

## HSE

---

At World Wide Workers, we take pride in training our employees in creating a healthy, safe and environmentally friendly work situation benefitting themselves and their surroundings.

At World Wide Workers, we base our HSE strategy on high levels of knowledge, training and information to ensure a healthy, safe and ethically sound workplace.

We are aiming for a working environment free from injuries, accidents and overload of our staff and the environment, and we are in a constant and constructive dialogue with our partners and employees to find ways of improving in the HSE areas.

## HSE AREAS

- ✓ Quality management system, which actively factors in HSE areas
- ✓ Mandatory introductory safety & quality training for new employees
- ✓ Mandatory yearly safety training for all employees
- ✓ Internal audit system
- ✓ 9 point "green plan" for reducing impact on the environment
- ✓ Employee committee working on improvement of HSE
- ✓ Employee handbook
- ✓ Free health checks for all employees

## EMPLOYEE HANDBOOK

Our goals in HSE are very clear:

- Zero accidents!
- Reduce impact on environment!
- Take interest in the general health of all employees!

This means caring for our employees on and off work to make sure they are healthy, safe and knowledgeable. Our employees work in potentially hazardous environments, so it is important for us that they possess the necessary knowledge, education and training in order to avoid incidents and accidents. Along with an introductory safety and quality course all new employees receive an Employee Handbook informing about QHSE areas, behavioural guidelines, politics and company goals.
