

AUTOCAD

- Learn AutoCAD Quickly and Easily

ESSENTIALS

Course Description:

For the inexperienced user of AutoCAD, this course is a thorough introduction to the functionality of the program. It will enable you to work professional and in debt with a wide range of tools within the program.

You will achieve the skills to work independently with medium sized projects, based on a practical and theoretical knowledge.

Key features during the course:

- User interface and navigation. File usage.
- Drawing commands and how to use the tools in a work related manner.
- How to edit and modify a drawing.
- Properties related to the drawing
- Annotation. Learn how to use Dimensions, Hatch, Texts, Annotation Scale.
- Understanding the principles for Layout, Plot Configuration and Plot Style Tables.

Qualifications and target group:

This course is designed for new users of AutoCAD. You will be guided through the essential tools in AutoCAD and at the same time archive knowledge of “best practice” on how to work with 2D designs in Autodesk AutoCAD.

A basic knowledge of how to use Windows and a PC would be expected. Any qualifications or work related experience with 2D designs and architecture would be an advantage. The target group for this course is focused on people wanting to experience the amazing CAD world.

Ready for a new job:

New CAD products are constantly emerging, supplementing AutoCAD in many ways. But even though, partners working in the mechanical and building industry are still using AutoCAD, acknowledging the unique flexibility the program offers. And because of this AutoCAD will always play a key role in the CAD industry. Knowledge of how to use AutoCAD is an important qualification for most employers and would make you a team player right away at the office.

This AutoCAD course will help you qualify for jobs like: Architect, Building Constructor, Interior Designer, Landscape Architect, Engineer, and Technical Assistant.

ALL THE PRACTICAL

- When you are participating our courses

COURSE OUTLINE

The schedule of 37 lessons per week is divided between Classroom teaching, online classes and independent learning. Our virtual learning environment system LMS, is integrated with our physical learning environment, and it includes web-based access to class content, grades, assessments, and other class tools. It is also a social space where students and teacher can interact through threaded discussions, live sessions or chat.

All students will receive a wireless laptop and must be returned on the last day of the course. All needed software will be preinstalled

Collaboration:

The course is offered by Via University College located in Aarhus, Herning, Holstebro, Horsens, Skive og Viborg). Also offering the course is KEA (Københavns erhvervsakademi) located in Ballerup and Hillerød. And at KursusCenter Vest located in Esbjerg and Haderslev or at Erhvervsakademi Sjælland located in Køge, Roskilde and Haslev. All above in collaboration with Cadskolen A/S.

Our course is based on various objectives taken from the study of "Bachelor of Architectural Technology and Construction Management". Also including objectives taken from the "AP Graduate in Production Technology" study. Our course is offered on a Master level.

Economy:

As an unemployed person, with the right to attend a self-elected 6 week course or study, all expenses are paid by the Danish "undervisningsministeriet". The total cost is 10.800 DDK. minus VAT. If you do not meet the above requirement an approval of this course is needed, as part of a jobplan. This is done at the local Jobcenter.

Enrollment and information:

Calls for enrollment and information. Cadskolen A/S, tlf. 72 14 66 33 or mail: info@cadskolen.dk

Look forward to:

Raise your level of knowledge with our team of Autodesk certified instructors.

Fulfill your preparation for an Autodesk certification

Fully detailed course material, that specifically targets your educational background

After completing the course you will receive an Autodesk Authorized Training Center diploma.
