

T17 Heavy-Duty Battery Rider Scrubber

High Pressure Washer

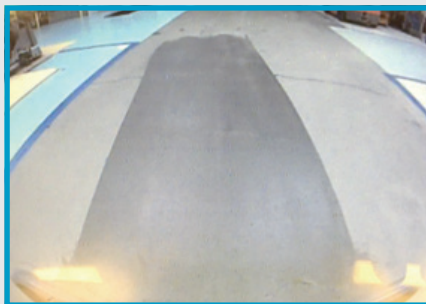

Electric High Power Washer

First on-machine electric powered pressure washer in the industry
2500 psi with flow rate up to 7,6 L / minute delivers a powerful spray to clean tough soils on the floor
Long spray allows for cleaning of tall vertical surfaces
Eliminates the need to have a separate pressure washer
The machine's water pick-up system makes water removal quick and easy

Pro-Panel™

Pro-ID™

Allows the supervisor to tailor machine controls to a specific operator
Prevents unauthorized use and allows speed to be set for each operator

Pro-Check™

Provide a means for supervisors to ensure that a check list is completed before machine is operational

On-Board/On-Demand videos

Enables operator to easily learn how to operate the machine and perform routine maintenance

Rear View Camera with PerformanceView™

View cleaning performance during operation
See behind the machine in reverse to avoid equipment and facility damage

Language Settings

User interface available in 28 languages

Zone Settings™

Allows supervisor to program machine's settings for specific zones of the building

Clogged Filter Indicator

Alerts operator when the sweeper filter needs to be shaken maintaining indoor air quality

Screen Lockout

Prevents accidentally touching the screen and unintentionally changing machine configurations
Rear View camera remains active
Unlock screen quickly with one touch of unlock button
