

FOOT MASTER® leveling casters?

Moving a piece of equipment into a desired location, applying a wheel braking mechanism, and setting the unit into the exact position is easier said than done in many caster applications; FOOT MASTER® leveling casters offer a smart solution.

Once positioned in the exact spot of operation, the anti-vibration foot/pad is lowered, and the caster wheel is lifted off the ground, making the equipment completely stationary.

This pad allows for mirror adjustments in leveling requirements. When your equipment need to be moved out of the way, just raise the anti-vibration foot/pad and push it easily to a new location.

Manufacturer

Since 1989, G-DOK industries, a South Korean based company, has been manufacturing casters and wheels under the name 'FOOT MASTER®'. G-DOK earned its reputation for excellence by supplying global Korean companies, as well as multi-national top tier companies since its inception. G-DOK is known for leveling, shock absorbing and heavy duty casters, but its devotion to quality, advanced R&D and in-house testing also extends to its standard and specialty wheels.
