

# PyroPen

## Handheld Infrared Thermometer

- Conveniently clips into your pocket just like a pen
- Unique ultra compact design
- Wide temperature range
- High accuracy and repeatability
- Fast response
- Displays maximum, minimum, average and current temperatures
- Narrow field of view
- Optional laser sighting
- Optional USB data logging & data acquisition

### GENERAL SPECIFICATIONS

|                                      |   |
|--------------------------------------|---|
| <b>Temperature Range</b>             | -20°C to +500°C                                     |
| <b>Accuracy</b>                      | +/-1% of reading or +/-1°C whichever is greater     |
| <b>Repeatability</b>                 | +/-0.5% of reading or +/-0.5°C whichever is greater |
| <b>Response Time, t<sub>90</sub></b> | 500 ms (90% response)                               |
| <b>Spectral Range</b>                | 8 to 14µm   |
| <b>Ambient Temp Range</b>            | 0°C to +50°C  |
| <b>Housing</b>                       | Pen style   |
| <b>Display</b>                       | 3.5 digit LCD                                       |
| <b>Power</b>                         | 2 x AAA batteries                                   |
| <b>Reading</b>                       | °C or °F SCAN/HOLD/LOCK/MAX/MIN/AVG                 |
| <b>Display Resolution</b>            | 0.1°  |
| <b>Field-of-view</b>                 | 8:1   |
| <b>Relative Humidity</b>             | 10 to 95% non-condensing                            |
| <b>Dimensions</b>                    | 163 mm x 27 mm x 16 mm                              |

|                         | PyroPen E     | PyroPen L             | PyroPen U                                     |
|-------------------------|---------------|-----------------------|---|
| <b>Emissivity</b>       | Fixed at 0.95 | Adjustable 0.3 to 1.0 | Adjustable 0.3 to 1.0                         |
| <b>Sighting</b>         | None          | Laser                 | Laser   |
| <b>Data Logging</b>     | None          | None                  | 100 memory locations                          |
| <b>Data Acquisition</b> | None          | None                  | Via USB cable and CalexSoft software supplied |
| <b>Weight</b>           | 50g           | 60g                   | 60g   |

**Designed to be simple, safe and convenient to use.** The ultra compact PyroPen has been specifically designed to fit into your pocket, just like a pen, so that you can carry it with you anywhere you go.

You simply aim, press the SCAN button and read the temperature immediately. No fuss. No need to focus and no special training.

The non-contact nature of the measurement means that you can take the temperature of moving, rotating, inaccessible or hazardous objects. This makes the PyroPen particularly useful for test, inspection and maintenance applications in industries such as food & beverage, automotive, plastics & rubber, textiles, paper & packaging, chemicals & pharmaceuticals, HVAC, electrical, asphaltting, plus many others.

The PyroPen L has all the features of the PyroPen E, plus laser sighting for small or distant targets and adjustable emissivity.

The PyroPen U has all the features of the PyroPen L, plus a built-in memory for logging up to 100 temperatures and the ability to perform PC based data acquisition via USB. It is supplied complete with USB interface cable and CalexSoft software disk.

**High performance, low cost.** The Calex design team have taken advantage of the latest technology, not only to provide an ultra slim design but to incorporate reliability with high accuracy.

Advanced manufacturing techniques are used to ensure that the PyroPen meets the highest quality standards at low cost.

Each PyroPen comes with additional functions such as maximum, minimum and average temperature measurements. The PyroPen can be LOCKED into the ON position if continuous measurements are required. The last measured value can also be held for those situations where it is not easy to see the display whilst measuring.
