& BUILDING INDUSTRY**

#BUILDINGGREEN

WELCOME TO BUILDING GREEN

Building Green is where building owners, architects and city planners meet with other change makers to make the building industry more sustainable. The event is not only an exhibition with sustainable solutions but also a platform for knowledge-sharing with keynotes, relevant debates, idea pitching and much more.

HISTORY

Building Green was established in 2011 and is a growing event in Scandinavia. Our goal is to illuminate the importance of sustainable buildings and architecture. The concept rests upon high credibility and collaboration with leading organizations and media partners.

TRUSTWORTHY PLATFORM

Building Green exists because of its trustworthiness and it is considered the merging platform within sustainable and energy efficient construction. This is why visitors can expect to meet frontrunners and change makers working with buildings and architecture.

Oslo, Gamle Museet: 17 & 18 October 2018
Copenhagen, Forum: 31 Oct & 1 Nov 2018
Aarhus, Centralværkstedet: 3 & 4 April 2019

WHO ATTENDS BUILDING GREEN?

Building Green visitors represent all aspects of the building industry and the Building Green team has solid experience with reaching the target group through media and network partners.
