Manual building site folding machines

PCL Range

Machine sizes available: 1m and 1.20 m

PCL1020A and PCL1270A

Ref. **PCL1020A**: High capacity, low weight!

DEMONSTRATION VIDEO
Channel "Jouanel Industrie"

Standard equipment

- Narrow folding beam: 15 mm
- Max folding angle: 143°
- Foldable and removable legs (1)
- Clamping beam lock with an eccentric

Features	PCL1020A	PCL1270A
Useful folding length (mm)	1 020	1270
Capacity zinc (mm)	0,8	0,7
Capacity S235JR steel (mm)	0,6	0,55
Clamping beam opening (mm)	60	60
Cutting device option	yes	yes
Beading accessory option	yes	yes
Dimensions (mm) - legs excluded	1 200 x 300 x 150	1 450 x 300 x 170
Net weight (kg) - legs included	39	53
Minimum fold width = 15 times the thickness		

Capacity of beading accessory with gear train* (mm)	ABH	
	1020A	1270A
Ø 14	0,8	0,7
Ø 16	1	0,8
Ø 18	1	1

* Capacity zinc or copper (in mm)

Space for Ref. BAL1020MAN

Options

- Beading accessory with 13 mm Ø rod capacity zinc 0,65 mm Ref. **BAL1020MAN** (2) only for Ref. **PCL1020A**
- Beading accessory equipped with gear train (3) 14, 16 or 18 mm Ø (Ø to be specified upon order)
Ref. **ABH14-1020, ABH16-1020, ABH18-1020** for Ref. **PCL1020A**
Ref. **ABH14-1300, ABH16-1300, ABH18-1300** for Ref. **PCL1270A**
- Guide rail (4) for roller shear:
Ref. **RCL1020MA** for Ref. **PCL1020A**
Ref. **RCL1270MA** for Ref. **PCL1270A**
- Roller shear Ref. **CCMA** (5) (guide rail required)
 - Handy, robust aluminum body
 - Tempered steel rollers for a longer lifespan
 - Guide rail and 2 grip handles ensure an accurate cut
 - Capacity zinc 0,8 mm

Manual building site folding machines

PCA Range

Folding machine PCA available in 2m

PCA2040

It's portable!

Standard equipment

- Folding beam with narrow 15-mm interchangeable tool in tempered steel
- Interchangeable 158° clamping beam tool in tempered steel
- Clamping beam operating lever on the right side of the machine (1)
- Clamping beam lock with an eccentric
- Angle scale (2)
- Folding beam crowning adjustment (3)
- Handle to lower or raise the machine (4)
- Two 200-mm Ø wheels for easy handling

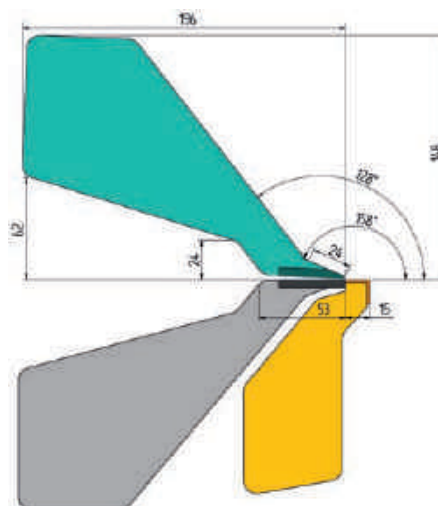

Note: To flatten folds on this model, using the OFP-180 hem closing tool is required (see additional equipment)

PCA2040 model shown with options

DEMONSTRATION VIDEO Channel "Jouanel Industrie"

Model PCA2040 folded, shown without options

PCA2040 Model folded, shown without options

Features	PCA2040
Useful folding length (mm)	2 040
Capacity zinc / 1050-H44 aluminum (mm)*	0,8
Capacity steel (mm)*	0,63
Clamping beam tool angle	158°
Clamping beam opening (mm)	60
Dimensions (mm)	2 330 x 650 x 1070
Dimensions when folded (mm)	2 330 x 650 x 640
Table height (folding machine completely unfolded) (mm)	900
Net weight (without accessories) (kg)	80

min. fold width = 15 mm

*not for flattening folds

Options (see details P16 to 18)

- Sliding back gauge type X - from 55 to 510 mm: 2 adjustable gauge arms Ref. **PCAB2040** 1 adjustable gauge arm Ref. **PCABS2**
- Aluminum beading accessory with gear train for 14 or 16mm Ø rods Ref. **ABA2040 (5)** (Please specify Ø upon order)
- Guide rail for roller shear Ref. **RCA2040MA**
- Roller shear Ref. **CCMA (6)**
- 180° Hem closing tool Ref. **OFP-180**

Manual building site or workshop folding machines

PCX Range

Machine sizes available: 1m, 2m, 2.50 m and 3m

In a workshop or on a building site, it can do everything!

The PCX machine structure is very sturdy and provides excellent folding quality on a building site or in a workshop

PCX2040A and PCX2540A

Standard equipment

- Narrow folding beam: 15 mm
- Clamping beam tool: 27°
- Cylinder to easily open the clamping beam
- Quick adjustment of the clamping beam opening
- Quick locking of the clamping beam by eccentric
- Adjustable table, clamping and folding beams for higher accuracy
- Graduated angle gauge for series folding
- Folding beam crowning adjustment
- Removable legs

Ref. PCX2040A shown with options

Ref. PCX2040A and PCX2540A

PCX1020

Standard equipment

- Narrow folding beam: 12 mm
- Clamping beam tool: 27°
- Cylinder to easily open the clamping beam
- Quick adjustment of the clamping beam opening
- Quick locking of the clamping beam with an eccentric
- Adjustable table, clamping and folding beams for higher accuracy
- Graduated angle gauge for series folding
- Folding beam crowning adjustment
- Removable legs
- Stretcher-type handling device

Ref. PCX1020 shown with options

Ref. PCX1020

Folding machine available with segmented clamping beam Ref. PCX1020T

Manual building site or workshop folding machines

PCX Range

PCX3080A

Standard equipment

- Narrow folding beam: 15 mm
- Clamping beam tool: 27°
- Cylinder to easily open the clamping beam
- Quick adjustment of the clamping beam opening
- Quick locking of the clamping beam with an eccentric
- Adjustable table, clamping and folding beams for higher accuracy
- Graduated angle gauge for series folding
- Folding beam crowning adjustment
- Removable legs

Ref. PCX3080A shown with options

Graduated angle gauge

Quick adjustment of the clamping beam opening

Features	PCX1020	PCX2040A	PCX2540A	PCX3080A

Manual workshop folding machines

PZX Range

Machine sizes available: 2 m and 2.5 m

Multipurpose, accurate and high-performance, the PZX folding machine is especially suitable to process small batches of zinc or steel parts, for roofing or cladding construction work.

Thanks to the sturdiness of its design, its excellent folding quality and its comfortable use on a daily basis, the PZX is truly ideal in terms of workshop equipment.

This machine is the first manual workshop folding machine developed in collaboration with an ergonomist: the central release of the folding beam offers optimal operator position and minimizes the effort required for sheet metal bending. Its numerous adjustment possibilities and additional equipment maximize productivity and flexibility, making it the ultimate workshop folding machine!

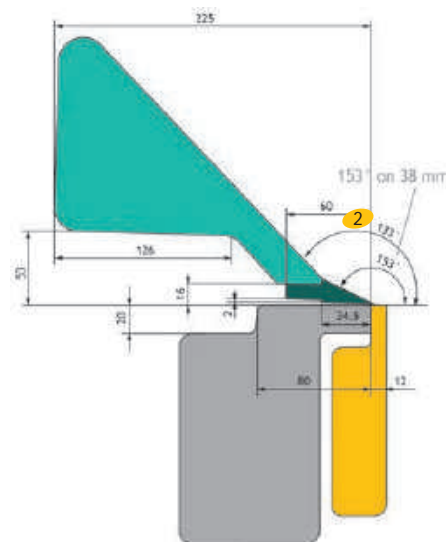

PZX2040 and PZX2540

Ref. PZX2040 shown with options

Standard equipment

- Ergonomic folding beam with narrow 12 mm-tool to make close reverse bends (ex. flashing) (1)
- Interchangeable clamping beam tool: 27° (2)
- Cylinder assists bending and ensures work reliability and rapidity
- Angle scale (3)
- Graduated angle gauge enabling an accurate stop of the folding beam for series folding (4)
- Clamping (5)/ opening foot pedal (6)
- Console and tool support (7) (left-hand or right-hand assembly)
- Operating lever of the clamping beam on the right side of the machine (8)

Features	PZX2040	PZX2540
Useful folding length (mm)	2 040	2 540
Capacity zinc / S235JR steel (mm)	1,2 / 1,0	1,2 / 1,0
Clamping beam opening (mm)	100	100
Dimensions (mm)	2 420 x 690 x 1 520	2 920 x 690 x 1 520
Table height (mm)	920	920
Gross weight (kg)	470	580

Minimum fold width = 15 times the thickness

www.jouanel.com

Manual workshop folding machines

PVX Range

Machine sizes available: 2 m and 3 m

Exist in manual version, semi-electric and segmented clamping beam

As with the PZX machines, the PVX manual folding machine is also one of the models designed with an ergonomic folding beam, suitable for daily work in workshops. The central release of the folding beam allows the operator an optimal position which minimizes the effort required for repetitive folding.

The sleek and robust engineering design of the PVX machine provides high rigidity for excellent folding quality as well as high accuracy, even with thicker sheets. Its numerous adjustment options and additional equipment provide even more productivity and flexibility of use.

PVX2040 and PVX3080

Ref. PVX3080 shown with options

Standard equipment

- Ergonomic folding beam with narrow 15 mm interchangeable tool for making close reverse bends (1)
- Interchangeable clamping beam tool: 27° (2)
- Cylinder assists bending and ensures work reliability and rapidity, rotation of folding beam on needle roller bearings
- Angle scale (3)
- Graduated angle gauge (4)
- Operation of the upper beam by clamping (5) / opening foot pedal (6) and with a lever on both sides of the machine (7)
- Vertical adjustment of the folding beam is easy using the graduated wheel, allowing the radius setting and facilitating reverse bends
- Console and tool support (8)
- Folding beam pins mounted on roller bearings

Features	PVX2040	PVX3080
Useful folding length (mm)	2040	3080
Capacity zinc / S235JR steel (mm)*	1,5/1,2	1,2/1,0
Clamping beam opening (mm)	110	110
Dimensions (mm)	2 738 x 795 x 1 215	3 775 x 795 x 1 215
Gross weight (kg)	620	850

* Capacity with standard tool of 15 mm

3 Angle scale

4 Graduated angle gauge

Options

- Additional narrow 12 mm-folding beam tool Ref. PVX-REG12-2040 / PVX-REG12-3080 (capacity - 30%)
- Additional wide 20 mm-folding beam tool Ref. PVX-REG20-2040 / PVX-REG20-3080 (capacity + 20%)
- Other options: see pages 16 to 18

Manual workshop folding machines with pneumatic assistance system

PVXPN

PVX-PN Folding machine available in 2m and 3m

Exist in semi-electric version

This model has all the advantages of the manual folding machines of the PVX range (robustness, rigidity of the machine, folding capacity, equipment, etc.) and a pneumatic assistance system on the apron.

This additional equipment allows a significant reduction in the effort required by the operator during bending and is particularly efficient for the processing of long and thick metal sheets. It offers an excellent alternative between a standard manual and electric folding machine.

PVX2040-PN and PVX3080-PN

Ref. PVX3080PN shown with additional cutting accessories

Standard equipment

- Ergonomic folding beam with 15-mm narrow tool to make close reverse-folds (1)
- Interchangeable clamping beam tool 27°
- Pneumatic bending assistance by cylinders (2) with handle control (3)
- Rotation of folding beam on needle bearing
- Graduated angle scale (4)
- Graduated angle gauge enabling an accurate stop of the folding beam to make series folding (5)
- Vertical adjustment of the folding beam enabling to change the folding radius and make easy the upper bend on beads - with graduated rolls
- Crowning devices of the folding beam and the table
- Quick adjustment of clamping beam opening height
- Clamping beam working by double clamping / loosening foot pedal for one-man operation from the middle of the machine (6)
- Clamping beam operating lever on both sides of the machine to let 2 operators work together for large sizes (7)
- Console and tool support (left-hand or right-hand assembly) (8)

Pneumatic assistance requires a compressed air connection: minimum flow 200 litres/minute, minimum 8 bars (compressor not supplied)

Features	PVX2040PN	PVX3080PN
Useful folding length (mm)	2 040	3 080
Capacity Zinc / Steel S235JR (mm)*	1,5 / 1,2	1,2 / 1,0
Clamp opening (mm)	110	110
Dimensions (mm)	2738 x 795 x 1205	3775 x 795 x 1215
Gross weight (mm)	720	990

* Capacities indicated with standard 15-mm folding beam

Options

- Additional narrow 12 mm-folding beam tool Ref. **PVX-REG12-2040 / PVX-REG12-3080** (capacity - 30%)
- Additional wide 20 mm-folding beam tool Ref. **PVX-REG20-2040 / PVX-REG20-3080** (capacity + 20%)
- Other options: see pages 15 to 17

Semi-electric workshop folding machines with pneumatic assistance system **PVXPEPN**

PVXPEPN Folding machine available in 2 m et 3 m

PVXPEPN folding machines with electric clamp release and pneumatic folding assistance provide greater operator comfort, ergonomics and speed.

PVX2040PEPN PVX3080PEPN

Ref. PVX3080PEPN

Pneumatic assistance requires a compressed air connection: minimum flow 200 litres/minute, minimum 8 bars (compressor not supplied)

Advantages

- Automatic release of the clamp after bending without using the pedal
- Pneumatic assistance device on the folding beam
- Easy-to-move foot pedal for clamping large-format sheets
- Flattening the hems is quick and effortless with the motorised clamp
- Clamp open height adjustable by operator
- Anti-crushing safety device

Équipements standards

- Ergonomic folding beam with 15-mm narrow tool to make close reverse-folds (1)
- Interchangeable clamping beam tool 27°
- Pneumatic bending assistance by cylinders (2) with handle control (3)
- Rotation of folding beam on needle bearing
- Graduated angle scale (4)
- Graduated angle gauge enabling an accurate stop of the folding beam to make series folding (5)
- Vertical adjustment of the folding beam enabling to change the folding radius and make easy the upper bend on beads - with graduated rolls (6)
- Quick adjustment of clamping beam opening height
- Clamp control with double pedal (clamping/release), for work with 1 operator in the centre of the machine (7)
- Clamping and folding beam tools with crowning device (8)
- Console and tool support (left-hand or right-hand assembly)

Features	PVX2040PEPN	PVX3080PEPN
Useful folding length (mm)	2040	3080
Capacity Zinc / Steel S235JR (mm)	1,5/1,2	1,2/1,0
Clamp opening (mm)	110	110
Power supply (V)**	220 V mono	220 V mono
Power (kW)	0,25	0,25
Dimensions (mm)	2 600 x 795 x 1 215	3 600 x 795 x 1 215
Gross weight (mm)	706	936

* Capacity with standard 15 mm-tool / ** Voltage choice to be specified upon order

Options

- Additional narrow 12 mm-folding beam tool Ref. **PVX-REG12-2040 / PVX-REG12-3080** (capacity - 30%)
- Additional wide 20 mm-folding beam tool Ref. **PVX-REG20-2040 / PVX-REG20-3080** (capacity + 20%)
- Other options: see pages 15 to 17

Semi-electric workshop folding machines

PVXPE Range

PVXPE folding machines with electric clamping beams have the same folding capacities as the PVX manual machines.

- The electric clamping beam lock gives the operator more comfort, ergonomics and faster working speed.
- The clamping beam releases automatically upon fold completion, no need for pedal activation
- Moveable foot operated control, more convenient for clamping large-sized sheets
- Flattening folds is easy and effortless with this motorized clamping beam
- Clamping beam height can be adjusted easily
- Security device prevents crushing

PVX2040PE and PVX3080PE

Ref. PVX3080PE

Standard equipment

- Ergonomic folding beam (1) with narrow 15 mm interchangeable tool for making close reverse bends
- Interchangeable clamping beam tool: 20° (2)
- Cylinder assists bending, ensures work reliability and rapidity, rotation of folding beam on needle roller bearings
- Graduated angle gauge (3)
- Angle scale (4)
- Clamping operated by foot pedal (5)
- Automatic clamping beam release once folding is complete
- Manual release operated by foot pedal (6)
- Vertical adjustment of the folding beam is easy using the graduated wheel, allowing the radius setting and facilitating reverse bends
- Console and tool support (7)
- Folding beam pins mounted on roller bearings

3 Graduated angle gauge

4 Angle scale

Features	PVX2040PE	PVX3080PE
Useful folding length (mm)	2040	3080
Capacity zinc / S235JR steel (mm)*	1,5/1,2	1,2/1,0
Clamping beam opening (mm)	110	110
Power supply (V)**	220 V single-phase	220 V single-phase
Power (kW)	0,25	0,25
Dimensions (mm)	2 600 x 795 x 1 215	3 600 x 795 x 1 215
Gross weight (kg)	706	936

* Capacity with standard 15 mm-tool

** Voltage choice to be specified upon order

Options

- Additional narrow 12 mm-folding beam tool
Ref. **PVX-REG12-2040** and **PVX-REG12-3080** (capacity - 30%)
- Additional wide 20 mm-folding beam tool
Ref. **PVX-REG20-2040** and **PVX-REG20-3080** (capacity + 20%)
- Other options: see pages 16 to 18

Manual workshop folding machines with segmented clamping beam

PVXT Range

PVX2040T and PVX3080T

Ref. PVX3080T

Standard equipment

- Quick disassembly of the segments with pull-device (1)
- Clamping beam with engraved segments (width of the segments)
- Left (2) and right corner segments (30 mm)
- Interchangeable clamping beam segmented tool: 20° (3)
- Automatic clamping beam lock
- Ergonomic folding beam (4) with narrow 15 mm interchangeable tool for making close reverse bends
- Cylinder assists bending and ensures work reliability and rapidity, rotation of folding beam on needle roller bearings
- Graduated angle gauge (5)
- Angle scale (6)
- Operation of the upper beam by clamping (7)/ opening foot pedal (8) and with a lever on both sides of the machine (9)
- Vertical adjustment of the folding beam is easy using the graduated wheel, allowing the radius setting and facilitating reverse bends
- Console and tool support (10)
- Support for segments (11)
- Folding beam pins mounted on roller bearings

1 Quick disassembly of the segments with pull-device

Features	PVX2040T	PVX3080T
Useful folding length (mm)	2040	3080
Capacity zinc / S235JR steel (mm)*	1,2 / 1	1 / 0,8
Clamping beam tool angle	160°	160°
Clamping beam opening (mm)	95	95
Useful segment height (mm)	120	120
Dimensions (mm)	2710 L x 800 l x 1400 H	3750 L x 800 l x 1400 H
Gross weight (kg)	670	915
Useful segment height (mm)	25, 30, 35, 50, 75, 75, 100, 150, 200, 200, 200, 300, 300, 300	25, 30, 35, 40, 50, 75, 75, 100, 100, 150, 150, 200, 200, 200, 250, 250, 250, 300, 300, 300

* Capacity with standard 15 mm-tool

Options

- Additional narrow 12 mm-folding beam tool Ref. PVX-REG12-2040 / PVX-REG12-3080 (capacity - 30%)
- Additional wide 20 mm-folding beam tool Ref. PVX-REG20-2040 / PVX-REG20-3080 (capacity + 20%)
- Other options: see pages 16 to 18

* Capacity with standard 15 mm-tool / ** Voltage choice to be specified upon order

Options

- Additional narrow 12 mm-folding beam tool Ref. **PVX-REG12-2040** and **PVX-REG12-3080** (capacity - 30%)
- Additional wide 20 mm-folding beam tool Ref. **PVX-REG20-2040** and **PVX-REG20-3080** (capacity + 20%)
- Other options: see pages 16 to 18

Manual workshop folding machines and electric clamping

PBS

Machine size available: in 2 m

Exist in semi-electric version

PBS
The reliability in all its forms

Exists as standard in manual version.
For electric clamping and segmented clamping beam tool: please contact us.

- Folding beam equipped with a narrow and interchangeable tool of 15 mm and a wide tool of 25 mm in order to increase the folding capacity (refer to table for wide folding beam)
- Adjustable angle gauge with scale from 0 to 160° enabling to make accurate and identical folds
- Interchangeable clamping beam tool for the assembly of special tools.
- Clamping beam lifted up by a pedal enabling to keep hands free
- Quick locking of the clamping beam by eccentric
- Horizontal adjustment of the folding beam for the folding radius
- Lateral release allowing the passage of a sheet metal edge lifted up by 50 mm or a hem of Ø 18 mm to the top and 20 mm to the bottom

Features	PBS2040-15	
Useful folding length (mm)	2 040	
Capacity (mm)	Wide 40mm folding beam tool	Narrow 15 mm folding beam tool
S235JR steel	1,5	1,0
1050-H44 aluminum / Zinc / Copper	2,0	1,2
Stainless steel	0,8	0,5
Galvanized steel	1,2	0,8
Clamping beam opening (mm)	80	
Dimensions (mm)	2 700 x 1 000 x 1 450	
Gross weight (kg)	680	

Minimum fold width: 15 times the thickness

Options: see pages 16 to 18

WORKSHOP BENCH AND BACK TABLES

Zinc workbench adapted to folding machine (6)

Length 2 090 x 1 500 mm
Table with incorporated setting tools for metal sheet tracing
3 storage levels and 4 racks

- For folding machine Ref. PBS2040, Ref. ETB2040

Workshop bench equipped with cutting accessories and clamping beam with guide rail (OPTIONS)

Back table for folding machine (7)

Table equipped with full lengthwise tool
Integrated and adjustable sliding back gauge

- Length 2 000 mm x 1 280 mm
- For folding machine Ref. PCX2040A, Ref. ETBX2040C gauge stroke 45 to 1000 mm
- For folding machine Ref. PZX2040, Ref. ETBX2040 gauge stroke 60 to 1000 mm
- For folding machines Ref. PVX2040, Ref. PVX2040PN Ref. PVX2040T, Ref. PVX2040PE, Ref. PVX2040PEPN, Ref. PVX2040TPE, Ref. ETBX2040V gauge stroke 60 to 1000 mm
- Length 2 500 mm x 1 280 mm
- For folding machine Ref. PCX2540A, Ref. ETBX2540C gauge stroke 45 to 1000 mm
- For folding machine Ref. PZX2540, Ref. ETBX2540 gauge stroke 60 to 1000 mm

BEADING ACCESSORIES

Beading accessory with gear train: 14, 16 or 18 mm Ø, type ABH and ABV (8)

(Please specify the Ø upon order)

- For folding machine Ref. PCX1020 Ref. ABH14-1020 / Ref. ABH16-1020 / ABH18-1020
- For folding machines Ref. PCX2040A and PZX2040 Ref. ABH14-16-2040 / ABH18-2040
- For folding machines Ref. PCX2540A and PZX2540 Ref. ABH16-2540 / ABH18-2540

CUTTING ACCESSORIES

RCS, RGS, RCA, RZX and RVX:

Guide rails (9)

(for CCMA roller shear)

- For folding machine Ref. PCX1020 , Ref. RCX1020MA
- For folding machine Ref. PCX2040A , Ref. RCX2040MA
- For folding machines Ref. PCX2540A and PZX2540, Ref. RCX2540A
- For folding machine Ref. PCX3080A, Ref. RCX3080MA
- For folding machine Ref. PBS2040, Ref. RGS2040A
- For folding machine Ref. PCA2040, Ref. RCA2040MA
- For folding machine Ref. PZX2040 and PZX2540, Ref. RZX2040A and RZX2540MA
- For folding machine Ref. PVX2040, Ref. PVX2040-PN and Ref. PVX2040-PE, Ref. RVX2040MA
- For folding machine Ref. PVX3080, Ref. PVX3080-PN and Ref. PVX3080-PE, Ref. RVX3080MA

Roller shear: CCMA (10) (guide rail required)

- Handy, robust aluminum body
- Tempered steel rollers for a longer lifespan
- Guide rail and 2 grip handles ensure an accurate cut
- Capacity zinc 0,8 mm
steel 0,7 mm
1050-H44 aluminum 0,8 mm

DEMONSTRATION VIDEO
Channel "Jouanel Industrie"

PCA, PCX, PZX, PVX, PBS

MISCELLANEOUS

180° Hem closing tool OFP-180

for regular folding over the whole length

- From a seam at 135° it enables a plating at 180°
- Sets of 4 rollers
- Adjustable final roller for a perfect setting, according to material and thickness
- Folding capacity 0,8 mm steel

Segmented folding machines

PCXT Range

PCX1020T

Standard equipment

- Narrow folding beam 12 mm to facilitate close backfolds
- 12 segments engraved by width, removable by pull tabs including left and right corner segments (width 75 mm)
- Cylinder to easily open the clamping beam
- Quick adjustment of the clamping beam opening
- Adjustment of the curvature of the apron
- Folding beam vertical adjustment wheels (allows adjustment of the bending radius)
- Graduated angle gauge for series folding
- Angle scale for bending in a row
- Quick clamping by eccentric
- Lateral clamp operating lever, on the right
- Removable legs

Features	PCX1020
Useful folding length (mm)	1 020
Capacity stainless steel / 1050-H44 aluminum (mm)	0,7 / 1,5
Capacity S235JR steel (mm)	1,5 / 1,2
Clamping beam opening (mm)	80° (segment front) 65° (segment rear)
Dimensions (mm)	1270 x 660 x 1110
Gross weight (kg)	116

Minimum fold width = 15 times the thickness

Segments distribution - PCX1020T

No of segments : 12										
Width (mm)	25	30	35	40	45	50	75*	100	200	270
Quantity	1	1	1	1	1	1	3	1	1	1

*For width of 75 mm: 1 straight segment, 1 left corner segment and 1 right corner segment

Ref. PCX1020T
shown with foot pedal option

Option:
Set of 2 sliding back gauges, equipped with 4 adjustable and retractable stop fingers

Segmented folding machines

HS23, HS33 Range

Machine sizes available: 1 m and 1.25 m

On the top or on the bottom, or bend all 4 sides!

This powerful and handy segmented folding machine is specially designed for folding parts requiring complex shapes. With various positioning possibilities of the upper and lower segments, enjoy the freedom of manufacturing different types of boxes, for roofing, cladding, chimney siding and trim, etc.

HS23, HS33 Segmented clamping beam, table and folding beam

Standard equipment

- Segmented clamping beam, table and folding beam (1)
- Clamping beam with engraved segments (width of segments)
- Clamping foot pedal keeps hands free during positioning and adjustment of the part to be folded (2)
- Automatic clamping beam lock (3)
- Left (4) and right corner segments
- Folding beam height adjustment to change the folding radius according to the thickness of the material (5)
- Adjustment of the height and the clamping pressure (6)
- Angle gauge adjustment for series folding
- Segments in tempered steel
- Two handles to operate the folding beam
- Key for segment removal included

Ref. HS23

DEMONSTRATION VIDEO
Channel "Jouanel Industrie"

Examples of works made with ref. HS23 or HS33

Features	HS23	HS33
Useful folding length (mm)	1 020	1 270
Capacity stainless steel / 1050-H44 aluminum (mm)	1,2 / 2,5	1 / 2
Capacity S235JR steel (mm)	2	1,5
Maximum folding angle	150°	150°
Clamping beam opening (mm)	50	50
Height of the table segments (mm)	54	54
Height of the folding beam segments (mm)	98	98
Useful segment height (mm)	100	100
Dimensions (mm)	1 350 x 850	1 600 x 900
Gross weight (kg)	385	415

Segments distribution - HS23										
No of segments: 12										
Width (mm)	25	30	35	40	45	50	75*	100	200	270
Quantity	1	1	1	1	1	1	3	1	1	1

*For width of 75 mm: 1 straight segment, 1 left corner segment and 1 right corner segment

Segments distribution - HS33											
No of segments: 13											
Width (mm)	25	30	35	40	45	50	75*	100	200	250	270
Quantity	1	1	1	1	1	1	3	1	1	1	1

* For a width of 75 mm: 1 straight segment, 1 left corner segment and 1 right corner segment

Option: set of two sliding back gauges

- Ref HS23B and Ref HS33B, with a range of 60 to 750 mm, for HS23 and HS33 folding machines. The back gauge arms allow the metal sheet to be positioned to the desired dimensions and support it in the back. Each back gauge arm has 4 retractable tilting stops that can be adjusted and used independently. Minimum distance between 2 fingers (mm): 48 mm

FOLDING MACHINES

Manufacturer since 1948

Universal electric folding machines

Suitable for thin or thick sheets

PTL - PTS Range

PTL folding machines available in sizes: 2 m, 2.60 m and 3 m

PTL

- PTL2100-18
- PTL2600-15
- PTL3100-12

Clamping beam tool radius: 1.0mm
2 and 3mm radius also available on demand

Numerical control

PTL - PTS Range

STANDARD "SIEMPRO" CNC Simplified numerical control

- 15" colour touchscreen, adjustable
- Possibility to work either in manual mode or in automatic mode after quick creation of the programs
- Management of the metal sheet position before folding
- Management of rotating, flipping and turning over parts
- Unlimited creation of programs
- Fast duplication of the programs
- Safe access secured by password depending on the operator's tasks (programming, use of program) or without password
- Counting up and down of produced parts
- Folding angle correction in manual mode according to metal elasticity (type, thickness)
- Maintenance management by numerical control (automatic reminder of periodical interventions, intervention history)
- Remote maintenance and updates via Ethernet connection (RJ45)
- Multilingual CNC

Optional equipment SIEMPRO

- Electric back gauges PTSL-BAE (option to be specified upon order)

Electric back gauges BAE	PTL 2100-18	PTL 2600-15	PTL 3100-12
Back gauges ranges	10 to 750mm/ 10 to 1000mm/ 10 to 1500mm		
Back gauge speed	300mm/s forward 500mm/s reverse		
Number of back gauge fingers	6	8	8
Min. distance between 2 fingers (mm)	100mm		

- CNC control of the clamping beam lock and precise height adjustment (Z-axis) Ref. PTSL-SIEMPRO-Z (to be specified upon order)

- Automatic angle controller, maximum thickness 1mm, Ref. PTSL-CORANG-SIEMPRO (to be specified upon order)

PROFILES Examples

Numerical control

DYNAMIC GRAPHIC CNC

Very intuitive numerical control to easily draw profiles on the touchscreen

- 17" touchscreen with mobile protection cover
- Different access codes for programmer/maintenance/execution
- Automatic management of the clamping beam position (opening and closing)
- Folding beam speed control
- Back gauge speed control
- SmartPath software: automatic analysis of profile feasibility, several sequences suggested
- Calculation of collision prevention with the clamping beam
- Library of profile parts with a quick search
- Programming choice, by table or profile drawing
- Creation, duplication and modification of programs
- Stamping without moving the folding beam, choice of three intervals between successive bends
- Automatic management of flipping and turning over parts
- Counting up and down of the produced parts
- Possibility to save all data via USB port
- Remote diagnosis and update via Ethernet connection (RJ45)
- Web application « EDGE »
- Multilingual CNC

VIDEOS

www.jouanel.com

Automatic analysis of profile feasibility, several sequences suggested

Automatic management of rotating, flipping and turning parts over

Create curved shapes with stamping mode

Web application EDGE

With only a tablet or connected PC!

With the EDGE web application, you can, from a PC or a tablet, draw your parts to be folded, check their feasibility and export them directly to the graphic CNC of your folding machine Up to 20 users at the same time

- No more mistakes when relaying parts to be folded
- Transmits needs to the folding workshop in real time
- Immediate analysis of the profile feasibility outside the workshop
- Digital profile library with sorting options (building sites, customers...)

Optional equipment GRAPH

- Bending angle springback mode (angle correction), maximum thickness 1mm, Ref. PTSL-CORANG-GRAF (to be specified upon order)

Equipment comparison table

PTL - PTS Range

Equipment included

Folding beam crowning device (depending on the model)

Adjustment of the folding radius

Electromechanical angle gauge

Mode selection: 1 or 2 operators

Optional equipment

Standard SIEMPRO CNC
Ref. PTSL-CNC-SIEMPRO

Dynamic graphic CNC
Ref. PTSL-CNC-GRAF

Electric back gauge, maximum range 750, 1000 or 1500mm - Ref. PTSL-BAE

Safety light curtains - Ref. PTSL-SPEED-Z

Control console on swivel arm
Ref. PTSL-CNC-POT

Manual sliding back gauge, maximum range 750mm - Ref. PTL-BAM

Pneumatic conical folding,
manual adjustment

Control pedal on ground rail
Ref. PTSL-PEDRAIL

Retractable manual roller shear
in cutting position, Ref. PTSL-CCM

Folding beam with clearance for PTS:
PTSL-TDI

Extra long folding machines 4 to 12 metres

PGL Range

Machine sizes available: 4, 6, 8, 10 and 12 m

PGL

- Welded steel construction, machined and heavy-duty to guarantee high rigidity
- Useful folding depth: 1250 mm (gooseneck)
- 30 mm folding beam
- Interchangeable clamping beam tool: 40°
- Clamping beam opening: 200 mm
- Automatic adjustment of the gooseneck to adapt the clamping beam position to the thickness of the metal sheet used (for models of Capacity S235JR steel: 2 and 3 mm)
- Additional interchangeable folding beam tool 15 mm (42CD4)
- Double operator control
- CE Conformity

Note: Machine Ref. **PGL** does not work without numerical control

Choice of numerical control

Numerical control SIEM-PRO

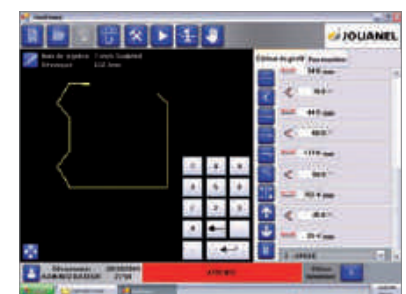

- 10" colour touchscreen (OPTION: 15" touchscreen)
- Access code programmer / maintenance / execution
- Automatic control of back gauge, stroke from 25-1250 mm, with double back gauge fingers
- Automatic speed control of the back gauge
- Automatic operator commands given, indicating when to rotate, flip and turn parts over
- Count and countdown of produced parts
- Angle correction control (manual input) according to the thickness and the material
- **Remote assistance and updates via Ethernet connection (RJ45)**
- **Bending angle springback mode Ref. COR-ANG-CN (OPTION)**

Touchscreen views
Ref. **SIEM-PRO**

Dynamic graphic numerical control PGL-GRAPH

- Dynamic graphic 19" colour touchscreen with mobile protection box
- Access code for programmer/maintenance/execution
- Safe workstation with safety light curtains activated, allowing fast and safe closing and locking of the clamping beam (standard EC 2009)
- Material library
- Automatic analysis of profile feasibility, several sequences suggested
- Parts library: large program storage capacity
- Automatic creation of programs in graphic mode
- Choice to program by drawing a profile, or by inputting bends step-by-step
- Automatic control of the clamping beam position (opening and closing)
- Folding beam speed control (90° max/second) and automatic folding angle correction (manual input) depending on material thickness
- Duplication and modification of programs
- Stamping without moving the folding beam, choice of three intervals between successive bends
- Folding simulation with calculation of collision prevention with the clamping beam
- Automatic operator commands given, indicating when to rotate, flip and turn parts over
- Count and countdown of produced parts
- Electric back gauge with 2 positions in automatic management
 - Accuracy ± 0.1 mm
 - Automatic speed control
 - Back gauge stroke 25 to 1300 mm
 - Forward speed 300 and reverse speed 500 mm/s
- **Remote diagnosis and updates via Ethernet connection (RJ45)**
- **Bending angle springback mode Ref. COR-ANG-PGL (OPTION)**
- Web application « EDGE » to create programs remotely and export them to the folding machine

Drawing of a profile directly on the screen

Large program capacity

Extra long folding machines 4 to 12 metres

PGL Range

Options

- 15" Colour touchscreen for numerical control Ref. SIEM-PRO
- Bending angle springback mode (angle correction), max. thickness 1 mm:
 - Ref. COR-ANG-CN for numerical control Ref. SIEM-PRO
 - Ref. COR-ANG-PGL Graphic dynamic numerical control Ref. PGL-GRAPH
- Additional double back gauge fingers **1** (to be specified upon order)
- Pneumatic device for conical folding **2**, easily makes interlocking profiles
- Hydraulic roller shear Ref. PGL-COUT **3**
- Equipped with removable sheet support for wide strips
- Adjustable angle and blade clearance depending on material thickness
- Capacity S235JR steel: 1.5 or 3 mm
- Worktable on wheels
- 4 000 x 1 000 x 930 mm Ref. PGL-TABLE4
- 6 000 x 1 000 x 930 mm Ref. PGL-TABLE6

The folding radius is equal to three times the thickness of the sheet within the maximum capacity of use.
Minimum fold width = 15 times the thickness
* Voltage choice to be specified upon order

Press brakes

PPS Range

PPS

Réf. PPS3080

Standard equipment

Sturdily constructed, the press brake is equipped with a heavy-duty torsion rod ensuring that the movable sliding block is perfectly parallel while lowering mechanically and increasing in hydraulic pressure.

- Removable and adjustable work table for high accuracy and durability
- Hydraulic power unit with double safety stops and adjustable pressure
- Metal sheet support up to 500 mm, adjustable for work comfort (1)
- The back gauge, mounted on a slide for pieces of small width, is height-adjustable (2), the depth is adjustable with a micrometrical screw (3) for high accuracy. The gauge fingers are retractable. (4)
- Numerical control with touchscreen (5) to control axis X and Y (several thousand programs, 80 folds each). Save and create programs, which can also be uploaded by USB stick.
- Quick and easy die turning (6) (7)
- Various dies depending on the model (see diagram)
- Punches: 86° radius 0.6 mm (8), length 550 and/or 800 mm, depending on model
- Safety light curtains located in front: class 4 (9)
- Foot switch (10)
- Power supply 400 V three-phase + neutral

Rack-and-pinion operated back gauge, counter with digital

Standard equipments

- 300 mm table with a 650 mm graduated squaring gauge on the left side
- The tabletop is engraved in 10 mm increments for easy measuring
- Back gauge with rack-and-pinion from 15 to 500 mm for perfect parallelism, counter with digital display (1)
- Extendable table front supports large sizes
- Rubber protector on automatic sheet clamping beam for trace-free cutting (2)
- Monobloc blades reversible once
- Controls within reach along the whole length of the machine
- Slanted collecting tray returns cut sheets to the front (3)
- Table height: 880 mm

Features	CGM2030-10
Useful cutting length (mm)	2030
Capacity S235JR steel (mm) *	0,4 - 1,0
Capacity zinc (mm) *	0,4 - 1,2
Dimensions (mm)	2400 x 1360 x 1 250
Weight (kg)	590
* min. - max.	

Manual guillotine shears

CGM Range

Machine sizes available: 1 m, 2 m, 2,5 m et 3 m

Simple and accurate, the manually-operated CGM guillotine shears will efficiently meet your workshop cutting requirements for thin sheet metal.

With a cutting accuracy equal to an electric model, this machine will easily find its place in the workshop, without cost of installation. Its sturdy, low-maintenance mechanical design makes a sustainable and durable investment. Its flexible and balanced cutting lever make it pleasant to use on a daily basis.

CGM1050, CGM2050, CGM2550 and CGM3080 with manual rack-and-pinion back gauge

Model shown
Ref. CGM2050 with options

Standard equipment

- The tabletop (300 mm wide (1) x 800 mm high) is engraved in 10 mm increments to simplify cutting without the back gauge
- Extendable table front (2) (+480 mm) supports large sizes
- Extendable back sheet support: 120 mm (excludes Sheet holding plate option)
- Graduated squaring gauge, 300 mm on the left and 500 mm on the right (except for CGM3080: 1000 mm on the right) (3)
- Automatic clamping system
- Monobloc blades reversible once
- 2 lateral lever arms with gear train to cut thicker sheets effortlessly
- Slings rings

Options

- Front operated electric back gauge with 15-500 mm cutting range, adjustable to 1/10 mm, for easy precision cutting, Ref. **CGS-BAS**
- Sheet holding plate: the back gauge, manual or electric, can be equipped with a sheet holding plate for large dimensions and thin sheets, Ref. **CGS-PST (2)**

Electric guillotine shears

CGI-A-BCREM Range

Machine sizes available: 2 m, 2.5 m and 3 m

The new generation of electric shears, CGI-A, meets the quality requirements inherent to the metal building envelope and industrial metal sheet working businesses. In addition to its modern construction, the CGI-A was designed and manufactured especially for intensive use, such as batch production. With a sturdy heavy-duty structure, its high output and cutting quality make it one of the most efficient shears on the market today.

CGI2050A-BCREM, CGI2550A-BCREM and CGI3080A-BCREM with manual rack-and-pinion back gauge

Model shown
Ref. CGI3080A-BCREM
with options

Standard equipment

- The tabletop (300 mm wide (1) x 800 mm high) is engraved in 10 mm increments to simplify cutting without the back gauge
- Extendable table front (2) (+480 mm) supports large sizes
- Extendable back sheet support: 120 mm (excludes Sheet holding plate option)
- Graduated squaring gauge, 300 mm on the left and 500 mm on the right (3)
- Automatic clamping system
- Foot switch
- Monobloc blades reversible once
- Cut counter with reset
- Safety light curtains provide safe access to the back of the machine (4)
- Powerful LED cut line indicator built into the sheet holding system (permanent lighting, better visibility) (5)
- Sliding rings

Electric guillotine shears

CGI-A-BCAV Range

Manual back gauge with belt drive

- Range from 5 to 750 mm
- Front-operated by adjustment wheel (6)
- Digital display indicates back gauge position, accurate to a tenth of a millimeter
- Conical adjustment to slant the back gauge, with a counter (accurate to ± 0.1 mm) (7)

Options

- Left squaring gauge, 1000 mm (instead of 500 mm)
- Automatic sheet holding plate, Ref. **CGI-A-PEIGNE**
- Large portable tray, on swivel casters with brakes, has two positions for collecting cut sheets up to 750 mm wide, Ref. **CGM-BL**
- Machine with 220V power supply (instead of standard 400V three-phase)

Electric guillotine shears

CGI-A-BAE Range

Machine sizes available: 2 m, 2.5 m, 3 m and 4 m

The different models of electric shears CGI-A know how to meet the quality and efficiency requirements of a professional workshops. Designed for all types of cutting works in the businesses of metal protection of buildings and industrial metal sheet working (i.e. HVAC, thermal insulation), the new CGI-A shear is a robust machine which combines an excellent cut quality and a high speed of work. The multiple functions of the CNC controller, fully developed by Jouanel Industrie, make it one of the most efficient shears on the market today.

CGI2050A-BAE, CGI2550A-BAE, CGI3080A-BAE and CGI4080A-BAE with electric back gauge, front-operated

DEMONSTRATION VIDEO
Channel "Jouanel Industrie"

Model shown
Ref. CGI3080A-BAE
with options

Standard equipment

- The tabletop (300 mm wide (1) x 800 mm high) is engraved in 10 mm increments to simplify cutting without the back gauge
- Extendable table front (2) (+480 mm) supports large sizes
- Extendable back sheet support: 120 mm (excludes Sheet holding plate option)
- Graduated squaring gauge, 300 mm on the left and 500 mm on the right (3)
- Automatic clamping system
- Foot switch
- Monobloc blades reversible once
- Cut counter with reset, for daily or cumulative total of cuts completed
- Safety light curtains provide safe access to the back of the machine (4)
- Powerful LED cut line indicator built into the sheet holding system (permanent lighting, better visibility) (5)
- Sliding rings

Rate (cuts / min)	25	25	25	25

* Voltage choice to be specified upon order / 220 V power supply also an option

Electric guillotine shears

CGI-A-BAE Range

Electric back gauge

- Range from 5 to 750 mm
- Conical adjustment to slant the back gauge, with a counter (accurate to ± 0.1 mm) (6)
- Back gauge with numerical control

Numerical control with 7"-16:9 color touchscreen

- Program several lengths and quantities
- Cutting length adjustment, to increase the cutting rate of small parts
- Maintenance menu informs the operator of preventative maintenance needed, depending on the cumulative cut count
- Remote assistance available from our factory via Internet
- Cut counter with reset, for daily or cumulative total of cuts completed
- Password protection locks machine, with several levels of access (operator, maintenance, administrator)

Operator selection:

- **Manual mode:** 1 back gauge movement, several cuts
- **Program mode:** each program can be named, saved, and contains several back gauge movements and several cuts which will automatically follow one another during production
- **Automatic mode:** run program, which were previously created in the program menu.

Numerical control screen display "Manual mode"

Numerical control screen display "Menu Auto"

Options

- Left squaring gauge, 1000 mm (instead of 500 mm)
- Automatic sheet holding plate, Ref. **CGI-A-PEIGNE**
- Large portable tray, on swivel casters with brakes, has two positions for collecting cut sheets up to 750 mm wide, Ref. **CGM-BL** (excludes 4-meter model, Ref. **CGI4080-BL**)
- Machine with 220V power supply (instead of standard 400V three-phase)

Electric guillotine shears

CGI-BAE Range

Machine sizes available: 3 m et 4 m

Along with its strong and sturdy construction, this new range of electric guillotine shears CGI is equipped with a heavy duty motor providing a high cutting capacities, suitable for industrial metal sheet working (cladding, industrial building, etc.).

With its multiple functions of the CNC controller and rich standard equipment this machine offers an excellent productivity as well as high comfort of work.

CGI33-BAE et CGI42-BAE with electric back gauge, front-operated

Model shown
Ref. CGI33-BAE
with options

Standard equipment

- Front table, 435 mm wide, working height 875mm
- Flexible front sheet supporting plates in stainless steel, 400 mm long (1)
- Front support arms, 1000 mm (2), with front roller (3) to easily lay the sheet on the table
- Squaring arm in stainless steel (4), length 1000 mm, placed on the right side of the machine, with front roller (5)
- Automatic sheet clamping system with rubber protection (protects and holds the sheet)
- Blade beam on self-lubricating rails
- Once-piece blades, 4 times reversible before sharpening
- Manual adjustment of the blade gap with position indicator acc. to the thickness to cut
- Powerful LED cut line indicator built into the sheet holding system (permanent lighting, better visibility)
- Control with foot-switch or with button from the console
- Control console on swivel (6) to grant maximum user comfort to the operator
- Safely light curtains provide safe access to the back of the machine
- 2 slinging rings
- Guaranteed French origin Label - CE-conformity

* Choice of the voltage to be specified with the order / possible 220 V power supply as an option

Electric guillotine shears

CGI-BAE Range

Electric back gauge

- Electric back gauge controlled by the CNC, range from 5 to 750 mm
- Fast moving back gauge
- Conical adjustment with counter to slant the back gauge for angle cuts (accurate to ± 0.1 mm)

Numerical control

- Numerical control with 7" color touchscreen
- Intuitive and user-friendly programs
- Rapid creation of programs, sorted by customer or building sites
- Quick programming several lengths and quantities
- Automatic menu for serial production or manual for single cuts
- Cuts counter for daily or cumulative total of cuts completed with reset possibility
- Maintenance menu with indication of preventative maintenance
- Remote maintenance and updates via Ethernet connection (RJ45)

Options

- **Table, arms and squaring gauge equipped with brushes (1) to prevent from marking sensitive materials**

Ref. CGI33-BRO-AVANT, CGI42-BRO-AVANT

Front sliding plates and support arms in stainless steel, with protection brushes against scratches

- 6 plates for Ref. CGI33, 8 plates for Ref. CGI42

Length 400mm, width 390 mm

- 3 front arms for Ref. CGI33, 4 arms for Ref. CGI42

- **Table, front arms and squaring gauge with ball casters (2)**

Ref. CGI33-BILLES-AVANT, CGI42-BILLES-AVANT

Brushes replaced by ball casters, inserted the various sheet supports, to offer effortless handling and rotation of large-sized sheets with a simple push.

- **Sheet holding plate with pneumatic drive***

Ref. CGI33-PEIGNE, CGI42-PEIGNE

Pneumatic and strengthened sheet holding plate, supports large-sized sheets.

Connected to the lowering of the blade, it also carries the sheets to the front in the collecting tray once the cut is made.

* This option requires compressed air supply of 6 bars, please consult us

- **Pneumatic sheet holding plate with brushes* (3)**

Ref. CGI33-PEIGNE-BRO, CGI42-PEIGNE-BRO

Pneumatic sheet holding plate with brushes, supports large-sized sheets. Connected to the blade motion, it also carries the sheets to the front in the collecting tray once the cut is made.

The holding plate is equipped with brushes to protect sensitive materials against marking when lowered into the collecting tray.

* This option requires compressed air supply of 6 bars, please consult us

- **Large portable sheets collecting tray on swivel casters (4)**

Ref. CGI33-BL, CGI42-BL

Strengthened portable tray with brakes, to collect sheets up to 750mm wide from the front of the machines. This tray can be lifted with a forklift thanks to two dedicated spaces in its frame, enabling easy handling once loaded.

OPTIONS features		
Automatic sheet holding plate	CGI33-PEIGNE or CGI33-PEIGNE-BRO	CGI42-PEIGNE or CGI42-PEIGNE-BRO
Max. distance between 2 fingers (mm)	380	380
Min. distance between 2 fingers (mm)	60	60

Max. width of sheets (mm)	750	750
Sheets collecting tray on casters	CGI33-BL	CGI42-BL
Number of casters with brakes	6	6

Hydraulic guillotine shears

CHS Range

Machines available from 2 m to 4 m

With capacities from 0.6 to 16 mm and lengths from 2 to 4 meters, CHS shears are suitable for all sorts of applications: roofing, cladding, metal construction, locksmithing, metalwork, tinsmithing, HVAC±

Hydraulic guillotine shears: CHS with numerical control

- Manual adjustment of blade gap on the side of the machine
- Electric back gauge from 20 to 800 or 1000 mm (depending on model), retractable at the end of the stroke
- Hardened steel blades with 4 cutting edges
- Self-adjusting gauge for each cut
- Program adjusts speed automatically acc. to scheduled motion
- Cut counter with reset, for daily or cumulative total of cuts completed
- Large program capacity - 10 sequences per program (back gauge and number of parts)
- Manual mode selection possible
- Numerical control with 7"-16:9 color touchscreen
- Hour counter for routine machine maintenance follow-up
- Operator and maintenance access codes
- Continuous cut with programmable pauses
- Powerful built-in LED cut line indicator
- Cutting length adjustment on touchscreen
- Safety light curtains provide safe access to the back of the machine (1)
- 1m front squaring gauge includes graduated tool, T-shaped slot with retractable mechanism for easy sheet metal insertion (2)
- Front support arms (3)
- Ball transfer table (4)
- Grill with hand wells for narrow strips (5)
- CE Conformity
- Remote assistance (First time use, updates, diagnostic)

Electric beading machines

BAGPRO Range

Machine sizes available: 2,04 m - 3,04 m - 4 m

Available in 6 metres: please contact us

Electronic winding control timer and reset allows the operator to precisely adjust bead opening and make perfectly identical products in repetitive manufacturing.

BAGPRO2, BAGPRO3, BAGPRO4

Model shown
Ref. BAGPRO2

Technical advantages

- Speed
- Ease-of-use / Convenient
- Production regularity
- Quick adjustments
- Lateral opening allows for bead removal without withdrawing the rod 2

Standard equipment

- Supplementary device 1, for bending directly on the machine (except for Ref. BAGPRO4)
- Adjustable electronic timer for winding
- Standard machine includes one rod: Ø12, 14, 16 or 18 mm for Ref. BAGPRO2 (please specify Ø upon order), Ø16 or 18 mm for Ref. BAGPRO3 (please specify Ø upon order) and Ø18 mm for Ref. BAGPRO4
- Front work table
- Foot control pedal keeps hands free

Options

- Other rod Øs (see table)
- Set of 4 wheels: Ref. PCXR3040

Lateral opening allows for bead removal without withdrawing the rod

Special roll-forming machines for roofing accessories

PRBO, PRBS Range

Features

- Zinc / 1050-H44 aluminum: 0,6 to 0,8 mm (to be specified with the order)
- Tempered steel rollers
- Forward / backward control
- Forward / backward motion step by step
- Continuous forward motion in automatic mode
- Power supply 380 V three-phased
- Speed: 15 m / min

Model shown:
2-Station Roll-forming machine,
for 14-mm Ø beads (1)
and 100 mm cover strip (2)

Roll-forming machines for cleat roofing trays

PBC Range

The **PBC650** Roll-forming machine is perfectly suitable for shaping cleat roofing trays, with manual or electric versions available, it can be used in workshops or on building sites.

PBC650

Ref. PBC650M
Manual model shown with roller shear
Ref. CCMA in option

- Light and foldable for easy handling and storage
- Adjustable working height from 160 to 670 mm
- Quick adjustment, no tool needed
- Carrying handles (1)
- Rubber roller drive (2)
- Pre-set positions of measurements: 35, 40, 45 mm (3)
- Adjustable entry guide up to 650 mm (4)
- Rail (5) for adapting roller shear
Ref. **CCMA** (6)

Ref. PBC650E
Electric model shown with two-wheeled decoiler
Ref. DVD1000 (not included) and roller shear
Option: Ref. CCMA

Features	PBC650M	PBC650E
Gross weight (kg)	66	82
Speed (m/min)	--	10
Dimensions legs excluded (mm)	1115 x 800 x 400	1300 x 800 x 400
Power supply	--	220 V single-phase
Power (kW)	--	0,37
Capacity (mm) Zinc, Copper, 1050-H44 aluminum	0,8	0,8
Working height (mm)	160 to 670	160 to 670

Options

- Roller shear Ref. **CCMA** (6)

For other options for profiling cleat roofing trays, see p.58, PROBAC-CPRO Options.

Electric roll-forming machines for standing seams

PROBAC Range

Specially designed to make standing seam profiles for parallel or conical trays, in workshops or on building sites

PROBAC-BA

Ref. PROBAC-BA shown with Connecting rails (option)
Ref. PROBAC-DVS and decoiler Ref. DVS1000

Console with touch screen

Wheel with counter

Standard equipment

- Wheel equipped with a counter to adjust the coil entry guide **1**
- Wheel equipped with a counter to adjust the strip width **2**
- Set of 4 casters with brakes **3**
- Sliding rings **4**
- Forklift tine slots for easier handling **5**
- Integrated infeed process
- Entry guide on « roller slide » to prevent marks on metal sheets
- Complete or partial manual cross cut to collect offcuts **6**
- Longitudinal cut with or without roll forming
- Profile and tray width adjustment operated by 2 wheels equipped with counters
- 7 roller sets to ensure high profiling quality and longevity of the material: hardened steel, 55HR, protected against corrosion by ion nitriding treatment.
- Metal sheet guiding process designed to form conical trays (1 side after another)
- Programming of one tray length at a time

Features	PROBAC-BA
Net weight (kg)	496
Dimensions (mm)	1600 x 1380 x 1000
Capacity (mm)	Zinc, Copper, 1050-H44 aluminum: 0,8
Power supply (V)	220V - single-phase 16 A
Power (kW)	1,5
Roll forming speed (m/min)	10
Length accuracy (repetitively)	± 15 mm
Minimum length of trays (mm)	400
Sliding rings	4

Partial cut with offcut collection

Electric roll-forming machines for standing seams

PROBAC Range

PROBAC-HT

 Ref. PROBAC-DVS shown with decoiler
 Ref. DVS1000

Console with touch screen for Ref. PROBAC-HT

Manual cross-cut

Intuitive machine control on touch screen

Select from 4 roll-forming menus

- Manual without length or quantity programming, reading of the uncoiled length.
- Quick program menu: 1 length, 1 quantity
- Program menu: each program can be named and stored, and may contain several lengths and quantities which will run automatically when manufacturing
- Specific menu: for roll forming « side by side » for the first trays and conical trays allowing to suit the roll forming speed easily to guarantee proper tray support

Identical to model Ref. PROBAC-BA, the PROBAC-HT and PROBAC-HT-CE models have the following technical advantages:

- Speed (15 m/min) and accuracy (+ /- 1 mm repetitively over 4 meters) thanks to an adjustable speed drive and precision counter
- Maintenance menu informs the operator about the preventive maintenance needed depending on the cumulative roll-formed lengths
- Remote assistance and updates via Ethernet connection (RJ45)
- Cut counter with digital display and reset for daily or cumulative total of roll-formed lengths completed
- Machine can be password-protected, with several access levels available (operator, maintenance, administrator)
- Speed +50%
- 7"-wide, 16/9 Touchscreen with sliding protective cover

Features	PROBAC-HT
Net weight (kg)	502
Dimensions (mm)	1600 x 1380 x 1000
Capacity Zinc, Copper, 1050-H44 aluminum (mm)	0,8

Electric roll-forming machines for standing seams

PROBAC Range

PROBAC-HTEC

The PROBAC-HTEC is the most efficient model in the PROBAC range of roll-formers in terms of productivity, functionality and work ergonomics. With one of the highest profiling speeds, it is the ideal solution for workshops producing a large number of standing seam trays for roofing or facades.

- Profiling rolls adapted for all materials; no adjustments required when coil changing
- 8 sets of rolls spread over a long length for a progressive profiling, reducing the « tulip » effect at the beginning and end of the tray
- Excellent regularity of profiling for every materials used (natural zinc, quartz, pre-weathered, aluminium, copper galvanised and painted steel...)
- Tool-free, quick-adjusting entry guide system for profiling different types of trays: single-sided, double-sided, conical and slitting operation

Ref. PROBAC-HTEC Model

Entry guide on «roller slide» to avoid marking the sheets

Ref. PROBAC-HTEC model shown with optional TR3 roller conveyor and DVS decoiler on wheels

Adjustments without tools

Standard equipment

- Numerical control on 10" colour touch screen with protective cover (See page 3 for details on the features of the numerical control)
- Integrated in-feeding process
- Entry guide on « roller slide » to avoid marking the sheets
- Longitudinal cut with or without roll forming
- Full or partial transversal electric cutting
- Variable speed drive
- Tool-free quick adjustment of the entry guide and the slitting knife
- Adjustment of the strip and covering width
- Position adjustments of the left and right profiling roll sets by handwheel
- 8 larger set rolls diameters
- Braked wheels and handles for moving the machine
- Handling space for forks

Features	PROBAC-HTEC
Capacities min/max (mm)	0.6 / 0.8
Zinc / Copper / Aluminium 1050-H44 / Steel	
Power supply (V)* protection 30mA differential circuit breaker	230 V Single-phase
Active power supply (kVA)	4 kVA
Variable profiling speed min./max. (m/min)	5 / 20
Length accuracy (repetitively over 4 meters) (mm)	+/- 1
Maximum width of entry guides (mm)	850
Minimum length of trays (mm)	400
Minimum slitting width (mm)	50
Net weight (Kg)	640
Dimensions (LxWxH) (mm)	2055 x 1370 x 1180
CE conformity	YES

Electric roll-forming machines for standing seams

PROBAC Range

Numerical control

- Latest numerical control with large 10" colour touch screen and liftable protective cover
- Step-by-step CN support for the operator in all profiling steps to make the machine more user-friendly

Mode selection:

- **Manual mode:** without length and quantity programming, reading the unrolled length
- **Quick programming mode:** 1 length, 1 quantity
- **Program mode:** each program can be named and saved, and can contain several lengths and quantities which will be automatically linked during production of each tray
- **Specific mode:** for «side by side» profiling for starters and conical trays, allowing easy adjustment of the profiling speed to ensure good tray support

- Automatic calculation of material requirements (material management for up to 10 coils)
- Automatic calculation of the trays to be produced according to the roof dimensions (layout in quantities and dimensions of trays)
- Total and daily counter with profile length reset
- Possibility to lock the machine by password with several access levels (operator, maintenance, administrator)
- Maintenance menu informing the operator of the preventive maintenance actions to be carried out according to the accumulated profile lengths
- Remote factory maintenance via wifi or wired internet connection
- USB port for importing programs in Excel and exporting

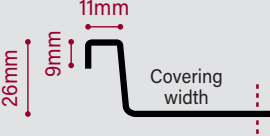

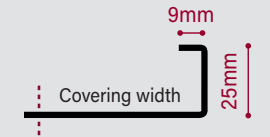

Transversal cut and slitting

The full or partial transversal cut allows to recover the offcut if there is slitting.

The adjustable longitudinal cut allows slitting and roll-forming simultaneously.

Remark: The roll-forming machine **PROBAC-HTEC** can also be used as cutting line only, without profiling.

Dimensions covering width		Min.	Max.	Dimensions Standing Seam	
Standard standing seam profile, in 1 stage (mm)		180	775	FEMALE PROFILE Covering surface 46mm  Covering width

Standard standing seam profile conical, in 2 stages (mm)		75	760		MALE PROFILE Covering surface 34mm  Covering width

Electric roll-forming machines for standing seams

PROBAC Range

PROBAC-CPRO

Dismountable and transportable in 3 parts!

A roll-forming machine to shape trays withstanding seam, directly on the building site. Its device for quick units disassembly allows easy shipping and handling without using mechanized lifting means. The Compact-Pro roll-former is used for roll forming parallel trays for standing seam in a single pass or for conical trays and first trays in 2 runs.

DEMONSTRATION VIDEO
Channel "Jouanel Industrie"

Standard equipment:

Frame:

- Frame made of welded-metal aluminum (1)
- 4 Adjustable blocks for levelling of the machine (2)
- Guiding rails allowing sliding the unit to adjust the tray in width (3)
- Metal sheet support guide, sliding, equipped with anti-marking nylon rollers (4)
- 4 fast releasing levers of units (5)
- 4 carrying handles (6)
- 4 slinging rings (12)

Roll-forming units:

- 2 roll-forming units equipped with 7 roll sets to ensure a high profiling quality and longevity of the material: treated steel, hardness 55HR, protected against corrosion by ion nitriding treatment (7)
- Straightening system of the metal sheet (8)
- Entry guides on slide and guiding on rolling bearings to make easy the material passage (9)
- Removable entry guides by releasing levers (10)
- 2 carrying handles per roll-forming unit (11)

Light seamer, 1st and 2nd fold for standing seams

SRLT Range

SRLT12

- Seaming unit for fold No. 1 and reversible for fold No. 2 (1)
- Quick lock/Unlock lever (2)
- Fold-out attachment for screw-gun (3)
- Pressure setting enables flattening adjustment, 5 positions (4)
- Support wheels (5)
- 3 sets of rolls
- Coated and hollowed out steel rolls
- Safety ring to keep tool from falling (6)
- Stackable carrying case with foam

NB : Cordless power tool not included with this model

Features	SRLT12
Maximum capacity for the 1st fold	
Capacity for zinc, copper and aluminum (mm)	0.8
Capacity for steel (mm)	0.7
Maximum capacity for the 2nd fold	
Capacity for zinc, copper and aluminum (mm)	0.8
Capacity for steel (mm)	0.6
Adjustment profile height (mm):	25 and 32
Minimum radius arch-folded roofing (mm)	3000
Seaming speed (average, depending on screw-gun used) (m/mn)	50
Overall dimensions (l x w x h) (mm) Without screw-gun / fixing system folded in	332 x 244 x 115
Net weight, without screw-gun (kg)	5.5
Carrying case	yes

The quality of the tray is essential for the proper seaming operation.

Please check the dimensions of your profile in accordance with the standard dimensions of the standing seam.

Option for SRLT12 seamer: motorization kit SRLT12-KITBARD specific for standing seam cladding 1st fold for standing seam trays

More information on the product data sheet

Features	SRLT12-KITBARD
Maximum capacity for the 1st fold	
Capacity for zinc, copper and aluminum (mm)	0.8
Capacity for steel (mm)	0.7
Seaming speed (average) (M/mn)	50
Overall dimensions (l x w x h) (mm) with DeWALT drill-driver fixing on the seaming unit SRLT12	367 x 244 x 210
Manufacturer's warranty (in normal use)	1-year

NB: seaming unit not included

Other electric seamers available: see page 62

Electric seamers for standing seams

SRLT Range

SRLT2 Light seamer for standing seam profiles, first and second stage in one pass

Model shown Ref. SRLT2

Two folds in one run !

Advantages:

- Double lock standing seam in one pass
- Increased productivity on site: fast and regular seaming.
- Avoid time-consuming manual seaming work, especially for long trays.
- Can be used for standing seam profiles of 25, 32 and 38 mm height.
- Variable pressure adjustment to adjust the seaming of the first fold.
- Easy installation of the drill driver on its mounted holder, no tools needed.
- Fixing holder compatible with most cordless drill drivers on the market.
- 2 additional rubber drive rolls included, for seaming the single lock (cladding)
- Optional motorisation kit specific for standing seam cladding allowing the seaming even with a scaffold. ref. DEW-VAL

Features	SRLT2
Capacity zinc, copper, aluminum (mm)	0.7
Capacity steel (mm)	0.6
Capacity inox (mm)	0.5
Minimum radius for curved roofing (mm)	3000
Seaming speed (average, depending on screw-gun used) (m/mn)	36
Overall dimensions (LxWxH) (mm) excluding drill-driver, locking lever up	364 x 180 x 143
Overall dimensions of assembly (LxWxH) (mm) excluding drill-driver, locking lever down	364 x 269 x 106
Net weight, excluding drill-driver and case (kg)	5.8
Valise de transport	yes

Model shown Ref. SRLT2
Cordless power tool not included

Set of cutting rollers	No	Yes
Automatic stop switch at the end of tray	No	Yes

Seamers for standing seams, allow you to close the 1st and 2nd seams

- Ref. SER100A-05: standard model
- Ref. SER100A-05WAD: model equipped with a set of cutting rollers Ref. SER-05GALDEC and an automatic stop switch at the end of the tray Ref. SER-05SWITCH

Options

- Winter heating device Ref. SER-05SETHIVER
- Remote control with 12 m cable Ref. SER-05TELECDE
- Set of cutting rollers Ref. SER-05GALDEC

Electric arch curving machine

RCBPRO Range

RCBPRO

Features	RCBPRO
Weight (kg)	375
Minimum radius (mm) depending on conditions and material used	350
Dimensions (mm)	800 x 800 x 1 500
Power supply	220 V single-phase
Min-max capacity (mm)	zinc, copper, aluminum: 0,6-0,8

Machine designed for bending standing seam trays

- Equipped with 2 motors with variable speed to best adjust the bending on each side and the overall speed.
- Control button and foot switch for hands-free machine control
- Forward/Reverse, One by one or Continuous use

Decoilers

DVM Range, DVS Range

DVM500, decoiler

Decoiler for 0.5 m to 1.25 m wide coils. Very easy to move around and transport in vehicles, this light and versatile decoiler is particularly suited to work on building sites

Model Ref. DVM500 shown with braked wheels

- Simple and sturdy design
- Anti-corrosive, zinc-plated steel base
- 1 roller with a fixed position
- 1 roller with an adjustable position
- Carrying handle
- Base includes anti-skid pads
- Set of 4 braked wheels Ø 80 mm

Features	DVM500
Maximum load (kg)	500
Range of the movable roller (mm)	275
Min. distance between rollers (mm)	420
Max. distance between rollers (mm)	200
Base dimensions (L W H mm)	565 x 590 x 100
Overall dimensions (L W H mm)	610 x 590 x 210
Net weight (kg)	21

DVD1000, decoiler

Features	DVD1000
Maximum load (kg)	200
Net weight (kg)	31.6

Model Ref. DVD1000 shown

This two-wheeled decoiler is perfect for handling and uncoiling 1 m wide coils

DVS1000, DVS1250, decoiler

- Equipped with 4 swivel casters with brakes
- Caster axis mounted on ball bearings
- Manual mandrel expansion from Ø 285 to 540 mm
- Maximum external diameter of the coil 1000 mm
- Manual brake on the same side as the handle for quick adjustments
- Rewind without manipulating the hub expander

Modèle présenté Ref. DVS1000

Features	DVS1000	DVS1250
Maximum load (kg)	1 200	1 000
Width (mm)	1 000	1 250
Net weight (kg)	126	130

DVS1000D, double decoiler

Features	DVS1000D
Maximum coil width (mm)	1 000
Maximum coil weight (kg)	1 200
Maximum outer diameter (mm)	1 000
Inner coil diameter (mm)	from 285 to 540
Overall dimensions (L W H mm)	1 760 x 1 540 1 380
Net weight (kg)	239

Model shown Ref. DVS1000D

- Floor space requirement: length 1270 x width 1335mm
- 2 hubs for coils, width: 1000 mm
- Manual hub expansion from Ø 285 to 540 mm
- Maximum outer diameter of the coil 1000 mm
- Manual brake on the same side as the handle for quick adjustments
- Rewind without manipulating the hub expander

DVS-E, decoiler

Our modular decoilers Ref. DVS1000E and DVS1250E optimize the storage and handling of your coils

- Manual mandrel expansion from Ø 285 to 540 mm
 - Maximum external diameter of the coil 850 mm
 - Stackable, maximum: 3 decoilers
 - Brake and handle on the same side
 - Can be loaded from the side
 - Rewind function
 - 2 Retractable and movable rollers (1) to guide and handle sheet metal
- Decoils from the top or from the bottom

Model shown Ref. DVS1000E

Features	DVS1000E	DVS1250E
Maximum load (kg)	1 200	1 000
Width (mm)	1 000	1 250

Extra hubs for DVS decoiler

- For Ref. DVS1000, DVS1000D and DVS1000E : Ref. MOY-DVS1000
- For Ref. DVS1250 and DVS1250E : Ref. MOY-DVS1250
- Decoilers with other capacities upon request (4, 5, 10, 15 tons)

Model shown Ref. MOY-DVS1000

Decoilers

DPF Range

DPF10001EM, open side decoiler on wheels

- Mandrel for coil max width 1000 mm
- Quick coil loading
- Easy to move
- Space-saving
- Decoiling from the top or bottom
- Manual coil brake and crank on the same side
- Wheel axles mounted on ball bearings
- Available in a stacked version: Please contact us.

Model shown
Ref. DPF10001EM

Features	DPF10001EM
Maximum coil width (mm)	1 000
Maximum coil weight (kg)	1 000
Maximum outer diameter (mm)	1 100
Inner coil diameter (mm)	from 390 to 540
Overall dimensions (L W H mm)	1 400 x 1 000 1 100
Net weight (kg)	260

DPF1000Z, open side decoiler with lifting system

- Open side mandrel for easy loading of your coil
- Single operator loading and moving the coil
- The hydraulic lifting system of the mandrel enables self-loading
- Brake for adjusting the coil speed
- Device allowing the rewind without action on the hub expander
- Uncoiling from the top or the bottom
- Side wheels for more comfort when pushing

Model shown
Ref. DPF1000Z

Features	DPF1000Z
Maximum coil width (mm)	1 000
Maximum coil weight (kg)	1 000
Maximum outer diameter (mm)	1 100
Inner coil diameter (mm)	from 390 to 540
Overall dimensions (L W H mm)	1 400 x 1 000 1 100
Net weight (kg)	260

Tables

TRX, TR3 and TABLE3000x1000 Range

TRX, extendable roller table

- Especially suited to roll-forming and bending standing seam trays and cleats, this table is height adjustable, and provides a perfectly flat surface for machine output.
- Tables can be attached together in order to work with longer lengths.

Model shown
Ref. TRX

Features	TRX
Height (mm)	670 to 940
Length (mm)	420 x 1300
Width (mm)	500
Roller Ø (mm)	42
Number of rollers	9
Maximum load (kg)	150
Weight (kg)	42

TR3, gravity roller conveyors for workshops

- Improves production flow
- Respects the flatness of the trays
- Very versatile use in the workshop
- Height-adjustable
- Fixed or mobile (optional swivel casters)

Model shown
Ref. TR3

Features	TR3
Adjustable height (mm)	from 600 to 900
Length (mm)	2900
Width (mm)	700
Roller diameter (mm)	60
Number of rollers	10
Maximum load(kg)	800
Weight (kg)	95

Table3000x1000, movable working table

- Multi-purpose table for the workshop (tracing, removal, transfers)
- Respects the flatness of large format sheets
- Robust and rigid, suitable for industrial environments
- Adjustable table height for easy handling of sheets to the folding machines
- Table top with anti-slip coating

Model shown
Ref. TABLE3000X1000

Features	TABLE3000x1000
Table top length (mm)	3000
Table top width (mm)	1000
Minimum table height (mm)	800
Maximum table height (mm)	920
Maximum load (kg)	450
Net weight (kg)	105

Asymmetrical roll-bending machines

CACDS Range, SDS Range

CACDS33

Manual roll bending machine for workbenches

Asymmetrical roll-bending machines for leveling, pinching and roll-bending small diameters
(Roller $\varnothing * 1.5 = \varnothing$ of the pipe, approximately)

Model shown
Ref. CACDS33

Features	CACDS33
Roller \varnothing (mm)*	33
Useful length (mm)	500
Capacity stainless steel / alu (mm)	0,5 / 0,7
Capacity S235JR steel (mm)	0,6
Control	Manual
Weight (kg)	34
Base: SSOCLE33	Optional

SDS

2 models available :

- Manuelle **M**
- Electric with speed control **EVV**

- Crowned rollers
- Rack-and-pinion operated lever for quick pinch adjustment and quick bending roller position adjustment (1)
- Driving rollers on self-lubricating rings
- Brake motor
- Emergency stop cable, for the electric model
- Safety guards on lower and upper rollers reduce crushing risk

Features	SDS48M	SDS48EVV
Upper roller \varnothing (mm)	48	48
Useful length (mm)	1 050	1 050
Capacity stainless steel / aluminum (mm)	0,7 / 1,2	0,7 / 1,2
Capacity S235JR steel (mm)	1,0	1,0
Control	Manual	Motorized Variable speed
Power supply (V)	-	220 1-phase
Power (kW)	-	0,75
Weight (kg)	95	150
Base: SDS48SOC	Optional	Included

Model shown Ref. SDS48M
+ Base SDS48SOC

Asymmetrical roll-bending machines

ROL Range

The ROL roll-bending machines have been specially designed for roll-bending thin metal sheets for HVAC, insulation, industrial sheet metal fabrication and sheet metal workshops.

ROL-M, ROL-EVV

Standard equipment :

- To prevent rolls from being marked, they are machined with hardened, high-carbon steel (24 HRC)
- For repetitive manufacturing, the back roller is equipped with a digital indicator, to find the selected position easily (1)
- The lower roller is equipped with a position marker for easier setting, depending on the thickness (2)
- For manufacturing seaming pipes the upper roller is equipped with a tangential slot
- For roll-bending cones, the machine is equipped with a movable gauge (3) and a tilting device for the back roll
- Our manually-operated machines can be easily retrofit to electric even after installation (Ref. **KIT-ELEC-ROL**)
- The motor is equipped with speed control, for easy running speed adjustment, depending on the part to be produced
- The driving motor is equipped with a brake, allowing for accurate positioning of the metal sheet by eliminating the effects of inertia

Model shown
Ref. ROL1050-15M

Safety of the electric models:

- Safety guards on lower and upper rolls reduce the risk of crushing
- Safety guard on pinion gears
- Emergency stop pedal underneath machine
- Motor brake eliminates the risk of inertial motion
- CE Conformity

Features	ROL650-20M	ROL650-20EVV	ROL1050-15M	ROL1050-15EVV	ROL1270-12M	ROL1270-12EVV	ROL2050-06M	ROL2050-06EVV

Roller Ø * x 1.5 = Ø of the pipe, approximately

Assymetrical roll-bending machines

RPL Range

RPL

Asymmetrical roll-bending/levelling machines for pinching edges.

- Rollers machined with high-carbon steel (95/105 kg)
- Driving rollers' bearings on a double needle roller cage assembly for long-term accuracy
- Wheel-operated presser roller adjustment with graduated scale for position indication (1)
- Convenient side clearance keeps roller in horizontal position (2)
- Manual or electric drive adjustment of the pinch roller with graduated scale and pointer (2)

Model shown
Ref. RPL1550-30EE

3 different models available

- **Type M** - Manual: wheel for adjustment, crank for roll-bending
- **Type E** - Machine with semi-electric drive: foot-operated motorized roll-bending and manual adjustment of the pinch roller
- **Type EE** - Fully electric drive system: foot-operated motorized roll-bending and electric adjustment of the pinch roller

Option: Conical rolling Ref. RPL-RCO

Light manual cutting unit

CLD Range

Essential for quick and effortless production using zinc, stainless steel or steel lengths intended for roofing. Adapted to thin sheet metal: roofing, zinc work, HVAC and insulation, our manual or electric cutting units will offer added working comfort and safety

Light manual cutting unit: CLD-LT

Standard equipment

Uncoiling:

- Manual uncoiling by pulling or pushing
- Adjustable infeeding guides from 250 to 1250 mm on slides and with locking levers (1)
- Sheet guides on ball bearings (2)
- Idle roller at entry to guide the top of metal sheet (3)
- Nylon protector at input keeps underside of sheet metal mark-free
- Position lock by eccentric and anti-return wheel

Cutting:

- Sheet clamping beam with rubber roller and anti-return coil lock (4)
- Roller shear for manual cutting (5)
- Ball profile rail guide for cutting
- Ground and polished blades made of 58 HRC hardened steel

Handling:

- 4 Ball bearing casters with brakes, 70 mm Ø (6)

Features		CLD-LT
Maximum cutting capacity (mm)	Soft steel (mm)	0,7
	Zinc, copper, 1050-H44 aluminium	0,8
	Stainless steel	0,5
Minimum coil width (mm)		250
Maximum coil width (mm)		1 250
Operating dimensions (mm)		1 610 x 800 x 1 110
Sheet overhead clearance (mm)		825 (adjustable +/- 15 mm)
Transport dimensions (mm)		1 700 x 1 100 x 1 300
Net weight (Kg)		120
Gross weight (Kg)		170

Options :

- Measuring wheel with digital display accurate to 1/10 (7)
Ref. **CLD-COMPTEUR**
- Output table with adapter for connecting several tables (8)
Ref. **CLD-TAB-1M**
Length 1 000 x width 1 250 x height 740 mm (adjustment +/- 15 mm) Output table, maximum load: 250 kg
- Portable decoiler width 500 to 1250 mm (maximum load 500 kg)

- Electric uncoiling
- Power supply 220 V, single-phase 0,18 KW
- Automatic speed control for smooth starts and stops
- Maximum speed 12 m/min
- Rubber drive rollers
- Adjustable infeeding guides from 250 to 1250 mm on slides and with locking levers (1)
- Sheet guides on ball bearings
- Idle roller at entry to guide the top of metal sheet (2)
- Nylon protector at input keeps underside of sheet metal mark-free
- Measuring wheel with digital display, accuracy 1/10

Electric cutting:

- Sheet clamping beam with rubber roller and anti-return coil lock
- Roller shear for electric cutting (3)
- Ball profile rail guide for cutting
- Ground and polished blades made of 58 HRC hardened steel

Handling:

- 4 Ball bearing casters with brakes, 70 mm Ø (4)

Numerical control

- Programs can include several quantities and several lengths
- Automatic cycle, machine runs without an operator
- Manual cycle for work as needed on demand
- High accuracy for cutting lengths: +/- 2 mm over 2m
- Machine use password-protected
- Manual or automatic speed adjustment
- 7" Color touch screen (5)

Control console with touch screen

Features		CLD-AE-CTE
Maximum cutting capacity (mm)	Soft steel	0,7
	Zinc, copper, 1050-H44 Aluminium	0,8
	Stainless steel	0,5
Minimum coil width (mm)		250
Maximum coil width (mm)		1 250
Operating dimensions (mm)		1 800 x 800 x 1 110
Sheet overhead clearance (mm)		825 (adjustable +/- 15 mm)
Transport dimensions (mm)		2 000 x 1 100 x 1 200
Net weight (Kg)		230
Gross weight (Kg)		300

Options

- Output table with adapter for connecting several tables (6)
Ref. **CLD-TAB-1M** - Length 1 000 x width 1 250 x height 740 mm (adjustment +/- 15 mm) - Output table, maximum load: 250 kg
- Portable decoiler widths 500 to 1250 mm (maximum load 500 kg) Ref. **DVM500**
- Decoiler width 1 000 mm (maximum load 1 200 kg) Ref. **DVS1000**
- Decoiler width 1 250 mm (maximum load 1 000 kg) (7)
Ref. **DVS1250**

Compact cutting lines

MLC Range

The MLC lines are also available without a slitting station (please contact us)

MLC1250 Line

Model shown
Ref. MLC1250-HT-BD

Cutting lines allow you to infeed, slit and cut-to-length directly from coils of sheet metal:

- Entry table with rollers, guides are adjustable by lever, counter included, maximum width 1250 mm
- Motorized infeed station with pressure adjustment (1 steel roller + 1 rubber-coated roller: Ø 80 mm)
- Slitting station with 100 mm Ø ground and polished shafts, equipped with 3 sets of 154 mm Ø cutting blades, adjustable, with built-in measuring device
- Manual shaft adjustment by wheel and counter
- Minimum cutting width: 80 mm between cutter blades, 10 mm for the edge
- Sets of reversible slitting blades mounted on one-piece cutting-blade unit
- Mechanical guillotine shearing unit
- Maximum uncoiling speed: 20 m/min
- Accuracy on cuts +/- 1 mm
- Manual operating mode available

Control console mounted on a bracket:

- 7" color touch screen (16:9)
- Program with 10 programmable lines: with or without slitting, different lengths and quantities, for up to 999 parts
- CNC automatically informs the operator of upper shaft raising/ lowering
- Name and save programs
- Manual operating mode available
- **Remote maintenance (commissioning of the machine, remote updates)**

MLC1250-BD Line

With the same equipment and maximum uncoiling speed as model MLC1250, this machine has a straightening station as an additional feature:

- 3 steel rollers: Ø 80 mm
- Position reading on a graduated dial

MLC1250-HT Line

With the same equipment and maximum uncoiling speed as model MLC1250, this machine has automatization as an additional feature:

- Production management: total and partial cut lengths, reduces the amount of material used
- Slitting optional, upper cutting blades lift automatically, no material loss
- Automatic lifting and lowering of the slitting shaft
- Cut accuracy +/- 0.5 mm

MLC1250-HT-BD Line

Same equipment and max. uncoiling speed as the Ref. MLC1250-HT with a straightening station in addition:

- 3 steel rollers: Ø 80 mm
- Position reading on a graduated dial

Easy access and quick adjustment of slitting blades

Options for all MLC models

- Additional set of cutter blades* (MLC-C)
- Infeed selector, please contact us

LICO Range

The expertise of a manufacturer

For several years, JOUANEL Industrie's R&D department has specialized in designing and producing specific machines adapted to thin sheet metal work. Recognized for its know-how in the design of complete lines, from material uncoiling to the transformation of the semi-finished or finished products, JOUANEL Industrie has the right solutions to complete your project.

A tailor-made machine that meets your needs

We design and build your machine for you and with you, according to your specifications. Our highly-experienced R&D department, as well as our expertise in mechanics, hydraulics, automation and numerical control, are our assets when we design machines with the latest innovations developed by Jouanel.

Corner notcher

ENC Range

Manual 90° corner notcher ENC-150-15

Sturdy and reliable, our manual corner notcher for workbenches with a fixed 90° angle allows a quick and easy right angle cut.

- Cutting angle 90°
- Adjustable gauge, with graduations
- Capacity S235JR steel: 1.5 mm
- Maximum notching: 150 mm x 150 mm
- Dimensions: 610 mm x 530 mm x 600 mm
- Weight: 75 kg

Model shown
Ref. ENC-150-15

Hydraulic corner notcher ENC 200-40

Ideal for preparing box bottoms before folding, the ENC200-40 is a machine that allows the efficient right-angle cutting

- Cutting angle 90°
- Left and right side gauges
- Capacity S235JR steel: 4 mm
- Maximum notching: 200 mm
- Dimensions : 790 mm x 520 mm x 1150 mm
- Weight : 430 kg

Model shown
Ref. ENC-200-40

Hydraulic corner notcher with variable angle ENCV200-40

Double workstations :

- 1 punching station Ø 40 mm max
- 1 notching station 200 x 4 mm
- Variable cutting angle from 30 to 140°
- Control pedal to keep both hands free
- Capacity S235JR steel: 4 mm
- Maximum notching: 200 mm
- Dimensions: 1060 mm x 900 mm x 1210 mm
- Weight: 1100 kg
- Graduated table with T-slots for manual positioning of gauges
- Quick adjustment of the angle by means of handwheels with graduations

Model shown

LIGHT MANUAL ROOFING MACHINES

Manual arch-folding machine for beads

CMB-ET Range

This light roofing accessory is designed to manually arch zinc, copper or aluminum strips which have a 13 to 18 mm Ø bead. Once the part has been bent according to the desired radius, it will perfectly fit dormers and bent roof borders for a quality finish. A convex or concave bend is made in several steps, by moving the part back and forth in the arch-folding device. The radius is obtained by the gradual increase in pressure exerted on the part by the two bending rollers, thanks to the adjusting wheel. The rollers, made of high density nylon, give an even bend without marking the material.

- Arch-folding diameter (min.): 1000 mm
- Bending capacity: zinc, copper and alu (min.-max): 0.5 - 0.8 mm
- Rollers in high density nylon
- 1 set of grooved rollers: Ø 19 mm
- 1 set of pinch rollers
- Mounting system for workbench included (1)
- Dimensions: 200 x 200 x 170 mm
- Weight (kg): 2,8

Hand edge rollers and accessories

PLIM Range

No friction, no marking !

The shape of the « folding » roller enables a fold up to 100° in order to balance the resilience of the material, for a true 90° seam **without marking the material**

The time-saving tool on the building site!

Handy and light, our hand edge rollers make neat and regular seams reverse bends, whatever the length. They are equipped with treated steel rollers and stainless steel rolls that guarantee a long lifetime of the tool as well as stable and accurate guiding.

Available with single and double columns, equipped with 2 or 4 rolls, the Jouanel hand edge rollers have all the technical advantages of the other edge rollers on the market combined.

Once the height of the seam is defined with the graduated scale, just slide the edge roller against the metal sheet, by moving it back and forth, and inclining it gradually until you achieve the desired angle.

Single column hand edge roller with 2 guide rolls: PLIMSC2

Standards equipment

- For straight or arch curved metal sheets
- Single-piece body made of machined and anodized aluminum, very handy to use
- Columns, rolls and shafts in stainless steel
- Folding roller made of hardened steel, inclined at 10°
- Maximum folding angle: 100°
- 2 guiding rollers
- Graduations in mm, with indelible laser engraving
- Wing screw to lock edge height quickly
- Handle to keep a good grip on the tool, even at maximum edge height
- Black handle
- Fabric storage bag included

Single disk hand edge roller

PLIM Range

This hand edge roller with 1 disk and 1 guiding roller enables you to make 180° hems on 8- to 40-mm edges.

Easy to use, handy and compact, this disk roller will complete your set of equipment.

Standard equipment

- Single-piece body made of machined and anodized aluminum, very handy to use
- No adjusting needed
- Seams easily from 90 to 180°
- 1 stainless steel guiding roll/roller
- 1 folding disk made of treated steel, 100 mm diameter
- Removable black handle
- Fabric storage bag included

Features	PLIMSD1-040
Capacity zinc and aluminum (mm)	1
Capacity copper (mm)	0,8
Capacity steel (mm)	0,7
Capacity stainless steel (mm)	0,5
Edge height (mm)	8 to 40
Net weight (g)	630

Tool to close hems at 180°

OFP

Ideal for great lengths

Starting with a 135° seam, the OFP-180 tool enables you to seam at 180° in just one quick and comfortable run, thanks to its 4 sets of rollers. The last roller is adjustable for a perfect fit depending on the material and its thickness. To make this adjustment, the sheet must be held firmly in place on the workbench.

Standard equipment

- Folds evenly along the whole length, starting from a 135° fold.
- Closes hems at 180° in just one run
- A real time saver
- Capacity of folding 0,8 mm steel
- 4 sets of rollers
- Upper roller adjustable in position and in depth
 - 2 adjusting wheels
 - 2 grip handles

«Parisian» type folding machine

PAL Range

Easily transportable to the building sites

« Parisian » type PAL2040 (1)

A worksite folder that's easy to move! Commonly called the «Parisian», this manual folding machine is a traditional worksite folding machine for many roofers. It allows you to make the most common folds as well as produce 13 mm diameter beads . Because it is so easy to move, this lightweight folding model is particularly suitable for on-site work. Made of aluminum and with four very robust hinges, the PAL2040 is designed for intensive use, whatever the working conditions. Its accessories and simplicity of everyday use make it a versatile and durable folding machine.

- Robust and traditional design made of aluminum: 30kg
- Adaptable on trestles
- Rigid clamping beam equipped with 4 « piano » hinges in cast aluminum for high quality folding
- Equipped with a beader and a 13 mm Ø rod
- 2 cranks, on the left and right

Features	PAL2040
Useful folding length (mm)	2040
Capacity zinc (mm)	0,65
Folding depth over 2m (mm)	100
No depth limit over 1m (between handles)	-
Space between handles (mm)	1 070
Dimensions (mm)	2 200 x 420 x 500
Net weight (kg)	30
Beading accessory (mm)	13 Ø rod

Options:

Metal trestles Ref. TRET-METAL (2)

Set of 2 metal trestles Ref. **TRET-METAL** designed to be attached to the **PAL2040** folding machine and edging board (Ref. **PB2040**)

- Foldable legs
- Width: 900 mm
- Height: 750 mm
- Weight: 16 kg

Edging board Ref. PB2040 (3)

Edging board, made of exotic rot-resistant wood

- Galvanized steel edges on 3 sides
- Length 2 040 mm x width 190 mm
- Weight: 15 kg

Flaring units for downpipes

EVA-GAL Range

The two models of 80 and 100 mm diameter flaring units for downpipes make it possible to easily and evenly expand electric welded (ERW) downpipes. Adaptable without tools on all screwguns, they will, by a simple push, create flared ends or sleeves on pipes of the same diameter for clean connections without leaks.

Flaring rollers with needle bearings, in treated steel, mounted on an aluminum unit. Flaring units usable on copper, zinc, stainless steel and aluminum pipes, 80 and 100 mm Ø.

Note: Not suitable for seamed pipes and tin welded truncated pipes

Choice of sets:

- Flaring unit with rollers: 80 mm Ø Ref.EVA-GAL80
- Flaring unit with rollers : 100 mm Ø Ref.EVA-GAL100
- Set of flaring units with 80 and 100 mm Ø rollers including carrying case Ref.EVA-GAL80-100-VAL

Flaring units with rollers: 80 and 100 mm Ø (screwgun not included)

Slate-cutter

CA600 Range

CA600

Model shown
Ref. CA600

Practical, powerful, robust

The CA600 slate-cutter is an essential tool for shaping slates on construction sites.

Its reinforced disk, mounted on steel guides and ball bearings, ensures excellent cutting consistency and effortless handling.

Its large-sized cutting plate and quickly adjustable squaring gauges will enable the most diverse cuts and high productivity.

CA600E

Model shown
Ref. CA600E

For a precise and effortless cut!

Patented system

The motorised slate-cutter CA600E allows the cutting of natural or fibre cement slates in thicknesses up to 8 mm. Ideal for production in series or custom cutting directly on site, the CA600E is the solution for fast and precise cutting while maintaining the appearance of traditional slate with chamfered edges. Its cutting block, motorised by a cordless drill driver, will ensure effortless cutting for the user while significantly limiting the risk of breakage.

Universal drill driver fastening system

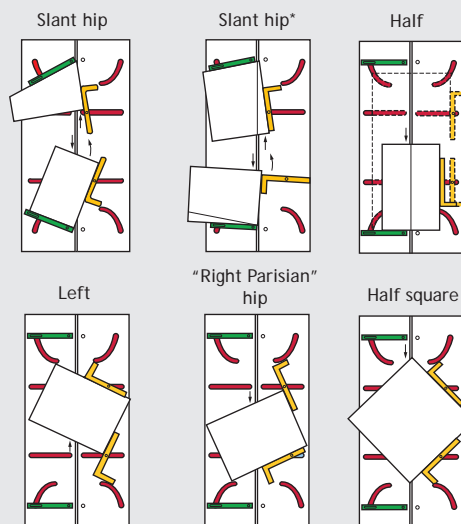

- Patented aluminium cutting block with ball bearings
- Universal drill driver fastening system with position adjustment and heavy-duty Velcro® fastener (drill driver not included)
- Large slate chips tray, removable with wheels

The strongest slate-cutter of its range!

- Cuts slate and fibre cement
- Reinforced cutting disk for thick slates, up to 6 mm (removable and interchangeable disk)
- Cutting system guide on 8 bearings (1)
- Long table for slates up to 600 mm
- Squaring gauges with quick adjustment system (2) to facilitate:
 - Slate positioning
 - Maintaining slate in place while cutting
 - Cutting in batches
- 2 gauges engraved in 5 mm increments
- Table and guide in galvanized steel treated against corrosion
- Shock absorbing pads at both ends
- Base can be safely attached to roof laths with brad nails
- Cutting system can be locked into place for transport
- Wide carrying handle – 2 positions (3)
- Made in France by Jouanel Industrie

Features	CA600	CA600E
Overall dimensions (mm)	935 x 420 x 250	885 x 420 x 250
Plate length (mm)	885	600
Plate width (mm)	420	420
No. of bearings	8	-
No. of squaring gauges	5	5
Max. cutting thickness (mm)	6	8
Gross weight (kg)	19,2	21,5

Square gauges with quick adjustment system facilitating all types of cuts!

* The tab and small bracket on each ruler allows gauge adjustment as close as possible to the knurl

Additional equipment

Optional for CA600: Réf.CA600-BAC / included with CA600E

Large capacity slate chips tray:

- Large capacity slate chips tray:
- Avoids cutting waste being scattered on the roof
- Facilitates final clean up.
- Removal of the tray without tools, using knurled wheels
- Stainless steel tray
- Overall dimensions (LxWxH): 875x410x70mm

A know-how recognized by our customers

The company JOUANEL Industrie, located in Sainte Maure-de-Touraine in Indre-et-Loire, designs, manufactures and markets since 1948, machine-tools dedicated to craftsmen and industrialists processing metal sheets within the different applications areas of building metal envelope, insulation and air duct manufacturing.

Our know-how of more than 72 years in the field of folding, shearing and roll forming has assured the very good reputation of our firm to the roofers and zinc workers. Jouanel Industrie thus became a leading player in this business against its national competitors, all of them importers.

Application areas of our machines

- Roofing
- Cladding-Facade
- Metal carpentry
- Metal frameworks
- Ironworks-Sheet metal works
- Insulation
- Air duct manufacturing
- Maintenance workshops
- Trade school education

Our products

With more than 72 references manual, electric, hydraulic our machines, with or without CNC, Jouanel Industrie covers the key elements of the market needs in processing zinc, copper, steel, prelacquered or aluminum in coils or sheets. We thus offer all the equipment solutions which will ease the work of the operators by significantly improving the workshops' productivity.

Unlike our challengers, our strength lies in our ability to develop very quickly our machines to meet the customers' requirements. With four to five new models per year and many technical innovations brought onto the existing models along the year, inaction and immobility have no room at Jouanel's.

Besides our standard products, we have cultivated over the years the ability to design and provide «special» machines, thanks to the reactivity of our R&D department and the great flexibility of our production processes. With internal aptitudes in all fields linked to the design and the fabrication of modern and efficient machine-tools (design, machining, mechanics, automatism, hydraulics, CNC...), Jouanel Industrie assists its customers in their specific equipment projects.

Technical assistance SAT & SAV

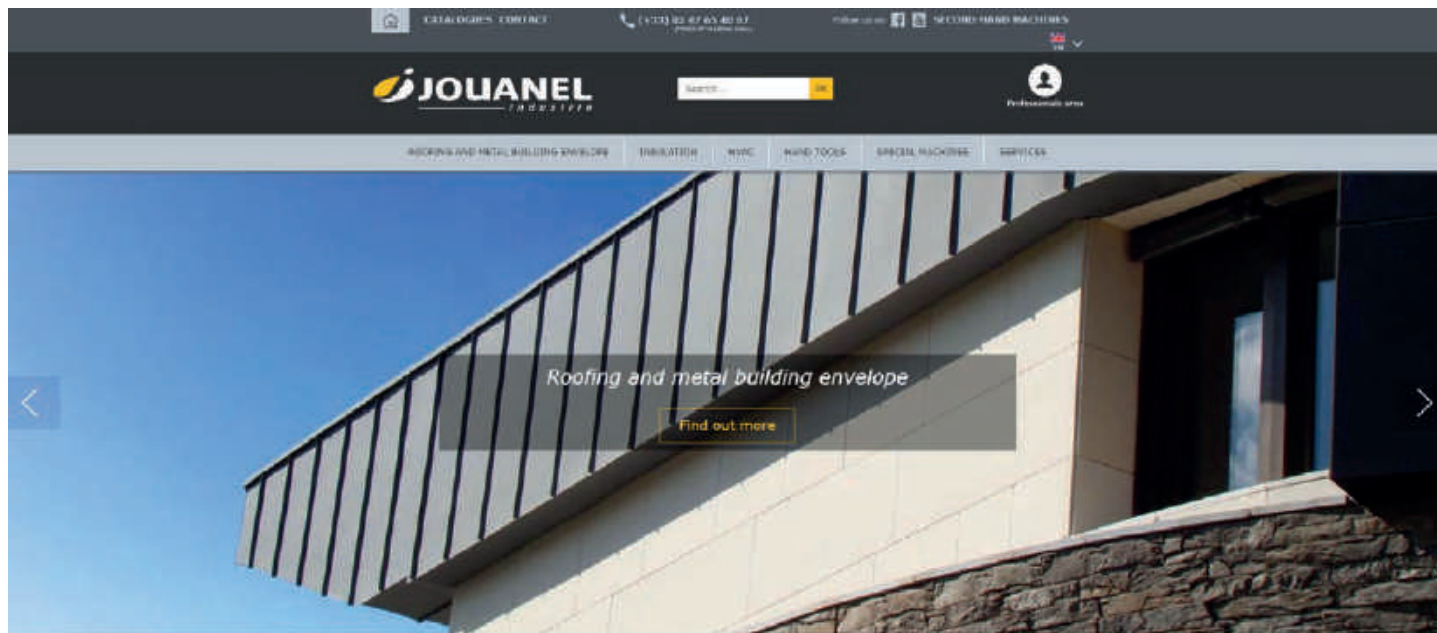

At JOUANEL Industrie, we stay with you after the sale to:

- Schedule the commissioning of your machine
- Perform the contractual interventions
- Provide spare parts
- Provide technical documentation
- Operate a Hotline for mechanical repairing
- Do remote assistance on the CNC

Our departments can be reached from Monday to Friday from 8:00 am to 5:00 pm

- Technical Assistance Department: (+33) 2 47 65 16 49
- After-sales department: (+33) 2 47 65 47 65
- Technical hotline: (+33) 2 47 65 16 48
