Volumetric Glassware with QR-code

Glassco has recently launched its **QR coded** volumetric flasks both in **ASTM**, **ISO** and **ASTM** standards. This is available in individual certified volumetric flasks and batch certified volumetric flasks. All the volumetric flasks are made from ASTM E 438 TYPE 1 CLASS A BORO 3.3 GLASS which is chemically inert and thermal shock resistant. All Volumetric wares are calibrated exceeding the demands of applicable standards. As all the manufacturers worldwide normally include the batch / individual certificate in the pack and many a times it is lost while using the glassware, the only option left to you is to either contact the manufacture or to make a grinding effort to go on the manufacturers website locate the applicable link and download the certificate. To make it most convenient for you, now with the **GLASSCO QR coded volumetric flasks** all you have to do is to scan the QR CODE from your mobiles with **QR code scanner (NeoReader)** and it will not only give you certificate of calibration (**individual /batch**) but will also give you information of certificate of compliance and the products user manual.

Instruments

A collection of laboratory instruments is displayed on a dark surface. In the center, a 2000ml glass beaker filled with a yellow liquid sits on a white platform scale. To its left, another 2000ml beaker with yellow liquid is on a magnetic stirrer. To the right, a third 2000ml beaker with yellow liquid is on another magnetic stirrer. In the foreground, a black mini-centrifuge is visible. To the left of the scale, there is a tray containing several small vials or test tubes. The background shows more laboratory glassware, including a round-bottom flask and a beaker, and a magnetic stirrer with three orange knobs. The overall scene is dimly lit, with the instruments and their contents highlighted.
