

The Thin Wheels from PFERD

The Performance Experience

Performance
Upgrade for all Lines

TRUST BLUE

- Perceivable increase in performance in terms of aggressiveness and tool life
- Even more thin, low-burr cuts at maximum economic value
- Unrivaled cutting comfort and labor-saving work

The Thin Wheels from PFERD

The Performance Experience

PFERD has achieved a **tangible increase in performance** in all thin cut-off wheel product lines:

- even more **thin, low-burr and fast cuts,**
- **maximum economic value,**
- **comfortable and safe.**

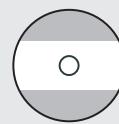

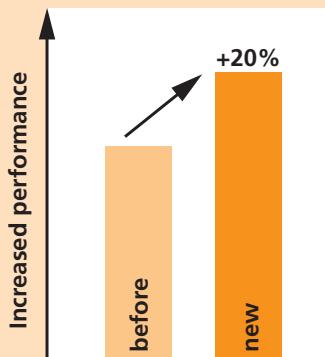

The thin wheels from PFERD are the best cut-off wheels in the world and stand out thanks to their special adhesion formula. Intensive research and development work and directed implementation in state-of-the-art manufacturing facilities guarantee the **high quality and safety standards** of PFERD premium quality.

Alongside the high quality standards, health and safety protection and ergonomics play important roles at PFERD.

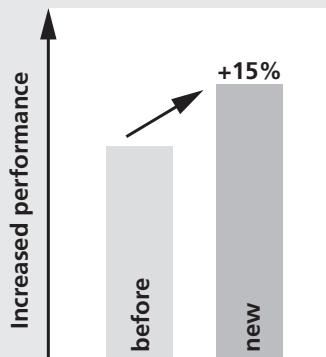

Universal line PS-FORTE

General use in industry and crafts.

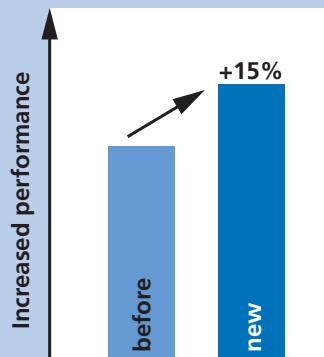

Performance line SG-ELASTIC

Widest range of tools for professional use in industry and crafts.

Special line SG-PLUS

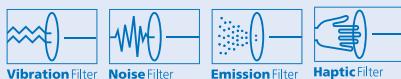

For special industrial applications.

PFERDERGONOMICS recommends the thin cut-off wheels as innovative tool solutions.

For more information and suitable PFERD tools, see the brochures

"**PFERDERGONOMICS** – The Focus is on People" and "Health and Safety at the Workplace – Limit Values for Noise and Vibration".

The original PFERD Tool Manual!

With more than 7.500 innovative solutions for surface processing and cutting materials.

Request your own free personal copy at www.pferd.com.

Competence when working on stainless steel (INOX) and aluminium

PFERD offers a comprehensive range of tools that meets the requirements of processing stainless steel (INOX) and aluminium. We are happy to help solve your application problems.

The PFERD PRAXIS brochures "Tools for Use on Stainless Steel (INOX)" and "Tools for Use on Aluminium" contain many valuable application notes.

General purpose tool of hardness grade P. PFERD product characterized by aggressive abrasive performance and long tool life:

- fast,
- comfortable,
- minimized burr formation.

Abrasive: Aluminium oxide A

Workpiece materials:

Steel

Application:

Cutting of steel metal and sections

Recommendation for use:

Disc thickness 1,0/1,6/1,9 mm for fast, convenient cutting with minimized burr formation.

Suitable for angle grinders of all output levels.

The use of large clamping flanges (SFS 76, page 5) increases the lateral stability and ensures precise disc guidance, in particular for thin cut-off wheels flat type, dia. 178 and 230 mm.

General purpose tool of hardness grade P-INOX. PFERD product for cutting with low heat input.

Provides fast stock removal and long tool life:

- cool,
- fast,
- comfortable,
- minimized burr formation.

Abrasive: Aluminium oxide A

Manufactured without addition of ferrous, sulphurous and chlorinated fillers.

Workpiece materials:

Stainless steel (INOX)

Application:

Cutting of steel metal, sections and solid materials

Recommendation for use:

Disc thickness 1,0/1,6/1,9 mm for the fast and convenient cutting of thin sheetmetal and profiles.

Disc thickness 1,2/1,8 mm are particularly suitable for the cost-effective cutting of profiles and solid materials.

Suitable for angle grinders of all output levels.

The use of large clamping flanges (SFS 76, page 5) increases the lateral stability and ensures precise disc guidance, in particular for thin cut-off wheels flat type, dia. 178 and 230 mm.

Performance tool in hardness grade N-Alu. Non-loading PFERD product characterized by high cutting performance and very long tool life:

- fast,
- comfortable,
- minimized burr formation.

Abrasive: Aluminium oxide A

Contains no fillers which might leave an undesirable surface residue. The workpiece can be welded right away, without any further treatment.

Workpiece materials:

Tough and hard aluminium, non-ferrous metals

Application:

Cutting of metal and sheet profiles

Recommendation for use:

Disc thickness 1,0/1,6 mm for fast, convenient cutting with minimized burr formation.

Suitable for angle grinders of all output levels.

The use of large clamping flanges (SFS 76, page 5) increases the lateral stability and ensures precise disc guidance, in particular for thin cut-off wheels flat type, dia. 178 mm.
