PASSION FOR INNOVATION

A history of success, based on competence, reliability and passion for innovation has enabled the company to look to the future and develop its machines for ever-expanding technology.

We are the only company on the market to offer innovative and exclusive patents, such as the touchscreen, which allows the vacuum cleaner to be connected to the corporate network, giving the company the opportunity to qualify for Industry 4.0.

Every iVision's vacuum cleaner is CE Certified. Upon request a unit can also be certified ATEX. The filtering classes available are L, M and H.

THE SECRET TO OUR SUCCESS

THE ADVANTAGES OF A PARTNERSHIP WITH IVISION

- As a small/medium company, iVision brings significant advantage for the customers and trading partners: every system is thoroughly studied by our attentive technicians to ensure a best practice solution. iVision offers excellent solutions, not only in terms of performance, quality, design and reliability, but also completely newly customized extraction systems, which can meet the needs of small craftsmen as well as those of Industry 4.0.
- Design is always in our mind, research for details, and the use of the best materials to produce a simple but reliable and powerful product.
- Containers can be of various sizes and shapes, from smaller models that are easily removable to large containers up to 1000 Lt. Where required, cyclone pre-filters that help extend the life of the filters are provided.

AMERICAN BRANCH

IVISION VACUUM LLC

After having increased its sales network in the USA, iVision has consolidated its presence inside of the American market, celebrating the opening of its American branch in Fort Lauderdale. Created with the objective of designing new strategic assets, directly managing the commercial activities at the local level and providing full assistance to sales, the branch has a showroom where customers can touch by hand the quality and innovation of iVision products.

iVision, Italian excellence in the world!
