## **Summer School “Entrepreneurship in Food and Bio Engineering” – 2018 - 23531**

Students will get the chance to cultivate their entrepreneurial skills this August in a three-week Entrepreneurship course. The course will run from August 6 – August 24, 2018.

Whether you have ambitions of launching your own business or just want to spice up your academic profile with competencies in innovation and entrepreneurship, the Summer School will provide ample opportunity to develop your skills and learn from the professionals through working with real cases and company presentations. By completing the course you will gain an understanding of and be able to present a plan for commercialization of an innovative product for the food industry.

As a student within the fields of Food Technology, Biotechnology, Biology, Business or something else entirely, you will have a unique opportunity to gain hands-on experience working with innovation and entrepreneurship linked to the food industry and in close collaboration with other students from a range of different disciplines.<sup>1</sup>

The course will consist of lectures on entrepreneurship and presentation of case stories at the beginning of the course. Students will then work in carefully designed groups (e.g. containing a student from each of the participating universities/international student) on a project about how to make the case story that they choose into a new business opportunity.

### **Objectives**

The aim of the course is for the students to develop their entrepreneurial skills and competences by working with a defined case story to develop an idea into a final product with clear market share and a ready-to-go business plan. All case stories will be related to the food sector but can be based on equipment design, raw material, new values in food production or ingredients.

**Dates:** 6th August – 24th August 2018

**Location:** DTU, Lyngby

**Credits:** 5 ECTS.

**Registration procedures**

If you are a current DTU student, sign up for track 1 by registering for course number 23531 via DTU [CampusNet](#). Other students must use [this application form](#) to sign up for track 1. A tuition fee is required from students at non-Danish universities and from non-partner universities.

If you would like to find out more about the summer school and the individual courses please contact the following representatives from DTU:
