JUNIOR FILTER HOUSING

PFJRSS

Technical Data

-  Stainless Steel 316
-  10 l/min
-  10 bar
-  95°C (EPDM)
-  1/2"
-  2.5" 5"
-  EPDM, Viton or PTFE

Junior Housings with 1/2" in- and outlet are made of stainless steel. The three-piece construction consists of filter head, lower part and v-clamp to close the housing. The filter head features a special connecting extrusion on which the Junior element adapter with internal o-ring can be attached. The lower parts of the Junior housings can be delivered to accommodate Junior element type 62.5 L in the corresponding two lengths. The small diameter and the small construction height result in a small filling volume.

Applications

- Ink filters for industrial ink-jet printers
- Ink filters for barcode labelling devices
- Fine filters for CD- & DVD- labelling
- End-filter for graphic spray-systems
- Sterile filters for ultrapure water
- Fine filter for solvents
- Vent filters for containers
- Protection filters for vacuum pumps
