

NORDIC PRODUCT CATALOGUE

SAFETY SWITCHES, LOAD BREAK SWITCHES, SWITCH FUSES, DISCONNECTORS, ISOLATORS, TERMINALS

A FAMILY COMPANY FROM FINLAND PROVIDING SAFETY ON A GLOBAL SCALE

The history of KATKO dates back to 1938 when the brothers Kauko and Tauno Hyryläinen started their first company to repair car engines.

In 1946, after World War II, they started manufacturing electrical switches.

Already in 1959 Mr Kauko Hyryläinen created the modern-day switch fuse.

Today KATKO's products not only meet the highest quality requirements but are also designed to be environmentally friendly.

KATKO is a Finnish switch manufacturer with over 70 years of experience in designing and manufacturing load break switches and switch fuses.

Customers all over the world choose KATKO time and time again, because we offer them overall certainty. The quality of the switch itself combined with the accompanying service process delivers those essential aspects that differentiate us from the competition.

MORE THAN 80 YEARS OF INNOVATION AND QUALITY IN MANUFACTURING AND SERVICE

KATKO is a specialised manufacturer of modern load break switches. KATKO produces a wide range of load break switches, switch fuses, safety switches and motor protection switches as well as accessories for them - in its highly automated manufacturing facilities both in Finland and Poland. Our product portfolio also covers a full range of enclosed switches in polycarbonate, ABS, aluminium, stainless steel and sheet steel to match all EMC and ATEX specifications in whatever area. One of our strengths is our expertise in designing and producing modifications. KATKO switches are used in a broad spectrum of applications and industries – ranging from: Food Industry, Clean Air, Heavy Industry, Hazardous and Demanding Areas, Power Distribution to Renewable Energy - just a few areas where our switches are in use. More information in the catalogue.

KATKO's history dates back to 1938 when two brothers – Kauko and Tauno Hyryläinen – started their first company, which specialised in repairing automobile engines. In 1946, after World War II, the brothers started manufacturing electrical switches. In 1959 Kauko Hyryläinen introduced the modern switch fuse.

Since then our business has changed and expanded. KATKO has grown from a domestic player into a company that supplies products to most of the market areas around the world. Our global network covers more than fifty countries on six continents, and 70% of our production is exported. In addition to our headquarters and factory in Finland and a manufacturing company in Poland, we also have a sales and a marketing office in Dubai.

KATKO ensures the quality of its products by using independent, approved testing houses to guarantee that KATKO products comply with the current worldwide IEC, UL, EAC and CCC standards. KATKO products are designed to be environmentally friendly as well as to meet the highest quality requirements.

Long Tradition In Strong Partnerships

Today KATKO is a well-known brand in the electrical sector, with sales in six continents and over 50 countries. Throughout the years KATKO's goal has been to produce high-quality products and to deploy the latest technology in our factories – in Finland as well as in Poland.

Australia has been an important market for KATKO since the very first delivery in January 1988. As with many new markets it started out as small business, but since then Australia has grown to be one of KATKO's major market areas over the last 25 years. From the beginning KATKO and its Australian partners have innovated several successful switch products for the Australian and New Zealand markets. Those products have not only met the highest quality requirements but are also designed to be environmentally friendly.

This is the way we work, here in KATKO – through building partnerships. It requires hard work over a long time span, and is a subject to mutual interest, but it places the participants in a win-win situation - not only today but also in the next quarter, which in our case is at least 25 years. This will give all of us time to build a better world for our children, and give them the opportunity to make further improvements on standards of living.

Jukka Hyryläinen
CEO

FOOD INDUSTRY

**Food processing. Dairy.
Meat packing & processing. Beverage-making.**

KATKO is the main solution provider for the global dairy industry. Our clients choose KATKO for both food hygiene and work safety reasons. KATKO products are generally tailored in collaboration with the customer to suit their specific hygiene and performance needs: endurance of both cold and warm jet water sprays, all kinds of moisture, chemicals and detergents.

CLEAN AIR

**Air conditioning.
Warm air.**

Wherever warm or cool air is needed, KATKO is the choice. Intensive care units in hospitals rely on KATKO switches for their air supply. Work safety is always a top priority – with KATKO switches service personnel can depend on reliable disconnection.

HEAVY INDUSTRY

Metal Industry. Pulp. Paper.

KATKO solutions cover all fields of heavy industry. We have served Scandinavian pulp and paper companies for decades on end and have grown to be an essential part of the value chain for the widest spectrum of industries all around the world – ranging from metal manufacturing to water purification to strip mills.

HAZARDOUS AND DEMANDING AREAS

Mining. Oil. Gas. Fire. Marine.

Even the world's most demanding and hostile environments need to be switched on and off. KATKO delivers stainless steel casings and extra-strong handles for the mining industry in both the northern and southern hemispheres Finland and Australia. Our ATEX products serve high-risk areas and our RINA-certified marine product range was chosen for the world's largest passenger vessel.

POWER DISTRIBUTION

Standard panel. Switchgear.
Distribution boards.

KATKO power distribution products can be found everywhere from industrial premises to sports arenas, in apartment blocks and schools buildings, as well as in shopping centres. KATKO delivers the whole range of products from enclosed and open types of load break switches to 16-630A switch fuses, cable connectors and terminal blocks. KATKO products can be installed to suit your specific need with door interlock handles, direct handles or door mountings as well as other related accessories.

RENEWABLE ENERGY

Photovoltaics. Wind power. Recycling.

KATKO is working on new solutions for renewable energy – today's fastest growing area of energy production. Our Nordic operational environment is the perfect laboratory setting for our product development both because of the region's high-standard of research facilities and also because of its harsh and intensely varied climate.

KATKO'S EASY TO USE RANGE OF ENCLOSED SWITCHES

Polycarbonate (IP66) or ABS (IP65) enclosure.

Good resistance against UV and many chemicals. Available in grey/black or yellow/red.

Stainless steel screw fixing

Retained handle, you don't need to unscrew to remove the cover

Provision for 3 padlocks

5 cable entries:

M20 & M25 mm as standard on the top and bottom and M20 on the base. Knock-out glands are easy to open.

Neutral & earth terminals fitted on 3 pole switch. Only earth on 4 pole switch.

Door interlock with defeat mechanism

Self-extinguishing material and excellent insulating properties

Padlocking in OFF-position prevents access to the actuator.

Reliable position indication

Fully rated Load Break Switch. Breaking capacity of 8xAC23 rating. Back up fuse rating to match motor manufacturers recommendation

'Plug in' switch. Enables unplugging the switch for easy cabling

Retrofit 'snap on' auxiliary contacts.

No need to touch existing cabling.

Large cable terminals 1,5 - 16 mm², up to 25 ampere

Enclosure mounting screws (4,5 mm in diameter) isolated from the inside housing keeping the integrity of the IP65/IP66 rating.

IP / NEMA CLASSIFICATIONS OF PROTECTION

IP CLASSIFICATIONS		NEMA/UL CLASSIFICATIONS	
Ingress protection class of enclosures is according to IEC 60 529 given in form of IP classification, a two digit coding which is shown below.		The National Electrical Manufacturers Association (NEMA) is a US Manufacturers organisation. NEMA performance criteria and test methods are used by Underwriters' Laboratories as guidelines for investigation and listing of electrical enclosures.	
FIRST NUMBER Protection against solid objects IP	SECOND NUMBER Protection against liquids IP	NEMA	
0 No protection.	0 No protection.	1	Indoor use primarily to provide a degree of protection against contact with the enclosed equipment and against a limited amount of falling dirt.
1 Protected against solid objects up to 50mm eg accidental touch by hands.	1 Protected against vertically falling drops of water.	2	Indoor use to provide a degree of protection against limited amounts of falling water and dirt.
2 Protected against solid objects up to 12mm eg fingers.	2 Protected against direct sprays of water up to 15° from the vertical.	3	Outdoor use to provide a degree of protection against windblown dust, rain and sleet; undamaged by the formation of ice on the enclosure.
3 Protected against solid objects up to 2,5mm eg (tools + small wires).	3 Protected against sprays up to 60° from the vertical.	3R	Outdoor use to provide a degree of protection against rain and sleet; undamaged by the formation of ice on the enclosure.
4 Protected against solid objects up to 1mm eg (tools + small wires).	4 Protected against water sprayed from all directions - limited ingress permitted.	3S	Outdoor use to provide a degree of protection against windblown dust, rain and sleet; external mechanisms remain operable while ice laden.
5 Protected against dust - limited ingress permitted (no harmful deposit).	5 Protected against low pressure jets of water from all directions - limited ingress permitted.	4	Indoor or outdoor use to provide a degree of protection against splashing water, windblown dust and rain, hose directed water; undamaged by the formation of ice on the enclosure.
6 Complete protection against dust.	6 Protected against strong jets of water eg for use on shipdecks - limited ingress permitted.	4X	Indoor or outdoor use to provide a degree of protection against splashing water, windblown dust and rain, hose directed water; undamaged by the formation of ice on the enclosure. Resists corrosion.
	7 Protected against the affects of immersion between 15cm and 1m.	6	Indoor or outdoor use to provide a degree of protection against the entry of water during temporary submersion at a limited depth; undamaged by the formation of ice on the enclosure.
	8 Protected against long periods of immersion under pressure.	6P	Indoor or outdoor use to provide a degree of protection against the entry of water during prolonged submersion at a limited depth.
	9K Protected against close-range high pressure, high temperature spray downs.	11	Indoor use to provide by oil immersion a degree of protection of the enclosed equipment against the corrosive effects of corrosive liquids and gases.
		12/12K	Indoor use to provide a degree of protection against dust, falling dirt and dripping noncorrosive liquids.
		13	Indoor use to provide a degree of protection against dust, and spraying of water oil and noncorrosive coolants.

SWITCHES ACCORDING TO IEC 60 947-3.

SWITCH

A mechanical switching device capable of making, carrying and breaking currents under normal circuit conditions which may include specified operating overload conditions and also carrying for a specified time currents under specified abnormal circuit conditions such as those of short circuit.

Note: A switch may be capable of making, but not breaking, short-circuit currents.

DISCONNECTOR

A mechanical switching device which, in the open position, complies with the requirements specified for the isolating function.

Disconnecter: (working definition) device without on-load making and breaking capacity.

SWITCH DISCONNECTOR / LOAD BREAK SWITCH

A switch capable of making, carrying and breaking currents under normal circuit conditions and which, in the open position, complies with the isolating requirements specified for a disconnector.

SWITCH DISCONNECTOR FUSE

A switch-disconnector in which one or more poles have a fuse in series in a composite unit.

UTILIZATION CATEGORY

Utilization category Use / Application

AC-20	Connecting and disconnecting under no-load.
AC-21	Switching of resistive loads including moderate overloads
AC-22	Switching of mixed loads, inductive and resistive loads including moderate overloads
AC-23	Switching of motor loads or other highly inductive loads

PROTECTION AGAINST OVERVOLTAGE

U_{imp} (Impulse withstand voltage) defines the device's use in abnormal network conditions with overvoltage due to lightning on overhead wires etc.

This characteristic also defines the device's dielectric quality.

Overvoltage protection is ensured by choosing the equipment according to U_{imp} . The 4 impulse withstand categories of use at 400V / 690V (IEC 60 364-4-44) are:

Category	U_{imp}	Applications
1	2,5 kV	specially protected equipment
2	4 kV	Portable tools, motors, etc.
3	6 kV	Equipment placed in distribution networks
4	8 kV	Equipment placed at the head of an installation.

The U_{imp} rating for most of the Katko switches is 8 kV.

INSTALLATION ENVIRONMENT TEMPERATURE

To assure the best of operation of KATKO switches the ambient air temperature of installation environment should be in the range of -40°C to + 60°C.

When the ambient temperatures exceed +40°C, the maximum load of the switch may have to be derated. Please contact KATKO for assistance.

CONFORMITY TO STANDARDS

Katko switches are designed to comply with both national and international standards.

-Switches tested acc. to IEC 60 947-3 / 690V
-AC 23 / 690V ratings
-50 kA R.M.S values
-CCA, CB certificates
-UL, cUL listed (UL 508)
-Fuse holder acc. to IEC 60 269 / UL 512

ENCLOSED SWITCHES 10 - 1000A SAFETY SWITCHES

• Enclosures:

Polycarbonate / ABS (KUM)	IP66/IP65
Sheet steel (KUT)	IP65/IP55
Aluminium (KUA)	IP66
Stainless steel (KUR)	IP66/IP65

- Tested according to IEC 60 947-3 and UL 508 (polycarbonate 25-150A)
- CB certificates
- Comply with ISO 9001 and ISO 14001
- AC-23, 690V ratings
- R.M.S values 50 kA
- Multiple break with silver rivets
- Airgap 12,5 mm
- Door interlock
- Lockable handle
- Reliable position indication
- Standard grey/black
- Standard models 3P, 4P, 6P and 8P
- 1P and 2P available

KUM 316 VT1.V

KATKO SWITCHES - FOR HEAVY DUTY

- Superior life span even in most demanding environments such as papermills, chemical plants, steelworks and food processing plants.

•

EASY TO INSTALL

- Retrofit snap-on auxiliary contacts
- Flexible installation, incoming and outgoing cables for example:

a) VT1.V: In from the top, out from the bottom of the enclosure

b) YVT1.V: In- and outgoing cables from the top of the enclosure

c) AVT1.V: In- and outgoing cables from the bottom of the enclosure

NOTE: When ordering switches with ampere rating 200A or higher, please mention the intended cabling directions if other than shown in a).

POLYCARBONATE ENCLOSED SAFETY SWITCHES 10-630 A

- IP 66; Enclosure types U2, U3, U4
- IP 65; Enclosure types MFO1, MFO3, MFO4
- Self-extinguishing material
- Wide operating temperature range
- Padlockable
- Excellent insulating properties
- Good UV resistance
- Good resistance against many chemicals
- Over 80 A: Cable entries must be declared when ordering

With auxiliary contact type: KUM __U1.V
[Aux.type KU1.V]

US-models 1NO with auxiliary contacts

Switch delivered with following cable glands:

Type	A	Cable glands	Cable size mm
KUM	16	M25	11-17
KUM	25	M25	11-17
KUM	32	M32	15-21
KUM	40	M32	15-21
KUM	63	M32L	18-25

EMC-PROTECTED SAFETY SWITCHES 16-1000 A

- Tested according to EMC EN 61000-6-3:2007+A1(2011) with EMC- glands shielded power cable
- Padlockable
- EMC cable glands included
- Available as 3-, 4-, 6- or 8-pole version
- Over 80 A: cable entries must be declared when ordering
- KUR switches available up to 1000 A
- Sheet steel enclosure dimensions on page 22
- Stainless steel enclosure dimensions on page 18
- Also available as stainless steel IP69K, see page 21

STAINLESS STEEL ENCLOSED SAFETY SWITCHES 25-1000A

- IP 66; Enclosure types H23, H32, H02 (AISI 316)
- IP 65; Enclosure types H03, H04, H06, H07 (AISI 316 or AISI 304)
- To environments where hygiene and corrosion resistance are important
- Meets AISI 316 requirements (acid proof) or AISI 304 (stainless steel)
- Padlockable
- Over 80 A: cable entries must be declared when ordering
- Available as EMC (1000A), EX (250A) or EMC/EX (250A) protected

STAINLESS STEEL ENCLOSED SAFETY SWITCHES / ISOLATORS IP69K 16 - 80A

- IP69K rating
- LK11 handle (Black or yellow/red)
- Where hygiene and good protection against corrosion are required
- Padlockable
- Door interlock with defeat mechanism

SHEET STEEL ENCLOSED SAFETY SWITCHES 80-1000A

- IP 65; Enclosure types TR02, TR03, TR04, TR05, TR06, TR07
- Material: steel plate
- Electrophoretic coating
- Surface finishing by powder coating
- Good corrosion resistance
- Padlockable
- Cable entries must be declared when ordering

ALUMINIUM ENCLOSED SAFETY SWITCHES 16-80A

- IP 66 [IP 67 available]
- Wide operating temperature range
- Good resistance against many chemicals
- Good UV resistance
- Excellent for hard weather conditions
- Padlockable
- Available with auxiliary contacts

ATEX SAFETY SWITCHES 16-160 A

- ATEX cable glands included
- Conforming to Directive 2014/34/EU, EN 60079-0 (2012), EN 60079-31 (2014)
- Suitable for use in Zone 22
- Category 3
- IP66
- Frontal impact test of 7J
- Operating temperature -20°C - +40°C
- Padlockable
- II 3D Ex tc IIC T65°C Dc
VTT 07 ATEX 038X
- Over 80 A: cable entries must be declared when ordering
- Available as EX/EMC version

SIDE OPERATED SWITCHES

POLYCARBONATE ENCLOSED 16A - 25A

- Easy to install
- IP67
- Good UV resistance
- Good resistance against many chemicals
- Self-extinguishing material
- Enclosure can be sealed in any position
- Handle sealable to on-position
- Padlockable handle to off-position
- Membrane gasket cable entries with strain relief as standard (2 x 20mm top and bottom, 2 x 15mm bottom)
- Also available with M20 cable glands
- Available as 2, 3, 4P and with auxiliary contact (S)
- AC-23 400V 16A-25A
- Terminal blocks 1,5mm²- 16mm²
- Grey enclosure, black handle

SIDE OPERATED SWITCHES POLYCARBONATE AND ALUMINIUM ENCLOSED 16-25A

POLYCARBONATE 25 A: (KE 325M)

- IP66
- AC-23 690V, 25 A, 3- and 4-P
- Self-extinguishing material and excellent insulating properties
- Cable entries: 2 x M20/M25 as standard on the top and bottom and M20 on the base
- Black / Grey, Yellow/ Red (Y/R)

ALUMINIUM 25 A: (KE 325A)

- IP66
- AC-23 690V, 25 A, 3- and 4-P
- Excellent for harsh conditions
- Cable entries: 2x M25 + 1x M16 as standard on the top
- Black / Grey, Yellow/ Red (Y/R)
- Available with EMC cable glands

CHANGE-OVER SWITCHES 25-160A

- Sheet steel or aluminium enclosed change-over switch-consists of two KU or VKA switches connected by a change-over kit
- Also available with appliance receptacles
- Products TKM 325U VV and TKM 425U VV include a polycarbonate enclosed CAM switch
- IP 66, IP 65
- Padlockable

FIRERATED ALUMINIUM ENCLOSED SAFETY SWITCHES 16-200A

- F200 3H (FR) / F300 2H (FR3)
- IP66 enclosure models: A2, A3
- IP65 enclosure models: A4, A5
- Padlockable
- Good UV resistance
- Good resistance against many chemicals
- Excellent for hard weather conditions
- Also available as EMC-version
- Also available with auxiliary contact

KATKO Firerated switches at Keilaniemi metro station in Espoo, Finland

MOTOR CONTROL SWITCHES (CAM SWITCHES) POLYCARBONATE AND ALUMINIUM ENCLOSED 25A

- IEC 60 947-3
- Rated thermal current (I_{th}) 40A
- IP 66
- Padlockable
- Terminals: Cu 1,5 - 6mm²
- Max. terminal torque 1,8 Nm
- Also available with an auxiliary contact

LOAD BREAK SWITCHES 16-630 A ROTARY AND TOGGLE SWITCHES TECHNICAL DATA

ASSEMBLY EXAMPLE

LK10 handle

L=200 AD11 extension shaft

“Snap-on” Auxiliary contact

4-pole KU switch

General information:

KATKO's load break switch series consists of KU- and VKA-series rotary switches as well as KUE- and EVA-series toggle switches. KU- and KUE-series cover ampere range of 16A - 160A, VKA 250A, EVA 125A - 250A, and rotary switch VKE 125A - 630A, and KU 630-800A. Greater, 1000A - 3150A switches are available on demand.

Certificates:

CCA, CB
ISO 9001

Features:

- Compact size
- DIN-rail mounting
- Double break with silver rivets
- 12.5 mm air gap in open position
- AC-23, 690 V
- 50 kA RMS
- Position indicator
- Snap-on auxiliary contacts
- Adjustable shaft
- Door interlock
- Lockable handles (IP65 & IP67)
- Load break (will break at least 8xAC-23 current)

LOAD BREAK SWITCHES ROTARY SWITCHES KU 16-125A

- Compact size
- DIN-rail mounting
- 3-pole and 4-pole KU-switches as standard
- 2-pole upon request
- 6-pole and 8-pole versions consist of two 3-pole or 4-pole KU-switches connected by a parallel kit
- Switch technology by means of silver contacts ensures safe and durable operation
- 4-pole versions with early-make and late-break neutral pole
- Compatible with handles LK10 and LK11
- Shafts L=100/200/300 AD11 and L=100/200/300 AD11/VT

LOAD BREAK SWITCHES 100-160 A ROTARY SWITCHES, KU SERIES

- Modular design
- DIN-rail mounting
- 3- and 4 pole switches as standard
- 6- and 8 pole switches consist of two 3- or 4 pole switches and a parallel kit
- Advanced silver contacts guarantee safe and durable use
- Compatible with handles LK10, LK11(3 and 4 poles) and LK12 (6 and 8 poles and change-over switch)
- Shafts: L=100/200/300 AD11 and L=100/200/300 AD11/VT (3 and 4 poles), L=100/200/300 AD12/VT (6 and 8 poles and change-over switch)

3 and 4 poles

Auxiliary contact

All KVKE switches are available with the neutral links specified on the right. Product code example:

¹⁾ KVKE 63-630A mounting in horizontal position:
Derating 0% in ventilated enclosure, ambient temperature ≤ 40 °C
Derating 5% totally enclosed (KVKE 63-400A)
Derating 8% totally enclosed (KVKE 630A)

Switched neutral (all standard 4P switch fuses)

Solid neutral, NT

Fused switched neutral, F

Detachable neutral, NL

SWITCH FUSES 20-160 A

KVKE

KVKE 20-32 A

- DIN- & BS- fuse versions
- DIN-rail and screw base mounting as standard
- Available as 3-pole and 4-pole version, 1-pole and 2-pole versions on request
- Handle LK10 and shaft L=180 mm included
- Fuse covers included
- Handle also available as Yellow/Red
- Compact size saves space
- Modular structure enables position of drive mechanism to be varied, mention when ordering
- Auxiliary contacts are easy to install
- Available with fuse- and terminal covers
- Available as 1-,2-,3- and 4-pole
- DIN & BS fuse versions
- Four breaking points per phase
- Connecting silver rivets have a silver alloy 350 um thick, thus ensuring a long life expectancy and safe use in demanding conditions

63-160 A includes handle LK12 and shaft L=220

200-630 A includes handle LK14 and shaft LVK=228

KVKE 63-160 A

Technical drawings of the 1000 Series LED strip light fixture showing front, side, and top views with dimensions:

- Front View:** Total width 108, mounting hole spacing 27, LED strip width 65, mounting hole diameter 4.6, and mounting bracket height 54.
- Side View:** Total depth 125, mounting hole spacing 27, LED strip width 82, mounting hole diameter 4.6, and mounting bracket height 54.
- Top View:** Total width 91.5, mounting hole spacing 102, and mounting bracket height 35.5.

Utilization category	Typical applications
DC-20	Connecting and disconnecting under no-load conditions
DC-21	Resistive loads, including moderate overloads
DC-22	Mixed resistive and inductive loads, including moderate overloads (e.g. shunt motors)
DC-23	Highly inductive loads (e.g. series motors)

Utilization category	Typical applications
DC-PV0	Opening and closing a PV circuit to provide disconnection when no current is flowing.
DC-PV1	Connecting and disconnecting single PV string(s) where reverse currents and significant overcurrent cannot occur.
DC-PV2	Connecting and disconnecting PV circuits where significant overcurrents may prevail and where current flow can be in both directions; for example, where several strings are connected in parallel and to the same inverter, or, one or more strings with a battery.

PHOTOVOLTAICS/ DC-SWITCHES

- 32A 1200V DC, DC21B, 400A 1500V DC, DC21B, and 32A 1000V DC, PV2
- Compact size DC load break switch (PV)
- 1, 2, 3 and 4-pole versions
- Compatible with LK10 handle
- Shafts: L=100/200/300 AD11
- Handle padlockable to O-position
- LK10 with door interlock with defeat mechanism

PHOTOVOLTAICS/ DC-SWITCHES

- Up to 32A 1200V DC, DC21B and 32A 1000V DC, PV2
- Available in Polycarbonate and Aluminium enclosures
- IP 66; Enclosure types U2 (PVM) and A2 (PVA)
- Self-extinguishing material
- Wide operating temperature range
- Padlockable
- Door interlock with defeat mechanism
- Excellent insulating properties
- Good UV resistance
- Good resistance against many chemicals

- 1NO+1NC
- 2NO+2NC
- For KU, VKA and VKE switches
- For KVKE switch fuses
- Available with door mounting kit (OKA) with black or yellow/red handle (Y/R)
- 16 (4) A 250 VAC (EN 61058-1)

ACCESSORIES

CHANGE-OVER KIT KU3/4P VV

- Compact design for 2 KU-switches (16-125 A, 3-4 poles)
(Example: KU 463VV)
- Fast and easy to install
- Available with black or red direct handle (Y/R)
- Compatible with LK12 1-O-2 handle and L=100/200/300 AD12/VT shaft
- Compatible with auxiliary contact VV 1.V (two can be mounted)

CHANGE-OVER KIT VV 1-O-2

- For two KU/VKA switches (16-160 A)
- Available with black or yellow/red handle (Y/R)
- Includes handle and shaft
- Compatible with auxiliary contact VKA 1.V & VKA 2.V

Type	For	Description	EAN code 6419410...	E-NO

ACCESSORIES EARTHING PLATES

- Provides earthing for shielded cables in KATKO's U2 & U3 polycarbonate enclosures.
- Material: Copper

UL98 LISTED DISCONNECT SWITCHES 60-100 A

- General use rating 60 - 100 A / 600VAC
- Lockable to off-position
- Modular design
- Switching speed is independent of the operator
- Silver contacts ensure safe and durable operation
- Suitable for use on a circuit capable of delivering 50kA rms symmetrical, 600 Vac when protected by Class J, 60A/ 100A fuse.
- Also available as 6 or 8 pole switch, or as 3 or 4 pole change-over switch

3/4 pole switch with covers

EMC PROTECTED ENCLOSED SWITCHES 16-150 A

- Electromagnetic compatibility ensures safe operation in environments with electromagnetic disturbance
- Tested according to EN 55011 with EMC glands shielded power cable
- Nema Type 4X: U2, U3, MF10, MF11, H23/T, H32/T enclosures
- Nema Type 4: A2, A3, TR007 enclosures
- Up to 150A/75HP/600V
- Easy to install auxiliary contacts
- Padlockable
- Also available as 4-, 6- and 8-pole versions
- EMC cable glands included

KU DISCONNECTORS 16-63 A

- Rotary switch with direct or extended handle
- UL 60947-4-1A
- CCA, CB certificates
- ISO 9001
- Compact size
- DIN-rail mounting
- Switch technology by means of silver contacts ensures safe and durable operation
- Extended handle version compatible with handles LK10UL, LK11UL and shafts L=100/200/300 AD11, L=100/200/300 AD11/VT
- Direct handle version compatible with front plates K/KU
- Easy to install auxiliary contacts

VKA DISCONNECTORS 80-150 A

- Rotary switch with direct or extended handle
- UL 60947-4-1A
- CCA, CB sertifiikaatit
- ISO 9001
- Compact size
- Switch technology by means of silver contacts ensures safe and durable operation
- Extended handle version compatible with handles LK10UL, LK11UL and shafts L=100/200/300 AD11, L=100/200/300 AD11/VT
- Direct handle version compatible with front plates K/VKA

KKV SWITCH FUSE 32 A

- UL 60947-4-1A
- CCA, CB certificates
- ISO 9001
- 3-4-pole
- Consists of a KU-switch and a fuse holder
- For KKV 332:10 x 38 fuses
- KKV 332 CC: CC-fuse version
- Compatible with LK10UL and LK11UL handles, and L=100/200/300 AD11 & L=100/200/300 AD11/VT shafts

TERMINAL BLOCKS

- Suitable for Al/Cu cables: 1.5 - 240 mm²
- Available in grey, blue (N) and yellow/green (PE)
- Touchproof, IP20
- Certified according to IEC 61238-1 Class A
- Housing and cover in polyamide
- Terminal material tin-coated, greased aluminium
- KC-terminals 16 - 35 mm² for DIN-rail mounting
- KL-terminals 50 - 240 mm² for DIN-rail or base mounting
- Environmentally friendly materials

POLYCARBONATE AND STAINLESS STEEL ENCLOSED TERMINAL BLOCKS

- Suitable for 1.5[Cu] / 2.5[Al] - 240 mm² Al/Cu cables
- Material: tin-coated aluminium
- IP66: U3, U4, H32, H02; IP 65: MF01, MF03, H03
- All models include:
 - L1, L2 ja L3 terminal blocks, grey (single or double)
 - N- terminal block (single or double)
 - PE -terminal block (single or double)
- Environmentally friendly materials
- Cable glands included

CABLE CONNECTORS

- Suitable for 1.5-240 mm² Al/Cu cables:
- Material: tin-coated aluminium
- In accordance with VDE 0220 part 1/11.71 and 2/11.71,
- SEN 24 50 12, SFS 2663 and IEC 61238-1
- Environmentally friendly materials

CONDITIONS OF SALE

1. Validity

These conditions are subject to any special stipulations set out by KATKO Oy (hereinafter "Katko") in the Agreement documents. The said conditions and stipulations shall prevail unless otherwise agreed in writing.

2. Specifications

All quotations for goods are made in accordance with Katko's specifications at the time of order.

3. Price

Katko reserves the right to undertake reasonable price adjustments in case of fluctuation of cost with two (2) months notice (unless otherwise agreed in written). The adjustment will be applied also to orders already received and confirmed, if the confirmed delivery time is longer than two (2) months. Any change of the prices shall be notified to the Distributor by registered letter, fax or e-mail.

4. Delivery

Unless otherwise agreed, deliveries shall be ex-works, Vantaa in accordance with Incoterms 2010. Where the Distributor fails to give Katko adequate instructions for dispatch, or otherwise delays delivery, Katko shall be entitled to store, dispose of or reallocate the goods without being responsible for any loss and at its option to charge for any costs arising and/or to cancel the order.

5. Force Major

Katko shall not be under any liability in respect of any delay in delivery arising from Force Major including but not limited to industrial or labour disputes, riots, mobs, fires, floods, wars, civil strife, embargoes, shortages of labour, materials, power, fuels, or means of transportation, whether affecting the Company of any subcontractor, or for circumstances caused by reasons of law, regulations or orders and lack of permission of any government or competent Authority. Any delay caused by such conditions shall be excused and Katko may claim extension of time for as long as such conditions continue. During the period in which delivery of the goods cannot be made for any above-mentioned reason the Distributor shall be entitled, after giving Katko written notice of its intention to do so, to purchase elsewhere at his own cost and risk and Katko shall not be obliged to make up deficiencies which have arisen as aforesaid. If a delay exceeds three months Katko and the Distributor may cancel the Agreement without incurring any liability therefor.

6. Payment

a. Unless otherwise agreed, the Distributor shall make full payment in Euro to Katko by confirmed and irrevocable documentary credit (L/C) payable at sight in Helsinki.

b. Katko charges interest for late payment, amounting to one and one half per cent (1 and 1/2%) per month for any unpaid amount from the date such payment is due.

7. Claims

No claim for shortage or damage will be considered unless received in writing by Katko within 14 days from receipt of the goods at their destination.

8. Guarantee

Katko shall at its option replace at its own cost any goods which on arrival, fail or are found defective, provided that the goods are returned to Katko's designated factory freight prepaid, and Katko is informed immediately, the failure or the defect becomes apparent and the same is shown to Katko's reasonable satisfaction to be due to its faulty workmanship or defective materials.

No other warranties, express or implied, are made or will be deemed to have been made by Katko and Katko neither assumes nor authorises any other person to assume for it any other obligations or liabilities in connection with the distribution and sale of the products or otherwise. This condition shall replace and exclude all common law or statutory warranties, undertakings, statements, representations or conditions whether express or implied. Katko shall not be liable in contract or tort for any indirect, consequential or economic loss (whether relating to quality, despatch, and delivery or otherwise).

The Distributor will assume responsibility for and hold and save Katko harmless from all claims (including but not limited to claims resulting from acts of negligence on the part of the Distributor), liabilities, demand, costs or expenses or the like which may be incurred. The Distributor shall maintain during the term of this Agreement adequate insurance to cover its obligations under these conditions.

9. Copyright and confidentiality

The copyright in all Katko documents (including drawings and art work) furnished to the Distributor shall at all times remain vested in Katko and neither the documents nor their contents shall be used without Katko's express written consent for any purpose other than that for which they were furnished.

10. Taxes, duties, fees, charges

The quoted price is exclusive of all taxes, duties and fees and charges of any kind in the country of destination. Such taxes, duties, fees and charges are payable by the Distributor.

11. Forbearance

Katko's rights shall not be affected or restricted by any indulgence or forbearance to the Distributor.

12. Orgalime S 2000

Orgalime S 2000 "General Conditions for the Supply of Mechanical, Electrical and Electronic products" (hereafter Orgalime S 2000) shall apply if not otherwise agreed in the Agreement documents or determined in these conditions. Therefore, should there be a conflict between these conditions and Orgalime S 2000, these conditions shall prevail.
