THE **SECRET** OF
PERFECT SURFACES

CORES AND DISC HEADS

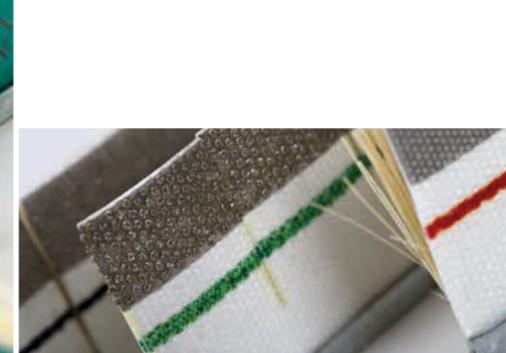

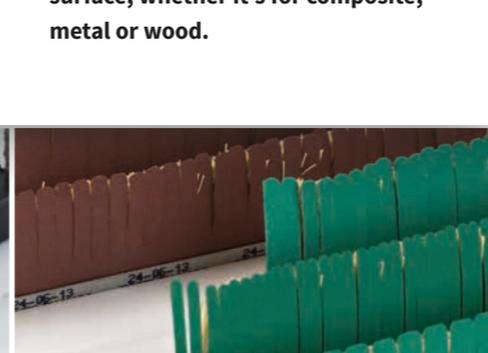

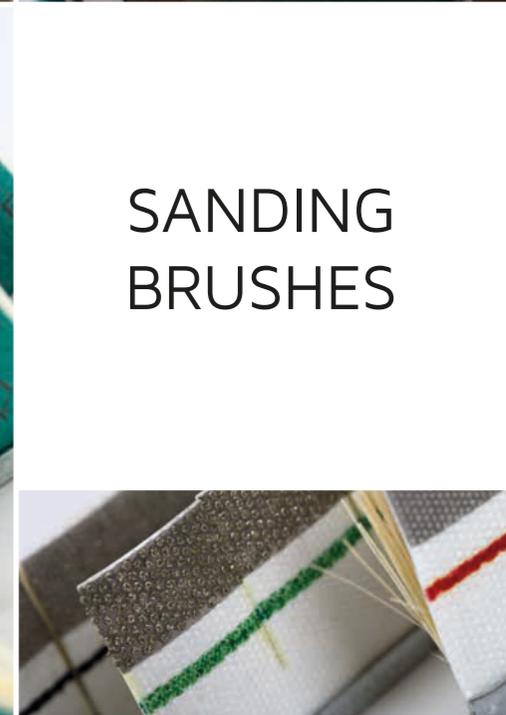

THE SECRET

Of course, we use abrasives, brushes, canvas etc. What matters is how the configuration of the core is manufactured. We use our knowledge, experience and professional background to create the perfect configuration for you.

This is the secret behind the perfect surface, whether it's for composite, metal or wood.

 OVERVIEW
 OF

SANDING MACHINES

Flex Trim's machine program is built on the philosophy "Simple, fast and ergonomic".

The machine program contains both handheld machines and stationary machines. The aim of our machines is to solve the problems as efficiently as possible and with as high a quality as possible without any unnecessary physical load for the operator.

Shield and dust extraction is standard.
