

**NEW  
BRC-PRO™**

”

True example of how innovation and thinking in modularity can help bring down CAPEX investment for wind turbine blade handling when launching new types.

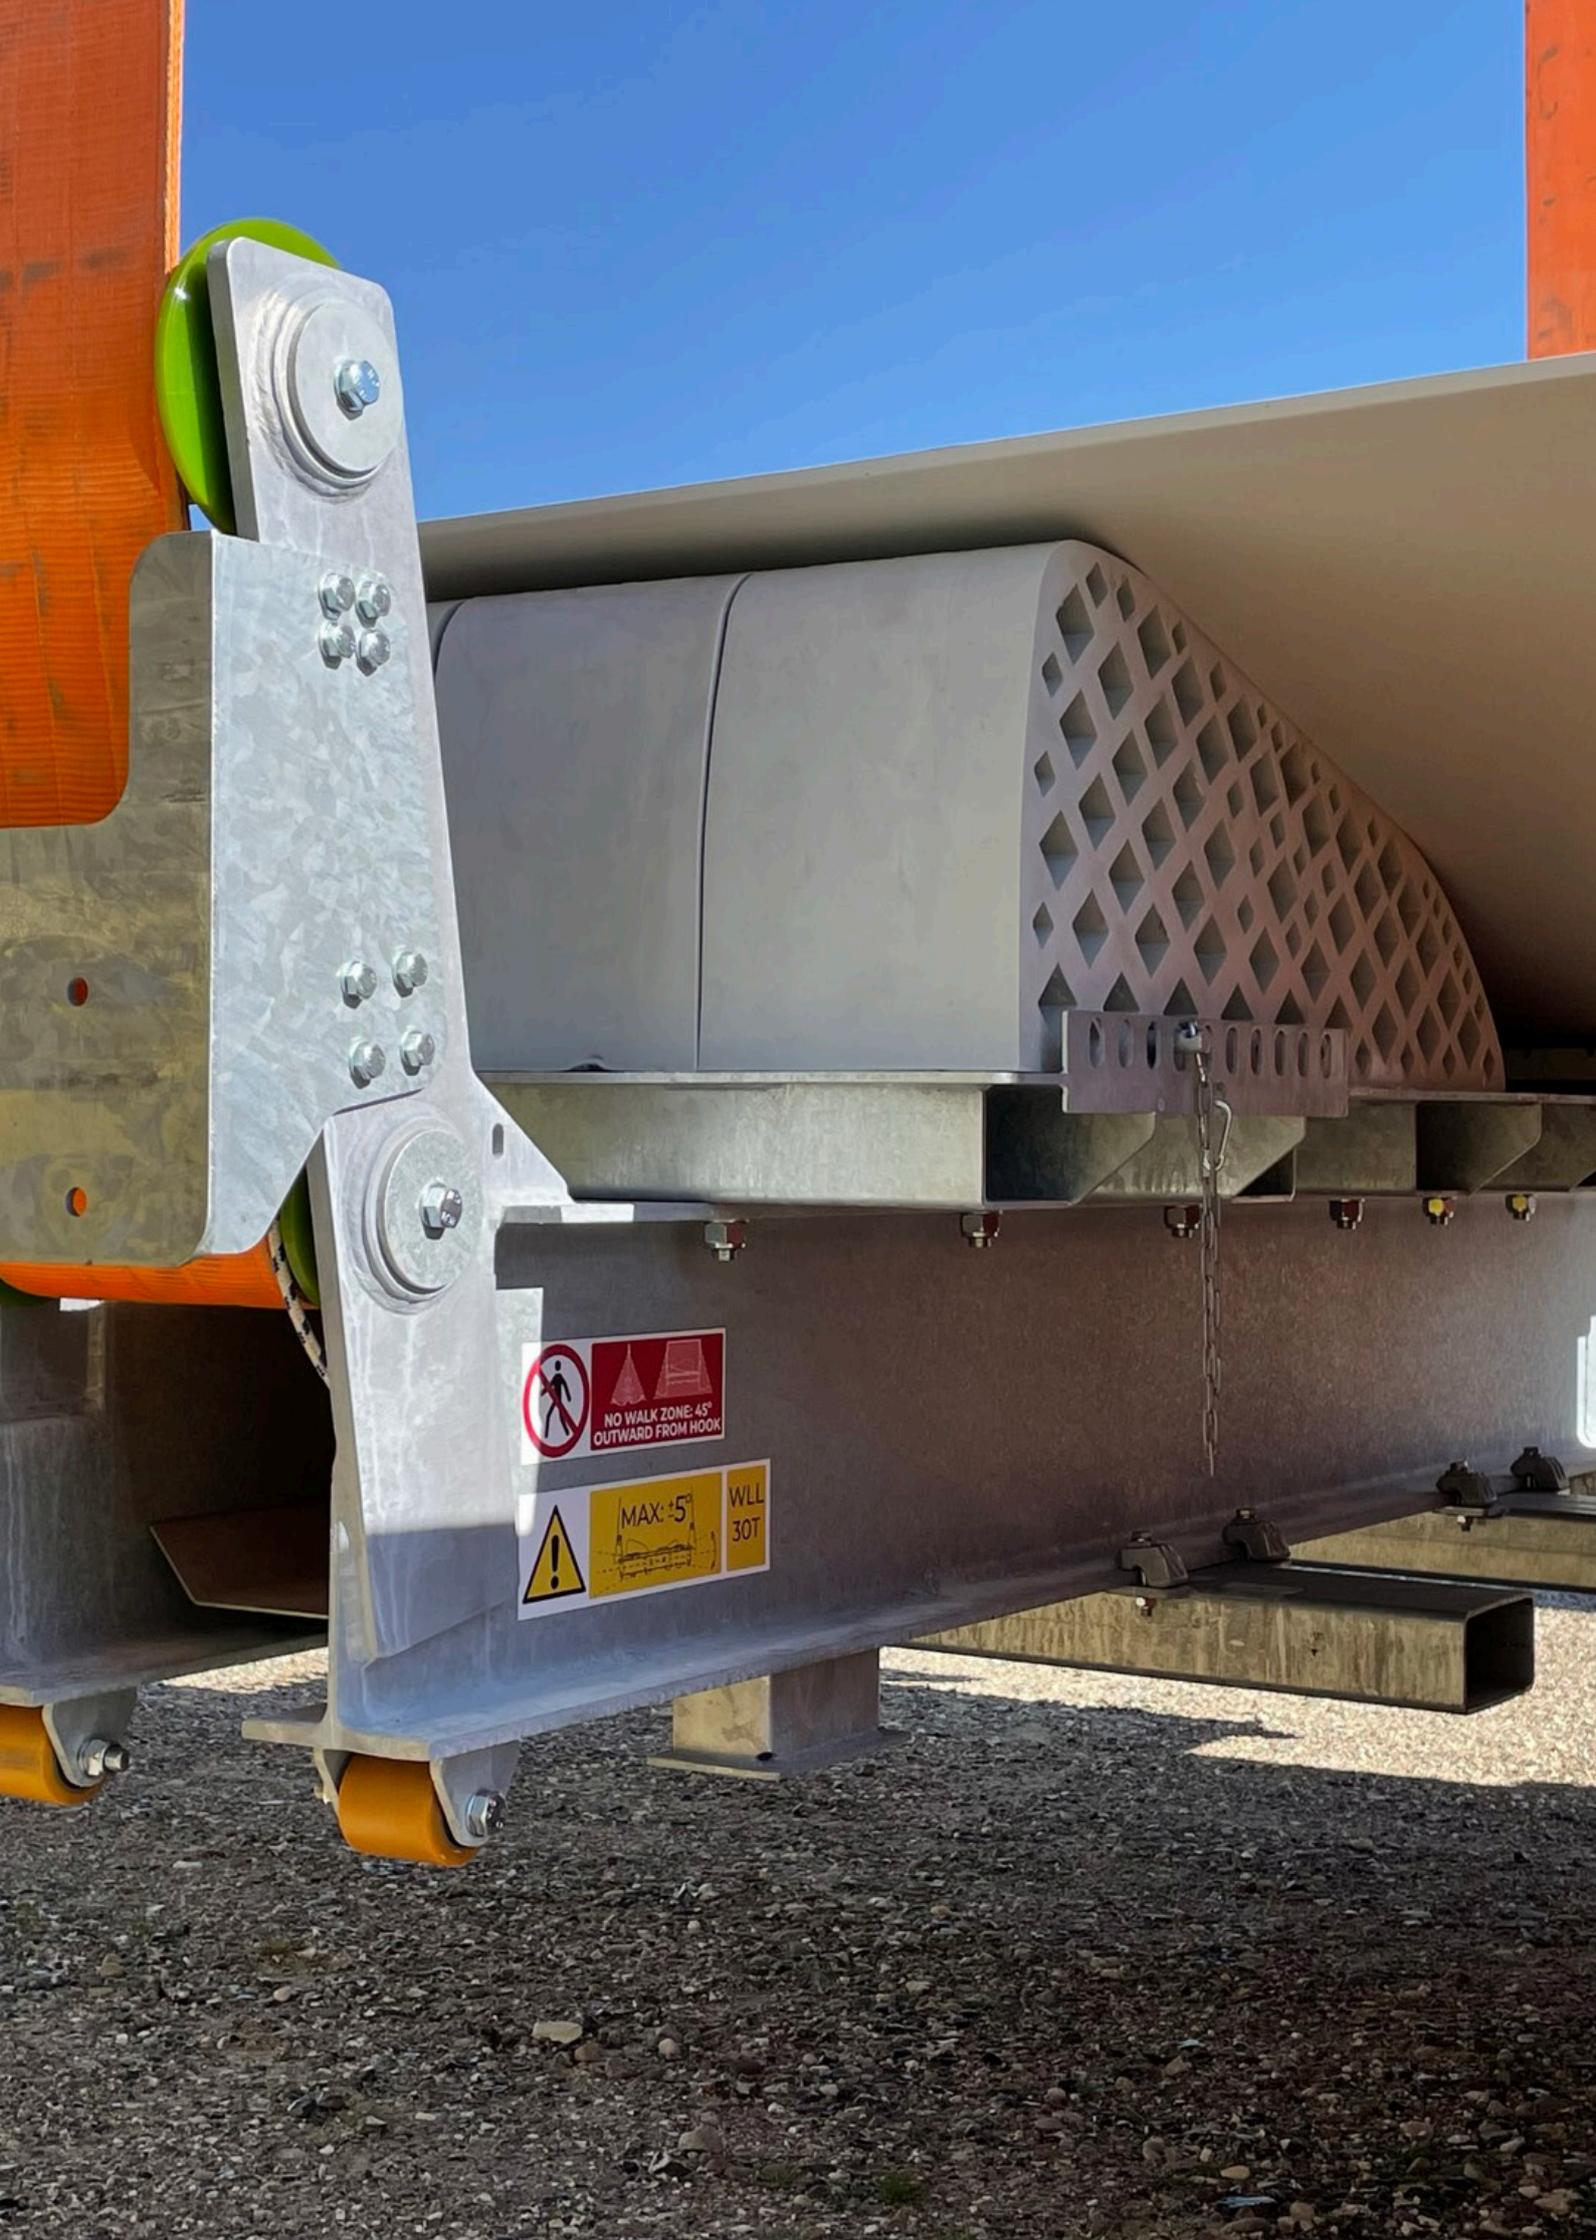

How often do you see wind turbine equipment specied with a range from 60-150m blades?

This is the multipurpose tool that covers all sizes.

”

 MAX: 15' WLL  
30T

## Why choose BRC-PRO™?

- High configurability for all blade cross sections
- Large compressible support area on LE/TE panels
- Configurable main spar support
- Applicable for internal transport and storage of blades
- Temperature range from -20 to +100°C
- Adaptable for different types of ground based logistical solutions
- High safety as the PRO-PAD® pads automatically adjust to the blade
