

TRUE CRAFTSMANSHIP ENDURES

REFRACTORY SOLUTIONS
CONSTRUCTION, INSTALLATION AND MATERIAL SALES

Zampell is your total supplier of refractory solutions

Zampell offers you the complete solution – from the initial advisory phase, construction, and installation to subsequent service and maintenance. We work closely with you to fulfill the task and maintain constant dialogue, allowing us to be alert and on top of your wants and needs at all times.

Zampell is an international organization, headquartered in the United States. We have more than 50 years of experience in calculating and installing refractory constructions in a wide range of industries.

Zampell A/S in Denmark consists of two departments, in Jutland and Zealand. We cover the whole country and carry out projects in large parts of Europe. We are part of Zampell's European operations, which includes a UK Zampell installation Division and the Vulcan Refractories manufacturing company. Vulcan manufactures a wide range of customized refractory fired shapes with special high-temperature properties. As part of a larger international organization, we are able to share knowledge across the countries and thereby continuously developing our techniques and range of materials.

As a customer at Zampell A/S, you get refractory service that lasts – every time.

SAFETY ABOVE ALL

We are in the front line when it comes to safety, in relation to both our employees and customers. Health and safety in the workplace are key considerations, and we operate in accordance with approved safety statements and risk assessments. As a result of this, we boast a green smiley for our work environment.

Scan the code if you want to know more about our international safety policy.

We offer all types of materials for refractory constructions, from anchoring and insulation to bricks and castables as well as custom-made wear parts.

We design refractory solutions in close cooperation with our customers, perform temperature calculations and advise on materials selection.

We develop and produce precast items that are dried and ready for operation.

We make complete refractory linings on new installations and perform repair, service and maintenance on existing ones.

Our fitters participate actively in planning and performing tasks in collaboration with third parties on-site.

We prepare service reports and offer advice on maintenance.

We strive to deliver the same high quality and service on tasks both large and small.

YOUR MATERIAL SUPPLIER

We work closely with a number of manufacturers of high-temperature products and are distributors of castables from HASLE Refractories and insulation materials from Skamol in Denmark.

AREAS OF EXPERTISE

- *Insulation of high-temperature furnaces and boilers of any size and type*
- *High-temperature solutions for optimal combustion in waste-to-energy plants and biomass boilers*
- *Installation and maintenance of linings in rotary kilns*
- *Refractory lining and wear parts in industrial and process plants*
- *Servicing of flue-gas cleaning systems*
- *Crematorium and special furnaces, for example brickworks*
- *Design, manufacture, and sales of precast items*
- *Sales of refractory bricks and castables, fibre or block insulation*
- *Corundum and glass blowing of turbines and sandblasting of boilers*
- *Servicing of marine boilers*
