

The Future of Robotics

Meets The Future of Packaging

Advantages for the Customer

- » Reduction in Total Packaging Costs
- » Save Time in Packaging Assembly
- » Tool & Nail Free Packaging
- » Packaging Built Around the Product
- » Customised Dunnages to Protect the Product
- » Tested & Approved by International Accredited Test Institutes

Added Value for the End-User

- » No Tools Required to Open the Clip-Lok Box
- » Easy to Disassemble and Access the Robot
- » Design Facilitates Safe Removal of the Robot
- » Effortless to Flatpack the Clip-Lok Box
- » Easy to Store for Later Use if Needed

A global supplier of sustainable transport packaging

Clip-Lok SimPak® develops and sells transport packaging that reduces customers' total costs and minimizes environmental impact. Our ambition is to create and further develop successful packaging solutions based on market needs. Many of our products are patented and have been awarded internationally. By using our products in the supply chain, our customers can contribute to a more sustainable society without compromising on high standards of protection and quality
