High Production Airless Sprayers Designed Specifically to Spray-Apply Chemicals to Sanitise, Disinfect and Deodorise Faster

These units are built with materials and components compatible with the harsh chemicals* used to eliminate traces of viruses such as COVID-19 on surfaces.

Sanitising surfaces needs to be done safe & efficient.

Use our SaniSpray HP20 and be assured that any surface is completely covered with disinfecting liquid, from edge to edge. With this sprayer you apply a 100% consistent coat of the right amount of disinfectant material on the complete surface you need to disinfect.

FINISH YOUR SANITISING, DISINFECTING AND DEODORISING JOBS FAST

- Perfect for areas that require maximum portability
