

OCS Floor conveyors

Conveyor for light goods up to 100 kg/m

Available as manually operated or driven roll or belt conveyor with a range of accessory parts, according to your individual need. Conveyors can be combined with other products, for example an assembly station. Via specific breakpoints you are able to separate products on an accumulation line. Pusher, stopper sections and vertical conveyors are possible accessories available.

Conveyor for heavy goods up to 1500 kg/m

For heavy transported units all required components are available in order to enable easy handling of goods at the working stations or with loading or unloading of pallets. Three different versions are available: Manually operated, driven or accumulation conveyor. Each version can be completed with chain conveyors. The components include transfer stations from roll to chain conveyor (and vice versa), rotary tables and transfer trolleys.

We provide one of the largest ranges of module programs in the market of unit load handling, which allows cost-effective and functional solutions for all sorts of requirements.

- ✓ Flexible and reliable solutions
- ✓ Minimal maintenance
- ✓ Easy to install, reconstruct or extend
