

Hi Steve Smith, Nice to meet you!

Welcome to SKUmaster.

Looking for a cutting-edge dimensioning system that won't break the bank?
SKUmaster is your answer.

Everyone needs a SKUmaster!

Manual capture of SKU metrics is slow and inaccurate. And large automated measuring systems are expensive and take up valuable floor space. SKUmaster cuts through the dimensioning maze with a revolutionary compact system ALL can afford.

“

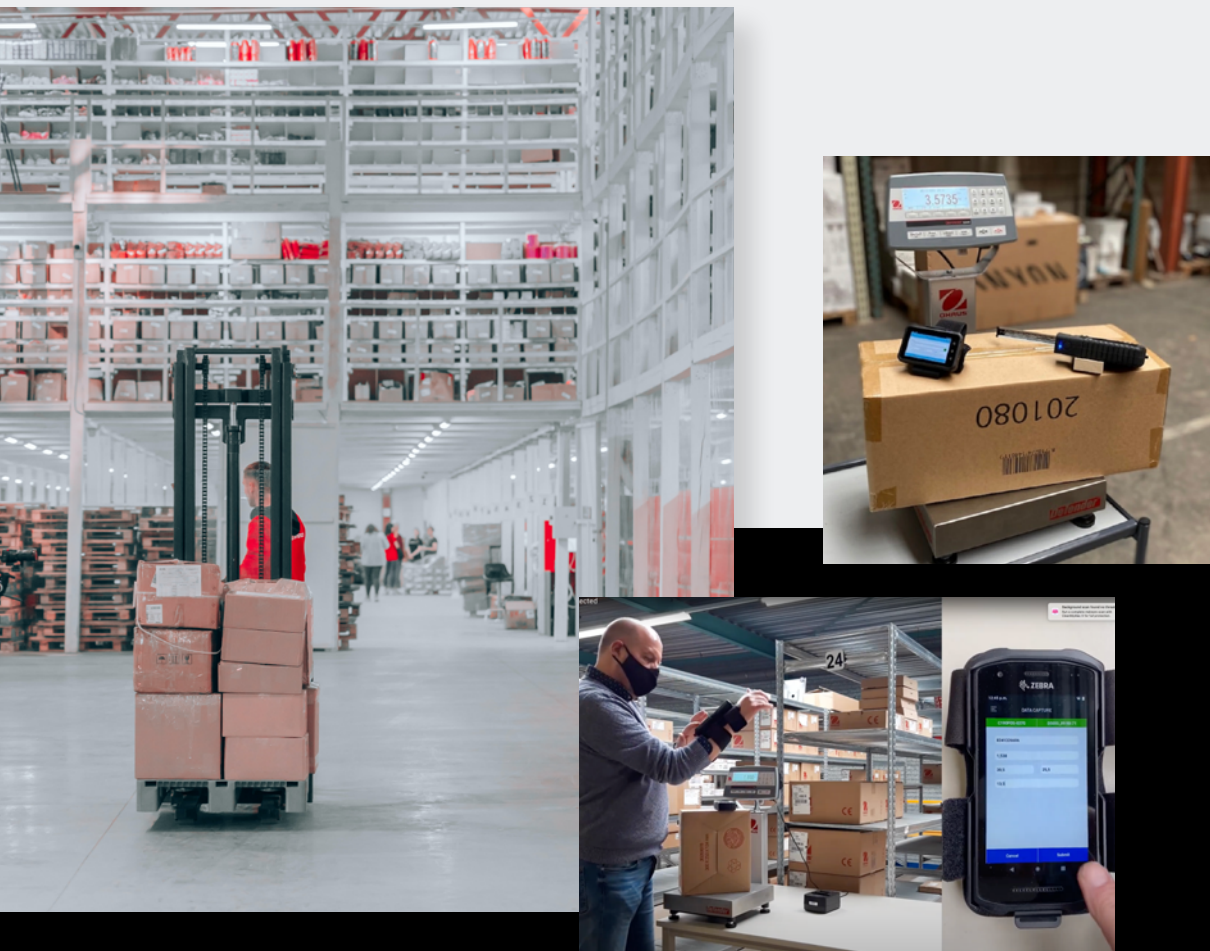

SKUmaster is the best product I've used. Not only is it compact, and easy to use, but I can easily transfer data to my system via its mobile phone and Windows interfaces. It's a game changer.

How it works

So what makes SKUmaster better than the rest? More than just a product, SKUmaster integrates a Cubetape wireless scanner dimensioner (up to 3m) with barcode scanner, a weighing scale and Android and Windows-compatible CheckMate software in one powerful, wireless solution. It is easy to learn, implement and start using. Simply place the parcel or pallet on the scale, scan and measure with the dimensioner, and click to automatically store ALL the data into your IT system. And the compact data capture process can be setup **anywhere**, providing the ULTIMATE in flexibility and use of existing space.
