PROLINK PROSNAP
CUTS DOWNTIME WITH
ONE EASY SNAP

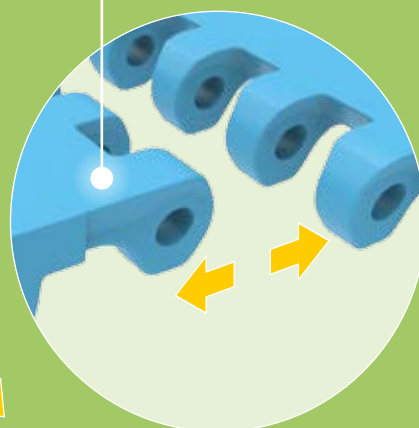

PROLINK PROSNAP CUTS DOWNTIME WITH ONE EASY SNAP

To open the belt:

1 Lift the belt
and click in place

3 Pull the ends of
the belt apart

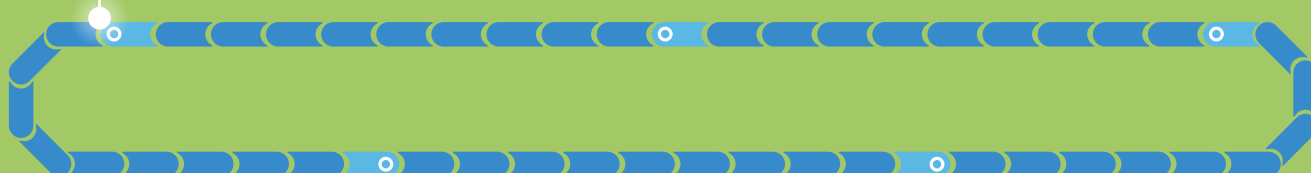

2 Pull out
ProSnap module

ProSnap module
ProLink series 6.1

Several ProSnap modules can optionally also be fitted to the belt. This makes the distances covered to open the belt shorter and fitting easier. What's more, if a belt's damaged, a whole segment can be replaced quickly.

The time required for dismantling, fitting, and cleaning decreases the conveyor's effectiveness. The new ProSnap modules (PSP) for Prolink plastic modular belts cut your conveyor's downtime every time the modular belt is opened or closed.

A tool-free, simple, one-click option.

ProSnap is available for the Prolink series listed below. It's easy to retrofit.

The advantages:

- Shorter downtime during fitting, cleaning, and repairs
- Tool-free opening and closing of the belt
- In a contrasting color, so quick to identify
- PSP systems for Series 6.1 and 10 have steel hinge pins, for easy-remove in higher load applications (no risk of pin distortion).

Prolink series 13 with PSP

Pitch 8 mm (0.31 in) |
For lightweight to medium-weight products (food and other items), as well as applications with knife edges.
QR code for film

Prolink series 4.1 with PSP

Pitch 14 mm (0.55 in) |
For lightweight to medium-weight products (food and other items).
QR code for film

Prolink series 10 with PSP

Pitch 25.4 mm (1 in) |
For lightweight to medium-weight products in hygiene-critical applications.
QR code for film

Prolink series 6.1 with PSP

Pitch 50 mm (1.97 in) |
For medium-weight to heavy products in hygiene-critical applications.
