### Our promise:

aMbooo – Highland Bamboo Only stands for exclusive premium decking, patio fence systems and cladding made of bamboo.

**aMbooo Outdoor - As green as it gets!**

# aMbooo

## DECKING BOARDS, FENCE SYSTEMS + CLADDING

### Useful facts about bamboo:

- Bamboo grows faster than any other plant on earth.
- Bamboo generates 10% - 30% more biomass as wood yearly.
- Some bamboo species grow up 1 meter in a day
- Bamboo has no thickness growth, stemming entirely from the ground
- Bamboo is used in the production of biodiesel.
- Bamboo is used to replace steel reinforced concrete in the building industry.
- Bamboo has been known for a long time as an unbeatable help against soil erosion.
- Bamboo derivatives are employed in car manufacturing and in other industrial products

### Reasons which make aMbooo bamboo decking and fencing so worthwhile

#### 100% Bamboo

As a basis we exclusively use highland bamboo, hard, fast re-growth and tree-free.

#### Long-lasting

Our thermal treatment modifies the bamboo fibres thus increasing durability.

#### Simple & fast

Frontal tongue + groove and longitudinal groove enable simple, safe and quick mounting,

#### Durable and hard

Strong as steel and as long-lasting as tropical wood but CO2 positive,

#### CO2- neutral

Up to 1 metre growth a day. A giant grass with best marks for ecology,

#### Dimensionally stable

No natural spiral grain as with wood. Very low absorption and contraction behaviour.

#### Decking, fence system and cladding

Tongue + groove short, minimized material waste during installation

#### Anti UV Shield

With our maintenance products guaranteed less color change caused by UV Light.

#### Flame retardant

Flame retardant accordl. DIN EN 31501-1 B1 S1

#### Slip resistant

Slip resistant accordl. Class C Ref. DIN EN 51907

### Manufacturing aMbooo decking, fence and cladding boards

The manufacturing of aMbooo decking, fence + cladding boards is realised exclusively by using bamboo culms from sustainably managed bamboo forests. Each culm must be at least 5 years old and harvested in the highlands. Only highland bamboo possesses sufficient strength to stand up to both our and your demands for modern and resistant boards.

The culms are processed through thermo-mechanical technology. This process has been developed by us over decades and matched to the requirements of a premium product. All our boards are thermo modified.

The right

## CARE for aMbooo Outdoor-Products

It is recommended that initial treatment be carried out with aMbooo Special Bamboo Care Oil after Decking boards have been installed (please observe the instructions given by the manufacturer). Decking boards, fence systems and cladding boards are subject to weather incidence, such as rain, sun, wind, ice and snow and may naturally change their form and appearance through the influence of these elements. This aging process underlines the natural quality of the materials employed.

With aMbooo care products, the surface can be preserved in its original color for a long time.

When laying aMbooo decking in the pool area, regular cleaning and care is particularly important. Further information on page 44.
