five times. The event stands out as being very popular and well attended. The vibe at the exhibition is great partly because of the seminars and many other activities. The visitors at our stand has been a good mix of architects, construction clients, engineers and students. It's valuable to meet our customers face to face, showcase our products in a different way and get insights about the industry from the visitors. We are already looking forward to next year",
says

**Tonny Petterson, Technical Manager
at HauCon**
