

96W SERIES

Electric Pin Packages

DESTACO now offers the 96W electric pin packages with adjustable stroke speed and height up-to-60mm, by way of the integrated control module. They can be ordered and/or configured in a straight or redirected configuration and motors can be rotated for greater flexibility. They also features integrated sensors that allows for production variations.

Leading the way into the future, our growing BIW product line of smart, electric products eliminate CO² use, provide important data and control for optimizing efficiencies, and are a frontrunner for flexible manufacturing with Plug & Play solutions.

As production requirements evolve, DESTACO will continue to expand our product portfolio of electric solutions for use in all types of manufacturing processes.

LOCATING

PRODUCT HIGHLIGHTS/OPTIONS

- One size fits all - Variance reduction
- Can be used for locating and positioning
- Energy efficiency - CO² reduction
- High repeatability and accuracy

FEATURES & BENEFITS

ELECTRIC

- Daisy chain connection requires less cables
- Two control and drive options available
- Fast start up during installation

PERFORMANCE

- Controlled motion provides smooth extension and retraction
- Infinite stroke positions for multiple applications
- Adjustable speed offers cycle time optimization

NO/LOW MAINTENANCE

- Predictive maintenance for improved production planning
- Provides quick restart after emergency stop

96W Electric Pin Package

DESTACO's 96W series pin packages features adjustable extend and retract stroke and speed control.

Adjustable stroke up-to-40mm
*Straight motor option only.

Adjustable stroke up-to-60mm

Motor connection positions can be rotated in 90° increments

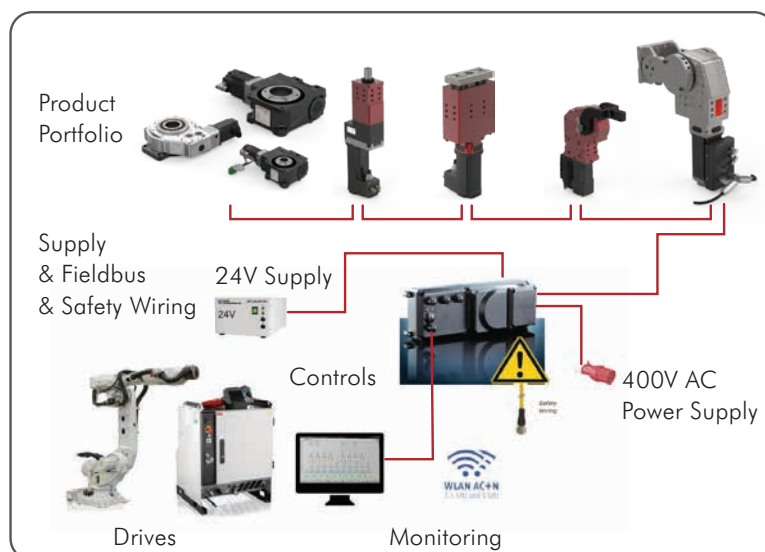

Drive motors can be ordered in an inline (straight) or a redirected configurations

Two control and drive options available (400V and 48V)

All Electric Body-in-White Product Portfolio
