# Seafastening projects.

Ship & Rig Service (SRS) AS, Mekjarvik 4, 4070 Randaberg Norway

# Logistics and project management for vessel and rigs

# We have in-house Plasma & oxy Cutter

## MasterCut Compact

MasterCut Compact is a dynamic, high precision CNC cutting machine suitable for a variety of plasma and oxyfuel cutting jobs. Thanks to its sophisticated design and high quality of components it smoothly provides latest features of plasma technology for a decent price – true contours, small holes, sharp corners and efficient operation. As a fully compact machine it is moveable within workshop while the pre-assembled delivery significantly shortens the start-up time.

## Technical parameters

Working length	1500 - 6000 mm
Working width	1500 - 2000 mm
Max. number of tool stations	1 (2 with 2000 mm width)
Max. thickness of material cut by plasma	according to a plasma source
Max. thickness of material cut by oxyfuel	100 mm
Bevel cutting	yes (see accessories)
Pipe cutting	no
Drilling and tapping	no
Positioning speed	max 51 m/min
Bidirectional repeatability	0.05 mm/m
