

MAKE WORK FLOW

MAKE WORK FLOW

INLINE

INLINE

INLINE is designed for stacking and destacking empty pallets in automatic installations and production lines.

INLINE is a standard pallet magazine that can be placed over all types of transport lines and is, at the same time, prepared for steering making it easy to integrate into the installation's main controls.

STANDARD ADAPTED TO YOUR SOLUTION

The point of departure for Palomat Inline is a robust and stable pallet magazine that is ideal for unloading and loading pallets with a fork lift truck. The Palomat can handle various types of pallets and sizes and can be adapted to suit different applications.

RESULTS ON THE BOTTOM LINE

There is an increasing demand for high-technology production solutions to improve the competitive capacity of the individual business. Your customers expect you to be able to manage this undertaking - that you will be able to create a more efficient economic and reliable solution. We have the product for pallet handling that will make this possible.

MAKE WORK FLOW

You can read more about the different types as well as accessories on www.palomat.com.

// RELIABILITY
// EFFICIENCY
// FLEXIBILITY

A production line is no stronger than its weakest link
- remove a weak link with Palomat Inline.

CREATE YOUR SOLUTION WITH PALOMAT INLINE. OUR PALLET MAGAZINES ARE DESIGNED TO CREATE A WORK FLOW.

It is also as easy to install as it is to programme and we have many years' experience of design and construction. The smart solution is Inline.
