

D^{med}® **halux** LED
EXAMINATION LIGHT

D^{med}® halux LED EXAMINATION LIGHT

Often, in examination rooms only a general lighting is used. An additional examination light (mounted on the mobile stand or directly at the examination table) ultimately achieves the required brightness (illuminance) and assists with the diagnosis.

SMALL - COMPACT - CLASSIC

Examination light in top quality

The a well-lit illumination field is generated by 7 powerful LEDs (about 40,000 lux at 0.5 meter). The light is considerably more pleasant to the eye and an absolutely true-color light is available in a diameter 170 mm.

Very good color rendering

By an excellent color rendering index of Ra > 93 characters of the skin (surface and deep structure) are easily visible. This means better detail recognition of the finest nuances of color in tissue for the physician. The illuminated area appears natural and contrasted.

Light color and dimming in 3 steps (only halux 20-3)

By color mixing of different LEDs an excellent innovation in the field of investigation is achieved. Depending on the examination the light color (color temperature in Kelvin) can be changed. The user thus has the possibility -depending on the skin, tissue or wound- to select the optimal inspection light. The light control is a simple, clear control unit directly at the lamp head. Here also the illuminance could be selected individually by 5 dimming levels.

The three color levels

3300 K	(warm white) Ideal for various types of skin tests
3800 K	(neutral white) Ideal for general examinations
4400 K	(cool white) Ideal for recognition of individual veins or for wound treatment and minor procedures

Spring-balanced arm system
For stepless positioning

LED:
40.000 lux / 0.5 m
One hand positioning

16 mm spigot:
For adaptation to rail systems, mobile stand, wall bracket

Integrated converter:
Power conversion safely and ergonomically

The benefits of the halux LED are obvious: more comfort and ergonomics due to individually selectable light trap device and highly flexible adjustability.

Applications shown:

- Neonatology
- General examinations

TECHNICAL DATA

Dmed® halux LED

Technical Drawing 20-3 P FX / 20-1 P FX

Light Distribution

Illumination data -10% / +20% tolerance

Technical Drawing 20-3 P SX / 20-1 P SX

Light Distribution

Illumination data -10% / +20% tolerance

The halux LED light is a loyal partner ideal for medical examinations. Unobtrusive, classic shape and proven in the application.

Applications shown:

- Gynaecology
- Dermatology
- Intensive Care

ORDER NUMBER

D^{med}® halux LED 20-3 with colour change, dimming (3300 K, 3800 K, 4400 K)

D ^{med} ® halux LED 20-3 P FX	D15.471.000	Euro
--	-------------	------

D ^{med} ® halux LED 20-3 P SX	D15.473.000	Euro
--	-------------	------

Note: Control panel on luminaire head.

D^{med}® halux LED 20-1 without colour change, without dimming (4400 K)

D ^{med} ® halux LED 20-1 P FX	D15.472.000	Euro
--	-------------	------

D ^{med} ® halux LED 20-1 P SX	D15.474.000	Euro
--	-------------	------

Note: ON/OFF switch on luminaire arm.

ACCESSOIRES

EXTENSION ARM

MATERIAL	Powder coated tubular steel
DIMENSIONS	400 mm, Ø 16 mm
WEIGHT (NET)	ca. 0,65 kg
FOR PIN Ø	16 mm-Q with removal guard
LOAD CAPACITY	2,5 kg
ORDER NUMBER	D13.363.000 - pure white

ROLLER STAND R TELESCOP

MATERIAL	Stainless steel
DIMENSIONS	0,8 - 1,4 m
WEIGHT (NET)	6,25 kg
FOR PIN Ø	16 mm-Q mit removal guard
ORDER NUMBER	D14.911.000

RAIL MOUNT

MATERIAL	Aluminium
EQUIPMENT RAIL	25-35 x 8-10 mm
ORDER NUMBER	D13.269.000

WALL MOUNT

MATERIAL	Polyamide GF
ORDER NUMBER	D13.231.000 - pure white
