ENGINEER OF LIGHT.

SEE BETTER.
LED LIGHT FOR WATCHMAKERS.

LED

TANEO.

LIGHTING QUALITY FOR DELICATE CRAFTSMANSHIP.

At a watchmaker's work station there are high lighting quality requirements to be met. The TANEO LED arm-mounted luminaire is perfectly suited to the needs of a watchmaker.

High lighting quality

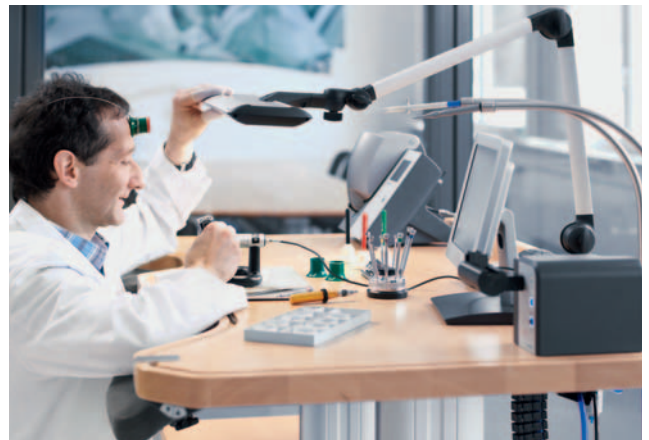

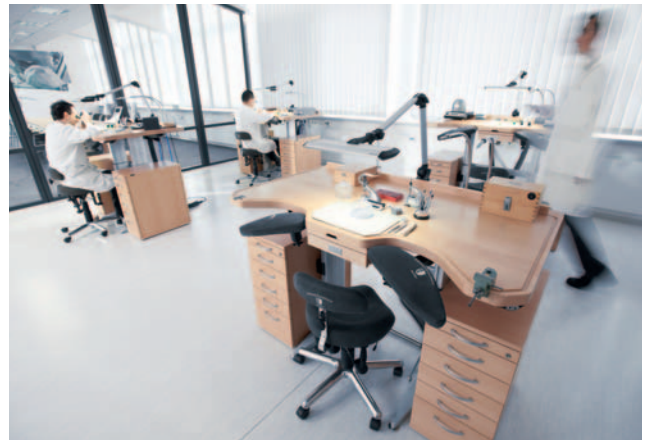

The advanced reflector and light control technology produces diffuse, homogeneous light with soft transitions. TANEO therefore reduces eye strain when performing demanding visual tasks. Excellent recognition of colors and contrasts is also realized thanks to a high color rendering index value and a high color temperature.

More individuality

Because it is continuously dimmable with a memory function, the amount of light can easily be adapted to the visual task. For added convenience, TANEO also has a balanced arm. It is effortlessly adjustable yet remains in position. The optimum setting can be fixed if required.

Advanced LED technology

Thanks to high-quality LED technology and intelligent thermal management, TANEO achieves energy savings of around 30% for the same luminous power compared with conventional lighting solutions. The long lamp life also ensures maintenance-free luminaire operation of up to 50,000 hours and more.

TANEO arm-mounted luminaire at a glance:

- 30% energy savings
- Maintenance-free LED technology
- Very good color recognition
- Excellent contrast sensitivity
- Continuously dimmable
- Ergonomic, easy operation
- 3 output levels to suit different requirements (1,400, 2,600 or 3,600 lx)
- Maximum flexibility

efficient *light*

Glare-free, powerful light

TANEO provides plenty of light at watchmaker work stations with up to 3,600 lx. Thanks to the white opal screen, it provides reliable lighting without reflected glare on high-gloss surfaces.

THAT'S MY LIGHT!

Light is a major factor when it comes to workplace ergonomics. Good lighting makes work easier and reduces eye strain. When you see better, the results of your work are better too. As an added bonus, light creates atmosphere and contributes to a greater sense of well-being.
