**Hydraulic accumulators help control the energy in hydraulic systems. The accumulator:**

- Reduces installed power
- Regenerates power
- Stores hydraulic energy
- Emergency operates hydraulics
- Creates mass balance
- Dampens Shocks or Pulsation
- Compensates leakage or volume change

**HYDAC is the world's largest accumulator producer. Our stream lined accumulator rack production provides you with the best and most competitive solution. You either choose our standard, cost optimized designs or we design according to your demands**

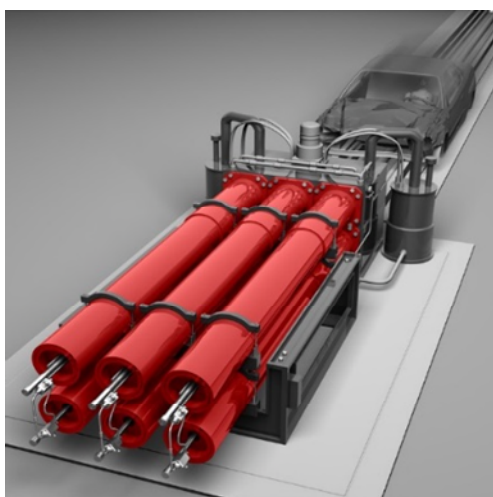

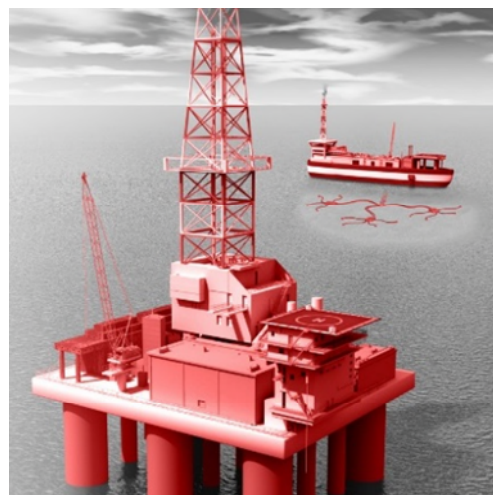

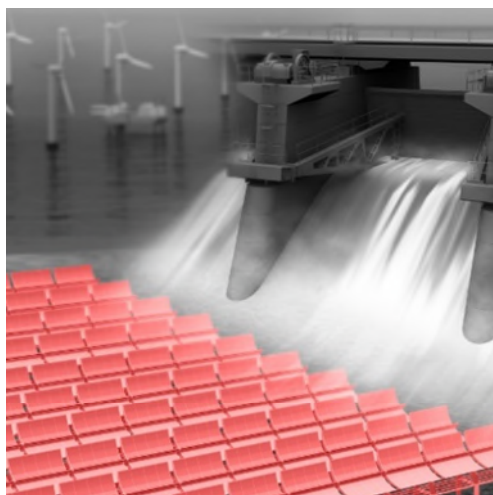

- Bladder accumulators (based on 50L bottles)
- Piston accumulators
- Nitrogen back-up bottles
- Safety features on gas and fluid side
- Optional manifolds on fluid side
- Primed/Painted carbon steel as standard, but may be supplied in any materials and paint specs, including NORSOK
- Pre-charged N2 or supplied with filling/test equipment for gas
