WHAT IS JMobile?

JMobile is the HMI software for the UniOP family of operator panels. It's a suite of software components that provides a complete solution for connecting equipment and visualizing data.

JMobile applications are easily and quickly configured using JMobile Studio, powerful IDE with a graphical drag & drop interface for building displays. JMobile is specifically designed to deliver advanced solutions in a variety of application fields.

JMobile AT A GLANCE

Compatibility - The JMobile system has been designed to be a cross platform solution from the very beginning. There is a wide range of proven platforms on which JMobile runs, from PC and HMI systems to OEM hardware.

Rich set of classic HMI features: data acquisition, alarm handling, scheduler and timed actions, multiple languages, recipes, tag editor and tag database, user and passwords, scripting, ...

Rich symbol library and project templates

Support for 50+ platform independent communication protocols

Remote monitor, remote control and maintenance

Advanced connectivity options for data sharing

Off-line simulation

Advanced HMI objects: e-mail, rss feeds, weekly and daily schedulers with exception dates, rotating menu, video input, dynamic object properties

iPLC SUPPORT

Integrated CoDeSys Soft PLC

High level of integration and optimized CoDeSys communication services

CANopen support

Supports gateway options for CoDeSys PLC remote assistance

Enhances CoDeSys with a state of the art HMI subsystem and unrivaled connectivity features

APPLICATION FIELDS

BUILDING AUTOMATION

Monitor your building 24/7 anywhere and everywhere. Stay connected with your alarms, heating and cooling systems. Did you just go and forget to turn off that smoldering iron? With JMobile you don't have to worry about starting a fire. Simply turn it off with your mobile phone or PC.

FACTORY AUTOMATION

JMobile is a must have companion for factory environments. View information from your plant whenever and/or wherever you need it. From PLCs, sensors, drives and panels, you will be able to connect any piece of equipment to JMobile.

MARINE SYSTEMS

With our technology already working on hundreds of yachts worldwide, JMobile is becoming the standard for marine automation. Monitor your yacht remotely and even find out its location. See who's onboard by connecting to the cameras or turn on the air systems, control lights and engine status through the internet or mobile phone.
