REVERSE OSMOSIS MICRO / BLACK SERIES

WWW.ULTRA-FILTER.COM

Reverse Osmosis

RO MCR90 / RO-M Black 150-1000

Technical Data

 Permeate Flow, LPH: 90-1000

Maximum safety for drinking water

Reverse osmosis (RO) removes even the smallest amounts of impurities in the water.

RO systems remove fluoride, cysts, bacteria, viruses, antibiotics and hormones. The best choice when you have critical requirements for your water quality.

The RO water purification systems are designed for entire homes and medium to large companies, with a number of water applications and strict water quality requirements. The system is assembled on a single frame, using TDS gauge and pressure regulators for monitoring performance and service status. System self-service is controlled by the programmable logic controller (PLC).

All-in-one water filtration solution

That you can connect to your water supply.

- Industrial applications
- Large kitchen units
- Convection ovens
- Dishwashers
- Bar glass washes
- Ice machines
- Boilers and water heaters
- And many more

ABOUT US

Ultrafilter Scandinavia offers a wide selection of filtration products for compressed air, liquids and gas. We have stock in Denmark and from here we distribute all of our products to Scandinavia and the Baltic countries.

Ultrafilter Scandinavia is a part of the Ultrafilter group. Our production facility is in Germany and we have several subsidiaries in Europe and the United States.

You can buy our products on local websites. Information about our products as well as brochures and manuals can be found on our website (www.ultra-filter.com).

We can adapt all of our filtration products to your needs, and we offer visits from our consultants in order to find the right solution for you. We also offer on going service on our products once they are installed.
