Heavy Duty Trailers for Industry and Ports

Roll trailer with 27 m³ reservoir for leaking containers, 63 tons

Roll trailer with dump body, 120 tons

Roll trailer with weighing system, 200 tons

Spreader trailer

ROLL TRAILERS & GOOSENECKS

SEACOM roll trailers are available in a wide variety of configurations and load capacities, with detachable or fix goosenecks. They are designed and built to withstand toughest working conditions at maximum safety.

Each roll trailer is custom designed to your needs such as load capacity, cargo type and size, terminal surfaces and distances driven, vessel ramp and deck specifics. All these factors determine the axle type, tire size, frame construction, decking material, and gooseneck configuration. Steel parts are shot blasted to SA 2.5 before priming and painting.

Detachable goosenecks are equipped with slew brakes and safety couplings, and are available with park boxes.

Roll trailer with fix gooseneck, 150 tons

Gooseneck SH 36 with park box

Roll trailer for rail cars

Securely stacked roll trailers

Roll trailers for container transport

INDUSTRIAL TRAILERS

SEACOM offers a comprehensive range of drawbar trailers and roll trailers for a variety of industrial applications, which can be custom designed to your requirements.

The company possesses abundant technical expertise enabling it to design and deliver innovative technical solutions to satisfy demanding handling problems in heavy and continuous processing industries.

Trailer for steel coil transport

Heavy-duty trailer, 100 tons, type 70-8 HH with hydraulic lift

TERMINAL CHASSIS AND PORT TRAILERS

From simple, rugged single axle terminal chassis to fully tracking trailer trains, SEACOM offers a complete range of port equipment, designed to complement all operating and budgetary objectives. Chassis are designed to resist repetitive loads and can be provided with single or tandem axles. Suspension, brakes, and lighting systems, together with different types of tires are only a few of the options available.

Our range of drawbar trailers offers a choice of steering systems in order to safely move around restricted terminal space and to securely track the leading tractor.

CASSETTES

Complying with internationally adopted standards and with capacities of 140 tons and more, cassettes manufactured from high tensile steel are custom designed for efficient transport of paper, containers, forest products, general cargo, steel coils, and slabs.

Rail mounted carrier GWB 50 tons

Electric platform truck EPW 40 tons

Roll trailer for ports

Roll trailer for hot slabs in steel mills

Roll trailer with automatic weather protection

SEACOM, with more than 40 years of experience, is one of the leading manufacturers of heavy-duty transport systems for industry and ports. We offer an extensive range of equipment, covering all requirements of containerized and general cargo, as well as customized solutions for in-plant transport. Our state of the art products are being produced to highest standards in our own production facility.
