

Traiload Onboard Weighing Device with a high visibility display on agricultural trailer.

OVERLOAD PREVENTION AND COLLECTION CONTROL

With Traiload you prevent the overloading and avoid fines. Moreover it helps you to control the harvest quantity and transported/ carried product in order to perform economic evaluations on the tonne carried. Easy to install, the Traiload can be fitted on the trailer with air, water and mechanical suspensions without modifying the frame of the trailer; you can do the installation on your own or we do it at your site and in a day the control will be added to your work.

Fitted directly on the trailer, Traiload guarantees efficiency to your transport.

**2**

Pressure sensors to establish the suspensions pressure or, depending on the cases, flexion sensors on the axles.
