

# Dry disinfection 24-7

Lower total germ level  
Elimination of bacteria in the air

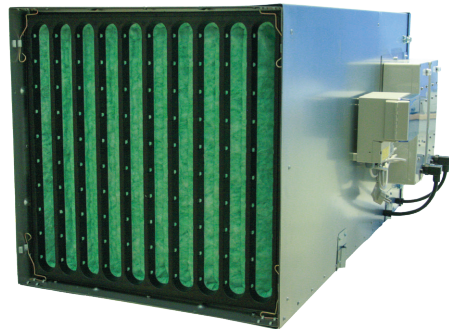

- ✓ Airgenic activates the natural +/-atoms in the oxygen molecules and creates an energy-rich balance of ions in the air
- ✓ The Airgenic process is identical to the nature's method of ensuring optimal air quality
- ✓ An activated oxygen molecule fights mold, bacteria, gases and odors

### DX 1800

DX 1800 is an air ionization system to be used for disinfection of air in existing ventilations (Air Ducts)

### AIR 4000

AIR 4000 is an ionization system to be used for disinfection of air in recirculation systems.

The unit is mounted hanging from the ceiling in the air flow.

### CX 120/300

CX 120 and CX 300 is based on an ionization system to be used for disinfection of air. The units are mounted hanging from the ceiling.

### MX1800

MX1800 is a portable ionization system to be used for disinfection of air. The unit can be used flexibly as needed.
