

KEEPS YOUR CITY CLEAN AND

First impressions count. This does not only apply to people but also to towns, cities and municipalities. Neat and tidy public green areas, roads and paths do not only contribute to a good image for visitors and the local inhabitants, but are also a sian of a council which works perfectly. And they encourage people to keep the city clean and tidy. As far as cleaning is concerned, many details and secondary effects are important, especially as viewed by a critical public. In this context, economic efficiency is equally important as environmental compatibility.

For many years now, Green Machines have aimed to contribute decisively towards cleaner and tidier towns and cities by providing efficient and sophisticated sweeping machines. The electrically operated zero emission models are the most recent outcome of this engineering work. They not only match the exacting sustainability concepts of

2 | 3 -----> Green Machines -----> Introduction ----> The city as a living environment

urban centers, but are also extremely attractive, especially in term of costs. We have also managed to enhance the performance of all Green Machines with conventional drive systems thanks to a host of clever details. For a city, its inhabitants, the environment and for all those who handle it on a daily basis. Welcome to Green Machines!

Green Machines —

OUR E-MISSION: ZERO EMISSION.

▶ 415

The climate is at risk. On both a large and a small scale. As towns and cities struggle with respirable dust and exhaust emission limits, all efforts are being made to reduce CO₂ emissions. Green Machines offers sophisticated e-sweepers for these tasks right now.

The new Green Machines model 500ze with its electrical drive, has already proved its worth in tough day-to-day work. Without exhaust emissions, of course. And also practically almost without noise emissions. In combination with electricity generated from solar,

wind and water power, a cleaning concept has been created which now benefits many towns and cities with lasting effect. We look forward to presenting to you the world of Zero Emission Cleaning in person. **POWER** TO PERFORM.

🔶 Hiahliahts —

The electrically operated Zero-Emission models of Green Machines use the latest generation of lithium ion storage batteries. They last the whole working day. At unbeatably low energy costs - just 3 € per charge. Thus, the acquisition costs pay for themselves in no time. Efficient storage battery

0

As an alternative, you can rent the storage battery in the scope of our program, which is good to save your assets.

The new generation of electrical sweepers.

Zero emission, almost zero noise, extremely energyand cost-saving: the 500ze is a new generation of environmentally compatible city cleaning. Thanks to its innovative design, it also covers areas which are out of reach for other machines.
