

WATERJET CUTTING

HARALD PIHL is a family owned company founded in 1912 and has supplied metals into various industries/markets for over a century.

We are one of Europe's largest stockholders of special alloys and titanium.

We supply material from all over the world. All accredited by international renowned certification agencies. Certified material is supplied according to international standards valid for the material in question (ASTM, ASME, AMS, UNS, NACE and NORSOK to name some).

We supply in to, among other markets; industrial, medical, aerospace, automotive, Oil/Gas/Subsea and processes industry all over the world.

HARALD PIHL has offered waterjet-cutting (WJC) to customers all over the world for over 5 years. By combining our extensive knowledge in special alloys and titanium together with our WJC service, the customer gets a complete service throughout the whole process where the customer can buy both the material and the WJC directly from our warehouse.

Why you should purchase WJC from HARALD PIHL

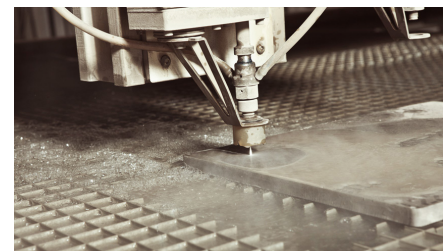

- We draw your parts directly to our CAD system. Our specialists are good in nesting and plate optimizing resulting in competitive prices to you
- Materials and waterjet cutting in same facility provides you a flexible and fast delivery
- Narrow tolerances up to (+/- 0.15mm)
- Customized cutting-qualities

We stock, among other materials

Titanium and Nickel-alloy sheets/plates in a wide range of dimensions and can process materials up to 2,5x4m in width/length and up to 70mm in thickness.

Sheets/Plates we have in stock

- Titanium grade 1,2 and 5
- Nickel 200/201
- Nimonic 263, 75, 90
- Monel 400
- Inconel C-276, 600, 601, 625, 718, C-22
- Incoloy 825, 800H/HT, DS

If this sounds interesting for you or if you have any questions regarding this service, do not hesitate to contact our WJC organization.
