

T8 SMD LED Tube 21W 2100 Lumen, 120cm

Main Features

- beam angle 120° downward
individually rotatable
- NO Flicker and Glimmer
immediate full brightness
- Energy-efficient compared to
conventional fluorescent tubes
- Environmentally friendly as no
heavy metals
- Ideal for warehouses, workshop, industry,
trade
- unbreakable case (PC + ALU)

Product Description

Arcas T8 LED tubes are the ideal solution to efficiently provide large spaces with light while saving over 50% in energy costs compared to conventional fluorescent tubes. In addition, LED tubes are environmentally friendly because they contain no heavy metals. Other advantages are: no flickering and flicker, no delay - immediate full brightness, high beam angle of 120° rotatable.

Warning:
Don't look into the light!

Technical Characteristics

- Amount of SMD LEDs/Chip-Type.....128/4010
- Power.....21W
- LED lifetime.....up to 50.000 hrs
- Volt/Freq.....85-265V/50-60Hz
- Operating Temperature.....-10° - +40° C
- Socket size.....G13
- Dimmable.....No
- Luminous Flux.....2100 lumens
- Beam Angel.....120°
- Color Temperature.....6.500K
- Color Rendering Index (CRI).....Ra.> 80
- Amount Switch on/off.....up to 50.000
- Electric Power Factor (pf).....>0,9
- Energy Efficiency Class.....A+
- Dimensions (ø x L mm).....26 x 1200
- Weight (g).....476
- Light Efficiency.....100lm/W
- Mercury.....no
- Feed-in.....one-way, galvanically isolated;
TÜV conform
- Cover.....milky
- Protection class.....IP20 (Indoor)
- Driver (CCD).....isolated

Technical and logistical changes reserved.
