

Messer Cutting Systems presents new Laser technology at Euroblech 2012

Groß-Umstadt, July 9, 2012

Messer Cutting Systems will present a cutting machine which enables laser and plasma cutting in combination at Euroblech 2012. Cutting with the fibre laser is the highlight. A second machine will demonstrate how the efficiency can be increased by raising the level of automation.

As a one-stop-shop for all aspects of thermal cutting, the company will also be demonstrating its made to measure software solutions, environmental equipment, professional spare parts and consumables service as well as its TÜV Hessen certified training modules. In addition the Oxyfuel equipment department will be showing a range of combined torches for welding, cutting, brazing and heating.
