

A golden facade with perforated sheets from RMIG beckons customers to store

THE FACTS BEHIND THE GOLDEN DICE

Approximately 350 m² of perforated sheets have been used to create an innovative and dramatic building that attracts attention 24 hours a day:

- Raw material: TECU® Gold
- Pattern: RMIG ImagePerf
- Thickness: 1.0 mm
- Finishing operation: Bending
- Surface treatment: Bluing
- Architects: arkitec as

A COMBINATION OF PERFORATED TECU® GOLD PANELS FROM RMIG MOUNTED ON LED LIGHTS TOGETHER WITH LARGE GLASS AREAS, CREATE A SENSATIONAL BUILDING FOR THE AUDIO-VISUAL GIANT BANG & OLUFSEN

This iconic building is designed by arkitec A/S. When embarking on the project, it was important that the building's exterior should be just as exceptional in design and appearance as the interior. The material selection and design of the building is based on B&O's new flagship store concept and product design, as well as being inspired by the modernist style from the middle of the last century.

Charismatic yet inviting

Using RMIG ImagePerf, the individually adapted TECU® Gold panels have their own specially designed perforation pattern running across

the entire facade of the building, creating an unusual and fascinating design that resembles entangled snakes. All in all, the golden panels cover approximately 350 m².

The combination of these precision perforated panels and the beautifully rounded glass corners give the building a unique charisma with lightness and transparency.

The programmed LED lights behind the golden perforated facade fade in and out, creating a visual energy and a constantly changing light both day and night in the city square where the building is situated.

B&O project.

MORE THAN JUST BUILDINGS

RMIG City Emotion is for everyone who values the beautiful and innovative qualities of our cities, because a city is not just about buildings. A city is a place for emotion and it requires our full attention to unleash its aesthetic appeal.

RMIG City Emotion captures the passion for creative urban design by offering innovative technologies and materials. We can help you realise the most ambitious architectural projects and their emotional potential.

- Let us guide you through the benefits and practicality of your design
- We can work on your drawings in CAD, 2D and 3D formats
- Use perforated sheets, embossed sheets or expanded metal
- Enjoy the unique finishing operations and surface treatments

RMIG is the world's largest manufacturer and supplier of perforated metal. In addition to exterior cladding, the company also supplies products for a large number of construction applications such as car park and security screening, acoustic wall linings, ceilings, lighting, street furniture, balustrades and walkways.
