Going deeper to explore further !

The **New M+ Series** is now available to meet the highest standards of safety for **long-term, very deep water immersion up to 700 bars.**

Advantages:

- **Proven reliability:** extensively used in underwater applications for Oil & Gas, Subsea Production Systems, Military Submarines, Remotely Operated Vehicles...
- **Robust and high performance**
- **Easy operating:** the connectors are scoop proof and equipped with polarization keys which allow blind mating
- **Flexible system:** offering a large choice of body styles and layouts as well as a choice of shell materials
